Ezekiel in Context Brian Neil Peterson,2012-05-03 One of the most perplexing and misunderstood books of the Bible, Ezekiel has left many scholars and exegetes scratching their heads regarding its message, coherency, and interpretation. Brian Peterson's look at the book of Ezekiel as a unified whole set within an exilic context helps explain some of the more difficult symbolic aspects in the book and makes Ezekiel as a whole more intelligible. Drawing on ancient Near Eastern concepts and motifs such as covenant and treaty curses, the various gods that made up the Babylonian pantheon, and the

position that Israel held as the people of Yahweh, Peterson enlightens readers by showing that Ezekiel can only be understood in its original context. By placing the book first in its historical context, Peterson demonstrates how the original hearers of its message would have understood it, and how this message can be appreciated and applied by people today as well.

The Economic Development of Europe's Regions Joan Ramón Rosés, Nikolaus Wolf, 2018-11-06 This book is the first quantitative description of Europe's economic development at a regional level over the entire twentieth century. Based on a new and comprehensive set of data, it brings together a group of leading economic historians in order to describe and analyze the development of European regions, both for nation states and for Europe as a whole. This provides a new transnational perspective on Europe's quantitative development, offering for the first time a systematic long-run analysis of national policies independent from the use of national statistical units. The new transnational dimension of data allows for the analysis of national policies in a more thorough way than ever before. The book provides a comprehensive database at the level of modern NUTS 2 regions for the period 1900–2010 in 10-year intervals, and a panoramic view of economic development both below and above the national level. It will be of great interest to economic historians, economic geographers, development economists and those with an interest in economic growth.

Finding Faith Today Bryan P. Stone, 2018-10-31 How do persons come to faith in our time? Are

they active seekers or brought in by others? Is it a journey? Or is it a more sudden conversion? Are spouses, relatives, and friends most important to the process? Do clergy matter? What sorts of values, practices, and lifestyles tend to change for those who newly come to faith? What are the differences among the various religious traditions in how one comes to faith? This book presents the findings of a multi-year study on how people come to faith in the US context. It involves about 1,800 persons who recently made a new profession of faith or some other public commitment across various religious traditions in the US. An initial study was conducted twenty-five years ago on Christian populations in England by Bishop John Finney, but surprisingly little research has been done since then. Finding Faith Today is an expansion and follow-up of that study. The book sheds new light on how people come to faith and what sort of spiritual, practical, and social changes accompany that. The book will be a help to those seeking to open up their communities of faith to others with hospitality and integrity.

Public Policy and the Mass Media Sigrid Koch-Baumgarten, Katrin Voltmer, 2010-02-25 The mass media are playing an increasingly central role in modern political life that expands beyond their traditional function as mediators between the world of politics and the citizens. This volume explores the extent and circumstances under which the media affects public policy; whether the political impact of the media is confined to the public representation of politics or whether their influence goes further to also affect the substance of political decisions. It provides an in-depth understanding of the conditions under which the media might, or might not, play a role in the policy process and what the nature of their influence is. Bringing together conceptual and methodological approaches from both political science and communications studies, this book presents an interdisciplinary perspective. It presents empirical evidence of the processes involved in the interaction between mass communication and policy and features case studies from Western Europe and the US and across different policy fields. The book will be of interest to students of public policy, political communication and comparative politics.
