The Physics of Musical Instruments Neville H. Fletcher, Thomas D.

Rossing, 2013-11-09 While the history of musical instruments is nearly as old as civilisation itself, the science of acoustics is quite recent. By understanding the physical basis of how instruments are used to make music, one hopes ultimately to be able to give physical criteria to distinguish a fine instrument from a mediocre one. At that point science may be able to come to the aid of art in improving the design and performance of musical instruments. As yet, many of the subtleties in musical sounds of which instrument makers and musicians are aware remain beyond the reach of modern acoustic measurements. This book describes the results of such acoustical investigations - fascinating intellectual and practical exercises. Addressed to readers with a reasonable grasp of physics who are not put off by a little mathematics, this book discusses most of the traditional instruments currently in use in Western music. A guide for all who have an interest in music and how it is produced, as well as serving as a comprehensive reference for those undertaking research in the field.

Teaching Chemistry in Higher Education Michael Seery, Claire Mc

Donnell, 2019-07-01 Teaching Chemistry in Higher Education celebrates the contributions of Professor Tina Overton to the scholarship and practice of teaching and learning in chemistry education. Leading educators in United Kingdom, Ireland, and Australia—three countries where Tina has had enormous impact and influence—have contributed chapters on innovative approaches that are well-established in their own practice. Each chapter introduces the key education literature underpinning the approach being described. Rationales are discussed in the context of attributes and learning outcomes desirable in modern chemistry curricula. True to Tina's personal philosophy, chapters offer pragmatic and useful guidance on the implementation of innovative teaching approaches, drawing from the authors' experience of their own practice and evaluations of their implementation. Each chapter also offers key guidance points for implementation in readers' own settings so as to maximise their adaptability. Chapters are supplemented with further reading and supplementary materials on the book's website (overtontestschrift.wordpress.com). Chapter topics include innovative approaches in facilitating group work, problem solving, context- and problem-based learning, embedding transferable skills, and laboratory education—all themes relating to the scholarly interests of Professor Tina Overton. About the Editors: Michael Seery is Professor of Chemistry Education at the

University of Edinburgh, and is Editor of Chemistry Education Research and Practice. Claire Mc Donnell is Assistant Head of School of Chemical and Pharmaceutical Sciences at Technological University Dublin. Cover Art: Christopher Armstrong, University of Hull

Very High Angular Resolution Imaging J.G. Robertson, W.J. Tango, 1993-12-31 The 1990s are proving to be a very exciting period for high angular resolution astronomy. At radio wavelengths a combination of new array instruments and powerful imaging algorithms have generated images of unprecedented resolution and quality. In the optical and infrared, the great technical difficulties associated with constructing separated-aperture interferometers have been largely overcome, and many new instruments are now operating or are being developed. As these programs start to produce observational results they will be able to draw extensively on the experience gained by the radio-interferometry community. Thus it seemed that the time was ripe for a meeting which would bring together workers from all wavelength ranges to discuss the details of the science and art of Very High Angular Resolution Imaging. While the main emphasis of Symposium No. 158 was on high resolution techniques from the radio, mm-wave, infrared and optical bands, it also provided an opportunity for presentation of astronomical results from these techniques. As well as giving our colleagues from the Northern Hemisphere a break from midwinter, the location of the Symposium in Australia recognised the continuing development of astronomical interferometry in this country, especially the recent completion of the Australia Telescope radio array, and the progress toward commissioning of the Sydney University Stellar Interferometer. A number of the participants visited these instruments during the post-symposium tour.

Photoelectronic Imaging Devices Lucien Biberman, 2013-11-11 The past decade has seen a major resurgence in optics research and the teaching of optics throughout the major universities both in this country and abroad. Electrooptical devices have become a challenging form of study that has penetrated both the electrical engineering and the physics departments of most major schools. There seems to be something challenging about a laser that appeals to both the practical electrical engineer with a hankering for fundamental research and to the fundamental physicist with a hankering to be practical. Somehow or other this same form of enthusiasm has not previously existed in the study of photoelectronic devices that form images. This field of endeavor is becoming more and more sophisticated as newer forms of solid state devices enter the field not only in the data processing end but in the conversion of radiant energy into electrical charge patterns that are stored, manipulated, and read out in a way that a decade ago would have been considered beyond some fundamental limit or other. It is unfortunate, however, that this kind of material has heretofore been learned only by the process of becoming an apprentice in one or more of the major development laboratories concerned with the manufacture of image intensifiers or television tubes or the production of systems employing these devices.

Fundamentals of Multimedia Ze-Nian Li, Mark S. Drew, Jiangchuan Liu, 2014-04-09 This textbook introduces the "Fundamentals of Multimedia", addressing real issues commonly faced in the workplace. The essential concepts are explained in a practical way to enable students to apply their existing skills to address problems in multimedia. Fully revised and updated, this new edition now includes coverage of such topics as 3D TV, social networks, high-efficiency video compression and conferencing, wireless and mobile networks, and their attendant technologies. Features: presents an overview of the key concepts in multimedia, including color science; reviews lossless and lossy compression methods for image, video and audio data; examines the demands placed by multimedia communications on wired and wireless networks; discusses the impact of social media and cloud computing on information sharing and on multimedia content search and retrieval; includes study exercises at the end of each chapter; provides supplementary resources for both students and instructors at an associated website.

Spinal Cord Disease Edmund Critchley, Andrew A. Eisen, 2012-12-06 Spinal Cord Injury or disease can happen to anyone at any time and the effects can be devastating. I found this out personally when I was thrown from the back of a pick up truck at age 15 was left paralyzed from the waist down. It was during my recuperation as a young teenager that I first gained insight into the importance of rehabilitation. My family, doctors, nurses, fellow patients and researchers who were dedicated to helping me overcome my personal tragedy helped me pull through. Today, rehabilitation medicine is taking great strides and empowering the person with the injury to take control of their future, overcome their setbacks and, through collaborative support, reach their personal goals and potential. Since 1987 the Legacy raised by my Man in Motion World Tour (24901 miles wheeled around the world March 1985-May 1987) has provided \$13 million dollars to research and rehabilitation in the areas affected by spinal cord injury. I hope that in some small way this funding has contributed to the development of the vital programmes that supported me and many others. The effects of spinal cord injury are traumatic and life-shattering and require a skilled interdisciplinary approach. I congratulate those who have contributed to this book and challenge each one of you to never give up on your dreams to find the answers to the optimum treatment of spinal cord injury and disease.

Martial, Book VII. A Commentary Guillermo Galán Vioque,2017-09-18 This volume is the first comprehensive commentary on the seventh book of Martial's epigrams. The introduction discusses the date of publication of Martial's books, the themes of the epigrams of book seven as well as the transmission of the text. The autor pays special attention to the adulation of Domitian in book seven, the satirization of lawyers, legacy-hunters, parasites and dinner-guests, and hetero- and homosexuality. The commentary, preceded by a revised edition of Shackleton Bailey's Teubner edition (1990), focuses on literary, linguistic and metrical matters. Thematic relationships with other books of Martial and other Greek and Latin literature are highlighted. Attention is also paid to the use of recurrent motifs, obscene language, puns, double meanings and proper names.

Ferghana Valley S. Frederick Starr,2014-12-18 The Ferghana Valley can reasonably be said to lie in the heart of Central Asia. As such, the Valley has made an inordinate contribution to the history and culture of the region as a whole, as well as significantly affecting the economic, political and religious spheres. This book looks at the region over time, from its early history to the present. It embraces not just the obvious fields of politics, economics and religion, but also ethnography, sociology and culture, and includes the insights of leading scholars from all three Ferghana countries. The book discusses various questions of identity relating to the region, showing how the identity of the Ferghana Valley relates to the emerging national identities of the three post-colonial states that are still gradually emerging from the demise of the Soviet Union, as well as how an understanding of the Ferghana Valley is key to understanding Central Asia itself.

Manuscript Cultures: Mapping the Field Jörg Quenzer,Dmitry Bondarev,Jan-Ulrich Sobisch,2014-12-12 Script and writing were among the most important inventions in human history, and until the invention of printing, the handwritten book was the primary medium of literary and cultural transmission. Although the study of manuscripts is already quite advanced for many regions of the world, no unified discipline of 'manuscript studies' has yet evolved which is capable of treating handwritten books from East Asia, India and the Islamic world equally alongside the European manuscript tradition. This book, which aims to begin the interdisciplinary dialogue needed to arrive at a truly systematic and comparative approach to manuscript cultures worldwide, brings together papers by leading researchers concerned with material, philological and cultural aspects of different manuscript traditions.

Hymn to Delos Callimachus,2018-07-17 This is the first comprehensive commentary on Callimachus' Hymn to Delos, its immediate predecessor being Cahen's concise work of 1930. The Introduction proposes a new interpretation of the Hymn's purpose and background, and further discusses the date of its composition, its vocabulary, several of its stylistic aspects, and its metre and prosody. The Commentary, which follows Pfeiffer's text (Oxford 1953), presents parallels from relevant Greek poetry (mainly epic and tragic) to illustrate tradition and originality in Callimachus' style, offers some new interpretations and examines old ones, and indicates possible allusions to contemporary events in Egypt and elsewhere. Textual problems are treated where necessary and emendations are also occasionally proposed.
