The Lands West of the Lakes Stephen C. Druce, 2009-01-01 The period 1200-1600 CE saw a radical transformation from simple chiefdoms to kingdoms (in archaeological terminology, complex chiefdoms) across lowland South Sulawesi, a region that lay outside the 'classical' Indicized parts of Southeast Asia. The rise of these kingdoms was stimulated and economically supported by trade in prestige goods with other parts of island Southeast Asia, yet the development of these kingdoms was determined by indigenous, rather than imported, political and cultural precepts. Starting in the thirteenth century, the region experienced a transition from swidden cultivation to wet-rice agriculture; rice was the major product that the lowland kingdoms of South Sulawesi exchanged with archipelagic traders. Stephen Druce demonstrates this progression to political complexity by combining a range of sources and methods, including oral, textual, archaeological, linguistic and geographical information and analysis as he explores the rise and development of five South Sulawesi kingdoms, known collectively as Ajattappareng (the Lands West of the Lakes). The author also presents an inquiry into oral traditions of a historical nature in South Sulawesi. He examines their functions, their processes of transmission and transformation, their uses in writing history and their relationship to written texts. He shows that any distinction between oral and written traditions of a historical nature is largely irrelevant, and that the South Sulawesi chronicles, which can be found only for a small number of kingdoms, are not characteristic (as historians have argued) but exceptional in the corpus of indigenous South Sulawesi historical sources. The book will be of primary interest to scholars of pre-European-contact Southeast Asia, including historians, archaeologists, anthropologists, linguists and geographers, and scholars with a broader interest in oral tradition and the relationship between the oral and written registers.

Against Expression Craig Dworkin, Kenneth Goldsmith, 2011-01-17 Charles Bernstein has described conceptual poetry pregnant with thought. *Against Expression*, the premier anthology of conceptual writing, presents work that is by turns thoughtful, funny, provocative, and disturbing. Editors Craig Dworkin and Kenneth Goldsmith chart the trajectory of the conceptual aesthetic from early precursors such as Samuel Beckett and Marcel Duchamp through major avant-garde groups of the past century, including Dada, Oulipo, Fluxus, and language poetry, to name just a few. The works of more than a hundred writers from Aasprong to Zykov demonstrate a remarkable variety of new ways of thinking about the nature of texts, information, and art, using found, appropriated, and randomly generated texts to explore the possibilities of non-expressive language. --Book Jacket.

Antarctic Paleobiology Thomas N. Taylor, Edith L. Taylor, 2012-12-06 Antarctic Paleobiology discusses the current status of paleobiology, principally paleobotany and palynology in Antarctica, and the interrelationship of Antarctic floras to those of other Gondwana continents. It provides a broad coverage of the major groups of plants on the one hand, while on the other seeking to evaluate the vegetational history and the physical and biological parameters that influence the distribution of floras through time and space. The biologic activity is discussed within a framework of the geologic history, including the tectonic and paleogeographic history of the region. Finally, the reader will find a comprehensive bibliography of Gondwana paleobotany and palynology.

Fabricating Modern Societies: Education, Bodies, and Minds in the Age of Steel, 2019-09-02 Fabricating Modern Societies: Education, Bodies, and Minds in the Age of Steel, edited by Karin Priem and Frederik Herman, offers new interdisciplinary and transnational perspectives on the history of industrialization and societal transformation in early twentieth-century Luxembourg. The individual chapters focus on how industrialists addressed a large array of challenges related to industrialization, borrowing and mixing ideas originating in domains such as corporate identity formation, mediatization, scientification, technological innovation, mechanization, capitalism, mass production, medicalization, educationalization, artistic production, and social utopia, while competing with other interest groups who pursued their own goals. The book looks at different focus areas of modernity, and analyzes how humans created, mediated, and interacted with the technospheres of modern societies. Contributors: Klaus Dittrich, Irma Hadzalic, Frederik Herman, Enric Novella, Ira Plein, Françoise Poos, Karin Priem, and Angelo Van Gorp.

The Bieberbach Conjecture Sheng Gong, 1999-07-12 In 1919, Bieberbach posed a seemingly simple conjecture. That “simple” conjecture challenged mathematicians in complex analysis for the following 68 years! In that time, a huge number of papers discussing the conjecture and its related problems were inspired. Finally in 1984, de Branges completed the solution. In 1989, Professor Gong wrote and published a short book in Chinese, The Bieberbach Conjecture, outlining the history of the related problems and de Branges’ proof. The present volume is the English translation of that Chinese edition with modifications by the author. In particular, he includes results related to several complex variables. Open problems and a large number of new mathematical results motivated by the Bieberbach conjecture are included. Completion of a standard one-year graduate complex analysis course will prepare the reader for understanding the book. It would make a nice supplementary text for a topics course at the advanced undergraduate or graduate level.
