Architectural Approach to Level Design Christopher W. Totten, 2019-04-25 Written by a game developer and professor trained in architecture, *An Architectural Approach to Level Design* is one of the first books to integrate architectural and spatial design theory with the field of level design. It explores the principles of level design through the context and history of architecture. Now in its second edition, *An Architectural Approach to Level Design* presents architectural techniques and theories for you to use in your own work. The author connects architecture and level design in different ways that address the practical elements of how designers construct space and the experiential elements of how and why humans interact with that space. It also addresses industry issues like how to build interesting tutorial levels and how to use computer-generated level design systems without losing the player-focused design of handmade levels. Throughout the text, you will learn skills for spatial layout, evoking emotion through gamespaces, and creating better levels through architectural theory.

Making Sense of Mind-Game Films Simin Nina Littschwager, 2019-06-27 Mind-game films and other complex narratives have been a prominent phenomenon of the cinematic landscape during the period 1990-2010, when films like *The Sixth Sense*, *Memento*, *Fight Club* and *Source Code* became critical and commercial successes, often acquiring a cult status with audiences. With their multiple story lines, unreliable narrators, ambiguous twist endings, and paradoxical worlds, these films challenge traditional ways of narrative comprehension and in many cases require and reward multiple viewings. But how can we make sense of films that don't always make sense the way we are used to? While most scholarship has treated these complex films as narrative puzzles that audiences solve with their cognitive skills, *Making Sense of Mind-Game Films* offers a fresh perspective by suggesting that they appeal to the body and the senses in equal measures. Mind-game films tell stories about crises between body, mind and world, and about embodied forms of knowing and subjective ways of being-in-the-world. Through compelling in-depth case studies of popular mind-game films, the book explores how these

complex narratives take their (embodied) spectators with them into such crises. The puzzling effect generated by these films stems from a conflict between what we think and what we experience, between what we know and what we feel to be true, and between what we see and what we sense.

Are You Watching Closely? Seth Friedman, 2017-08-16 Identifies a new genre—misdirection films—and explains its appeal to contemporary producers and audiences. *Are You Watching Closely?* is the first book to explore the recent spate of —misdirection films,— a previously unidentified Hollywood genre characterized by narratives that inspire viewers to reinterpret them retrospectively. Since 1990, Hollywood has backed more of these films than ever before, many of which, including *The Sixth Sense* (1999), *A Beautiful Mind* (2001), and *Inception* (2010), were both commercial and critical successes. Seth Friedman examines this genre in its sociocultural, industrial, and technological contexts to explain why it has become more attractive to producers and audiences. The recent popularity of misdirection films, Friedman argues, is linked to new technologies that enable repeat viewings and online discussion, which makes it enticing to an industry that depends increasingly on the aftermarket, as well as to historically specific cultural developments. That is, in addition to being well suited for shifting industrial and technological conditions, these films are appealing because they suggest that it remains possible to know what —actually— occurred and who was —really— responsible for events at a time when it is also becoming increasingly recognized that —truth— is relative. *Are You Watching Closely?* shows how Hollywood’s effective strategies for these changing circumstances put it at the forefront of a storytelling trend that has increasingly become

important across media. Through close analyses of how misdirection films have been designed, marketed, and received in relation to their contexts, Friedman demonstrates the ways in which they epitomize a kind of narrative experimentation that has become a crucial facet of twenty-first-century audiovisual storytelling.

The Mind-Game Film Thomas Elsaesser, 2021-03-28 This book represents the culmination of Thomas Elsaesser's intense and passionate thinking about the Hollywood mind-game film from the previous two decades. In order to answer what the mind-game film is, why they exist, and how they function, Elsaesser maps the industrial-institutional challenges and constraints facing Hollywood, and the broader philosophic horizon within which American cinema thrives today. He demonstrates how the 'Persistence of Hollywood' continues as it has adapted to include new twists and turns, as well as revisions of past concerns, as film moves through the 21st century. Through examples such as *Minority Report*, *Mulholland Drive*, *Source Code*, and *Back to the Future*, Elsaesser explores how mind-game films challenge us and play games with our perception of reality, creating skepticism and (self-) doubt. He also highlights the mind-game film's tendency to intervene in a complex fashion in the political moment by questioning the dominant power's intent to program both body and mind alike. Prescient and compelling, *The Mind-Game Film* will appeal to students, scholars, and enthusiasts of media studies, film studies, philosophy, and politics.

Hollywood Puzzle Films Warren Buckland, 2014-05-30 From Inception to The Lake House, moviegoers are increasingly flocking to narratologically complex puzzle films. These puzzle movies borrow techniques—like fragmented spatio-temporal reality, time loops, unstable characters with split identities or unreliable narrators—more commonly attributed to art cinema and independent films. The essays in Hollywood Puzzle Films examine the appropriation of puzzle film techniques by contemporary Hollywood dramas and blockbusters through questions of narrative, time, and altered realities. Analyzing movies like Source Code, The Butterfly Effect, Donnie Darko, Déjà Vu, and adaptations of Philip K. Dick, contributors explore the implications of Hollywood's new movie mind games.

Mobile Media Learning et al., Christopher Holden, 2015 This book is an inspirational message about what is possible and practical in the name of learning through mobile media. We present stories from a diverse set of educators, a microcosm of the landscape of mobile media learning. Each author has found a way to create something new and beautiful in their own world. And though their results are exceptional, their surroundings

are not. Most are not experts in high-technology, nor highly equipped. They get as far as they do by using what is at hand, in part by making use of accessible, free and open source software. To provide both a deeper look into how these projects operate and a practical resource for those who want to join in, this book addresses most of these tools individually as well. Our detailed, down-to-earth accounts will not only be legible to newcomers but refreshingly forthright to those anxious to better understand educational experiments connecting learning and mobile media -- Back cover.

The Making of Tomb Raider Daryl Baxter, 2021-12-20 Back in 1994 at the game company 'CORE Design' in Derby, Lara Croft was born. Through eighteen months of pure hard work from the team, Tomb Raider was released in 1996 and became the success that we see today; taking part in the mid-nineties celebrations of Brit-Pop and Girl Power. This is the story of the team who were involved in creating the first two games, then leaving the series to a new team in 1998. Lara Croft brought class, comedy, and a James Bondian role to the game, dreamt up by Toby Gard and helped to become a pitch with Paul Douglas. The game was a gamble, but because everyone at the company believed in it, it led to huge success for everyone, except for Toby and Paul. 'The Making of Tomb Raider' goes into detail of how Lara and the games were born, alongside why Toby Gard and Paul Douglas left before the sequel was released. Throughout eleven chapters of countless interviews, this book will tell you who was responsible for creating the first two games; from its levels, its music, the many voices of Lara Croft, and much more. The team also reveals all about the star of the second game; Winston the Butler, and how he came to be by Joss Charnet. Over twenty people were interviewed for this story; from the pitch for

what would be Tomb Raider, alongside the challenges along the way, up until the release of Tomb Raider 2 in 1997...

Skepticism Films Philipp Schmerheim, 2017-06-29 Skepticism Films: Knowing and Doubting the World in Contemporary Cinema introduces skepticism films as updated configurations of skepticist thought experiments which exemplify the pervasiveness of philosophical ideas in popular culture. Philipp Schmerheim defends a pluralistic film-philosophical position according to which films can be, but need not be, expressions of philosophical thought in their own right. It critically investigates the influence of ideas of skepticism on film-philosophical theories and develops a typology of skepticism films by analyzing The Truman Show, Inception, The Matrix, Vanilla Sky, The Thirteenth Floor, Moon and other contemporary skepticism films. With its focus on skepticism as one of the most significant philosophical problems, Skepticism Films provides a better understanding of the dynamic interplay between film, theories of film and philosophy.

Time Travel in Popular Media Matthew Jones, Joan Ormrod, 2015-03-13 In recent years numerous films, television series, comic books, graphic novels and video games have featured time travel narratives, with characters jumping backward, forward and laterally through time. No rules govern time travel in these stories. Some characters move by machine, some by magic, others by unexplained means. Sometime travelers can alter the timeline, while others are prevented from causing temporal aberrations. The fluid forms of imagined time travel have fascinated audiences and prompted debate since at least the 19th century. What is behind our fascination with time travel? What does it mean to be out

of one's own era? How do different media tell these stories and what does this reveal about the media's relationship to time? This collection of new essays--the first to address time travel across a range of media--answers these questions by locating time travel narratives within their cultural, historical and philosophical contexts. Texts discussed include Doctor Who, The Terminator, The Georgian House, Save the Date, Back to the Future, Inception, Source Code and others.

Shutter Courtney Alameda, 2015-02-03 Micheline Helsing is a tetrachromat -- a girl who sees the auras of the undead in a prismatic spectrum. As one of the last descendants of the Van Helsing lineage, she has trained since childhood to destroy monsters both corporeal and spiritual: the corporeal undead go down by the bullet, the spiritual undead by the lens. With an analog SLR camera as her best weapon, Micheline exorcises ghosts by capturing their spiritual energy on film. She's aided by her crew: Oliver, a techno-whiz and the boy who developed her camera's technology; Jude, who can predict death; and Ryder, the boy Micheline has known and loved forever. When a routine ghost hunt goes awry, Micheline and the boys are infected with a curse known as a soulchain. As the ghostly chains spread through their bodies, Micheline learns that if she doesn't exorcise her entity in seven days or less, she and her friends will die. Now pursued as a renegade agent by her monster-hunting father, Leonard Helsing, she must track and destroy an entity more powerful than anything she's faced before . . . or die trying. Lock, stock, and lens, she's in for one hell of a week.

Narrative and Narration Warren Buckland, 2020-12-15 From mainstream blockbusters to art house cinema, narrative and narration are the driving forces that organize a film. Yet attempts to explain these forces are often mired in notoriously complex terminology and dense theory. Warren Buckland provides a clear and accessible introduction that explains how narrative and narration work using straightforward language. *Narrative and Narration* distills the basic components of cinematic storytelling into a set of core concepts: narrative structure, processes of narration, and narrative agents. The book opens with a discussion of the emergence of narrative and narration in early cinema and proceeds to illustrate key ideas through numerous case studies. Each chapter guides readers through different methods that they can use to analyze cinematic storytelling. Buckland also discusses how departures from traditional modes, such as feminist narratives, art cinema, and unreliable narrators, can complicate and corroborate the book's understanding of narrative and narration. Examples include mainstream films,

both classic and contemporary; art house films of every stripe; and two relatively new styles of cinematic storytelling: the puzzle film and those driven by a narrative logic derived from video games. Narrative and Narration is a concise introduction that provides readers with fundamental tools to understand cinematic storytelling.

Storming Las Vegas John Huddy, 2009-04-28 On September 20, 1998, Jose Vigoa, a child of Fidel Castro's revolution, launched what would be the most audacious and ruthless series of high-profile casino and armored car robberies that Las Vegas had ever seen. In a brazen sixteen-month reign of terror, he and his crew would hit the crème de la crème of Vegas hotels: the MGM, the Desert Inn, the New York—New York, the Mandalay Bay, and the Bellagio. The robberies were well planned and executed, and the police—"the stupids," as Vigoa contemptuously referred to them—were all but helpless to stop them. But Lt. John Alamshaw, the twenty-three-year veteran in charge of robbery detectives, was not giving up so easily. For him, Vigoa's rampage was a personal affront. And he would do whatever it took, even risk his badge, to bring Vigoa down.

Agency and Media Reception Susanne Eichner, 2014-01-21 What happens to our sense of agency, our general ability to perform actions in our life worlds, in the course of media reception and appropriation? Whilst considering media communication as a special form of social action, this work reconsiders the key concepts of social action theory, pragmatism, communication theory as well as film, game and television theory. It thus integrates agency as the key to understanding 'doing media' and at the same time conceptualizes agency as a specific mode of involvement across media boundaries. This approach amalgamates miscellaneous ideas and conceptions such as interactivity,

participation, cognitive control, play or empowerment and applies the theoretical considerations on the basis of textual analyses of the films *Inception* and *The Proposal*, the TV shows *Lost* and *I'm a Celebrity* and the video games *Grand Theft Auto IV* and *The Walking Dead*.

Narrative Instability Stefan Schubert, 2019-11-15 This book introduces the concept of 'narrative instability' in order to make visible a new trend in contemporary US popular culture, to analyze this trend's poetics, and to scrutinize its textual politics. It identifies those texts as narratively unstable that consciously frustrate and obfuscate the process of narrative understanding and comprehension, challenging their audiences to reconstruct what happened in a text's plot, who its characters are, which of its diegetic worlds are real, or how narrative information is communicated in the first place. Despite - or rather, exactly because of - their confusing and destabilizing tendencies, such texts have attained mainstream commercial popularity in recent years across a variety of media, most prominently in films, video games, and television series. Focusing on three clusters of instability that form around identities, realities, and textualities, the book argues that narratively unstable texts encourage their audiences to engage with the narrative constructedness of their universes, that narratively unstable texts encourage their audiences to engage with the narrative constructedness of their universes, that narrative instability embodies a new facet of popular culture, that it takes place and can only be understood transmedially, and that its textual politics particularly speak to white male, middle-class Americans.
