Beating the Odds Eddie Brown, 2011-03-10 *Beating the Odds* is the improbable, inspiring autobiography of financial guru Eddie C. Brown, one of the nation's top stock pickers and money managers. It details how Brown skillfully kept Brown Capital Management afloat through the dot-com bust, 9/11 and the Great Recession. Born to a 13-year-old unwed mother in the rural South, this African-American investment whiz created a Baltimore-based financial firm that amassed more than \$6 Billion under management. Brown delves into the profound heartbreak and disorientation upon the death of his beloved grandmother – who was his surrogate mother -- and recounts how Brown's moonshine-running Uncle Jake subsequently became the dominant adult figure in Brown's life. His unflinchingly honest, easy-to-read memoir details how intellectual curiosity, abiding self-belief, hard work and divine providence helped Brown earn an electrical engineering degree, become an Army officer, and later a civilian IBM engineer. Readers will learn of the strife that ensued when Brown quit IBM to earn an MBA, leading to investment

jobs that prepared him to start his own money management company in 1983.

The Jelly Effect Andy Bounds, 2010-01-19 How effective is the communication you experience every day? How often have you been bored during a presentation? Failed to win a piece of business that, deep down, you know you should have won? Had a tedious, pointless networking conversation? Countless times, no doubt. Too much information and not enough relevance is a problem that pervades almost all business communication. You see, the way many people communicate is like filling a bucket with jelly, flinging it at their audience, and hoping some of it sticks. It's ineffective, it's irritating and, above all, it's very messy. So what's the answer? More relevance and a lot less jelly. The Jelly Effect teaches you simple, memorable and costless ways to win more attention and more business. Imagine how effective you'd be if you communicated only what was relevant 100 percent of the time. You would be better at talking to others, presenting, networking and selling. You would excel in interviews, meetings and pay-rise discussions. The benefits would be endless. The Jelly Effect shows you how to raise your game to a different level. You'll never fling another bucket of jelly again... **PRAISE FOR THE JELLY EFFECT** 'The most effective, original and insightful book on business communication that I have ever read.' --Dr. Ivan R. Misner, NY Times bestselling author of Truth or Delusion? and founder of Business Network International 'Andy Bounds has a totally unique and inspiring way of communicating. He also has this tremendous ability to help others achieve more when they communicate. Every single person he's worked with at npower has found his guidance to be immensely valuable, and to have made a real difference. My advice: read this book – it will help you communicate with, and relate to, people better than ever before.' --Heidi

Walton, npower, People Development Manager 'They say the definition of genius is the ability to make the complex simple. If that's the case then Andy Bounds is a genius. This book is packed with insight and ideas that make the whole art of communication and connecting with people both easy to understand and apply. Yes, you'll have the occasional B.F.O.(Blinding Flash of the Obvious) moment and wonder why on earth you've never thought of some of the ideas before...truth is we need some one like Andy with his incredibly easy style of writing to wake us up to the obvious. I defy anyone who reads this book and applies the insights to their own business not to see a increase in both their profit and their profile.' --Paul McGee, International speaker and best selling author of S.U.M.O. (Shut Up, Move On)

Advances in Downy Mildew Research P.T.N. Spencer-Phillips,U. Gisi,A. Lebeda,2007-05-08 P. T. N. SPENCER-PHILLIPS Co-ordinator, Downy Mildew Working Group of the International Society for Plant

Pathology University of the West of England, Coldharbour Lane, Bristol BS16 1QY, UK Email: peter.spencer-phillips@uwe.ac.uk It is a very great privilege to write the preface to the first specialist book on downy mildews since the major work edited by D. M. Spencer in 1981. The idea for the present publication arose from the Downy Mildew Workshop at the International Congress of Plant Pathology (ICPP) held in Edinburgh in August 1998. Our intention was to invite reviews on selected aspects of downy mildew biology from international authorities, and link these to a series of related short contributions reporting new data. No attempt has been made to cover the breadth of downy mildew research, but we hope that further topics will be included in future volumes, so that this becomes the first of a series following the five year ICPP cycle.

Complexity, Security and Civil Society in East Asia Peter Hayes, Kiho Yi, 2015-06-22 Complexity, Security and Civil Society in East Asia offers the latest understanding of complex global problems in the region, including nuclear weapons, urban insecurity, energy, and climate change. Detailed case studies of China, North and South Korea, and Japan demonstrate the importance of civil society and ‘civic diplomacy’ in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia’s security. In doing so, the book identifies key pressure points at which civil society can push for constructive changes—especially ones that reduce the North Korean threat to its neighbors. Unusually, this book is both theoretical and practical. Complexity, Security and Civil Society in East Asia presents strategies that can be led by civil society and negotiated by its diplomats to realize peace, security, and sustainability worldwide. It shows that networked civic

diplomacy offers solutions to these urgent issues that official ‘complex diplomacy’ cannot. By providing a new theoretical framework based on empirical observation, this volume is a must read for diplomats, scholars, students, journalists, activists, and individual readers seeking insight into how to solve the crucial issues of our time.

Manual Small Incision Cataract Surgery Bonnie An Henderson,2016-01-11 This book, in a concise format, explains how to perform manual small incision cataract surgery. The procedure is broken down into the chief elements and described in a step by step manner. Besides the description of the procedure, the book covers indications, necessary supplies, preparation, complication management, and postoperative care. The authors are experts from around the world, and the book will be of value both for surgeons new

to this technique and for experienced surgeons who need a review of the procedure. While phacoemulsification surgery has now become the standard of care, understanding how to perform manual extracapsular cataract extractions competently is crucial when faced with complications during phacoemulsification surgery, when operating in a region of the world without access to phacoemulsification or femtosecond lasers, or when a manual approach may be a better choice for the patient.

Metadata and Semantic Research Fabio Sartori, Miguel-Angel Sicilia, Nikos Manouselis, 2009-09-29 This

volume constitutes the selected papers of the third international conference on Metadata and Semantic Research, MTSR 2009, held in Milan, Italy, in September/October 2009. In order to give a novel perspective in which both theoretical and application aspects of metadata research contribute in the growth of the area, this book mirrors the structure of the Congress, grouping the papers into three main categories: 1) theoretical research: results and proposals, 2) applications: case studies and proposals, 3) special track: metadata and semantics for agriculture, food and environment. The book contains 32 full papers (10 for the first category, 10 for the second and 12 for the third), selected from a preliminary initial set of about 70 submissions.

Crop production manual Food and Agriculture Organization of the United Nations,2020-01-28 The states of Pohnpei and Yap in the Federated States of Micronesia currently produce limited amount of food locally. Exporting food is also limited therefore importing substantial quantities of vegetables, fruits and root crops amounts to millions of dollars annually. This is partly owing to a lack of necessary information on crop production locally to assist producers in their production. To help contribute to rectifying this situation, this manual is aimed to provide guidelines for farmers and producers on seedling production and management, plant spacing, cropping program, soil fertility and crop protection.
