#### The Regius Poem Or Halliwell Manuscript James

Halliwell,2016-01-11 The Regius Poem, also known as the Halliwell Manuscript, is a long series of rhyming couplets that make up what is thought to be the earliest of the Old Charges of Masonry. It was discovered in the British Museum by James O. Halliwell in 1838. While sometimes thought to have been written during the reign of King Athelstan (924-940 A.D.), the document actually dates to the late 14th century. Whether it is a derivative work based on a separate manuscript from Athelstan's time is unknown. However, the Regius Poem is the cornerstone of the Legend of York, which is important in Masonry even today. This manuscript also outlines how Masons should act toward each other and toward the civil magistrate. It also talks about the history and philosophy of the order of Masons. Any Mason interested in the history of the Art should read this document and see how it compares to the various rules their grand lodges lay out for government of a lodge.

**Consuming Experience** Antonella Caru, Bernard Cova, 2013-01-11 This book covers the 'hot topic' of the experiential consumption in an accessible manner and from a unique industry perspective which is not used in any other book. It highlights the idea that an experience is not something that can be readily managed by firms and is not limited to the market: an individual's daily life is made up of consuming experiences that can occur with or without a market relation. Offering an overview of the consumption experience, it outlines a continuum of experiences of consumption that consumers go through, including: those that are mainly constructed by consumers around small items that comprise their daily life, such as organic products and non-profit or local associations those that

have been co-developed by companies and consumers: tourism or adventure projects, rock concerts and cultural events those that have been largely developed by the companies where consumers are immersed in a hyper-real context such as fashion, sports brands, edutainment and retail. Broad and comprehensive, this book provides a challenging vision of the consumption experience, which is an invaluable tool for all those studying marketing and consumer behaviour.

Emerging Concepts in Urban Space Design Geoffrey Broadbent,2003-09-06 This important work, now available in paperback, from Professor Geoffrey Broadbent, provides a clear analysis of the nature of many of today's design problems, identifying their causes in history and suggesting a basis for co-ordinated solutions. The author discusses 'picturesque' and 'formal' tendencies in modern architecture, relating them to parallels between philosophic thought and design theory through the ages. Using a wealth of international examples from around the world including America, UK, Italy, Germany and France and with over 250 photographs and illustrations, Emerging Concepts in Space Design offers a fascinating insight into the history and likely future directions of urban design.

*Clinical and Experimental Restricted Environmental Stimulation* Arreed F. Barabasz, Marianne

Barabasz, 2012-12-06 A dozen years ago, Peter Suedfeld introduced the world to the term REST' to describe the modern technique or therapy involving Restricted Environmental Stimulation. At the time, REST was still equated with sensory deprivation. Textbooks in psychology and psychiatry cited primarily the work of the 1950s and 60s which suggested that reduction of normal levels of stimulation was, in a sense, a form of torture producing severe psychological disturbances and subjugation of the hapless participant to the whims of an experimenter working in the service of a sinister government. In contrast to this perception, other psychologists and psychiatrists held the unsubstantiated belief that apparent REST effects were merely the result of awe inspiring experimental settings and subject expectancies. Suedfeld was not persuaded by either of these unscientific positions. He (Suedfeld, 1980) argued that REST, when stripped of anxiety producing melodrama, was simply a powerful way to positively alter a variety of psychological and behavioral processes. Research continued. More and more data were published and presented. Research scientists and clinicians began to correct misconceptions. The First International Conference on REST was held in 1983 and IRIS, the International REST Investigators Society, was founded that same year. REST has outlived misconstrued perceptions. The beneficial effects of the technique are now recognized in the majority of scientific texts.
