Sleep Well, Take Risks, Squish the Peas Hasan Merali,2024-03-19 Toddlers hold the secrets to having more fun and living a fulfilling life. These are secrets we once knew and ones that a Harvard-trained physician can help us rediscover. Terrible twos, temper tantrums, and grocery store meltdowns are usually the first things that come to mind when people think of toddlers. But pediatric emergency medicine physician and researcher Dr. Hasan Merali has long thought toddlers are among the best people in our society and adults could do well to learn from them. These extraordinary youngsters can be impulsive, yes, but with this comes a remarkable ability to take risks and ask questions—two qualities that can help us enjoy life more. Toddlers act kindly toward strangers, are eager to work with others to solve problems, and demonstrate extraordinary dedication and perseverance. These are all traits that many of us aspire to have in order to improve both our personal and professional lives. To unpack this behavior, Dr. Merali includes many humorous examples from his experience as a pediatrician and father, but the core lessons are drawn from two decades worth of fascinating and surprising studies in child psychology and development. Merali connects these studies to research about adults to create the first book to offer adults important lessons that can be gleaned from toddlers. Toddlers can teach you many things, including how to: Lose weight naturally Sleep better Build stronger friendships Improve teamwork Be more productive Have more fun, and Live a more fulfilling life *Sleep Well, Take Risks, Squish the Peas* shows us how toddlers bring out the best in humanity and how we can, too. It's a whole new way of looking at and learning from toddlers.

Public Administration in Ethiopia Bacha Kebede Debela,Geert Bouckaert,Meheret Ayenew Warota,Dereje Terefe Gemechu,2020-12-01 Building an effective, inclusive, and accountable public administration has become a major point of attention for policymakers and academics in Ethiopia who want to realise sustainable development. This first handbook on Ethiopian Public Administration is written by Ethiopian academics and practitioner-academics and builds on PhD studies and conference papers, including studies presented at the meetings of the Ethiopian Public Administration Association (EPAA), established in 2016. Public Administration in Ethiopia presents a wide range of timely issues in four thematic parts: Governance, Human Resources, Performance and Quality, and Governance of Policies. Each of the individual chapters in this volume contributes in a different way to the overarching research questions: How can we describe and explain the contexts, the processes and the results of the post-1990 politico-administrative reforms in Ethiopia? And what are the implications for sustainable development? This book is essential for students, practitioners, and theorists interested in public administration, public policy, and sustainable development. Moreover, the volume is a valuable stepping stone for PA teaching and PA research in Ethiopia.

Scrum Jeff Sutherland,J.J. Sutherland,2014-09-30 For those who believe that there must be a more agile and efficient way for people to get things done, here is a brilliantly discursive, thought-provoking book about the leadership and management process that is changing the way we live. In the future, historians may look back on human progress and draw a sharp line designating “before Scrum” and “after Scrum.” Scrum is that ground-breaking. It already drives most of the world's top technology companies. And now it's starting to spread to every domain where leaders wrestle with complex projects. If you've ever been startled by how fast the world is changing, Scrum is one of the reasons why. Productivity gains of as much as 1200% have been recorded, and there's no more lucid – or compelling – explainer of Scrum and its bright promise than Jeff Sutherland, the man who put together the first Scrum team more than twenty years ago. The thorny problem Jeff began tackling back then boils down to this: people are spectacularly bad at doing things with agility and efficiency. Best laid plans go up in smoke. Teams often work at cross purposes to each other. And when the pressure rises, unhappiness soars. Drawing on his experience as a West Point-educated fighter pilot, biometrics

expert, early innovator of ATM technology, and V.P. of engineering or CTO at eleven different technology companies, Jeff began challenging those dysfunctional realities, looking for solutions that would have global impact. In this book you'll journey to Scrum's front lines where Jeff's system of deep accountability, team interaction, and constant iterative improvement is, among other feats, bringing the FBI into the 21st century, perfecting the design of an affordable 140 mile per hour/100 mile per gallon car, helping NPR report fast-moving action in the Middle East, changing the way pharmacists interact with patients, reducing poverty in the Third World, and even helping people plan their weddings and accomplish weekend chores. Woven with insights from martial arts, judicial decision making, advanced aerial combat, robotics, and many other disciplines, Scrum is consistently riveting. But the most important reason to read this book is that it may just help you achieve what others consider unachievable – whether it be inventing a trailblazing technology, devising a new system of education, pioneering a way to feed the hungry, or, closer to home, a building a foundation for your family to thrive and prosper.
