Liberation Through Education Satish V. Kailas, 2014-02-03 One always wonders why one gets educated? Is it to gain knowledge? Is it to use this knowledge gained? Education should lead to liberation! This book will try and address the issue on how to make education lead to liberation and on how to make your education a much more meaningful and fulfilling experience. This book started off with what could be written on a single slide in a presentation. It grew into a talk I gave on "liberation through education" and the positive feedback I got from this talk, I decided to write this book.

Through this cultural perspective, students learn that audience members are as much a part of the mass communication process as are the media producers, technologies, and industries. Baran was the first university-level text to make media literacy central to its approach.
