International News in the 21st Century Chris Paterson, Annabelle Sreberny, 2004 In the aftermath of September 11, the nature of international

news has resumed a central place in media debates and political analysis. In the first collection of its kind, influential journalists and scholars probe the future of international news. Topics include the conglomerates, ethnocentric imbalances in news reporting, the rise of non-Anglo news channels, approaches for reconstructing the international news agenda, the impacts of new technologies of production and diffusion, international news rhetoric, and audiences' imagination of the global and their perceptions of international news coverage. In a dialogue that is both descriptive and prescriptive, this book begins an encounter between media practitioners, activists, and academics, constituencies that have tended to talk past each other but are now beginning to find some shared concerns.

Government Auditing Standards - 2018 Revision United States Government Accountability Office, 2019-03-24 Audits provide essential accountability and transparency over government programs. Given the current challenges facing governments and their programs, the oversight provided through auditing is more critical than ever. Government auditing provides the objective analysis and information needed to make the decisions necessary to help create a better future. The professional standards presented in this 2018 revision of Government Auditing Standards (known as the Yellow Book) provide a framework for performing high-quality audit work with competence, integrity, objectivity, and independence to provide accountability and to help improve government operations and services. These standards, commonly referred to as

generally accepted government auditing standards (GAGAS), provide the foundation for government auditors to lead by example in the areas of independence, transparency, accountability, and quality through the audit process. This revision contains major changes from, and supersedes, the 2011 revision.
