📖 **When I Fell From the Sky** Juliane Koepcke, 2012-03-22 On Christmas Eve 1971, the packed LANSA flight 508 from Lima to Pucallpa was struck by lightning and went down in dense jungle hundreds of miles from civilization. Of its 93 passengers, only one survived. Juliane Koepcke, the seventeen-year-old child of famous German zoologists. She'd been thrown from the plane two miles above the forest canopy, but had sustained only a broken collarbone and a cut on her leg. With incredible courage, instinct and ingenuity, she survived three weeks in the green hell of the Amazon - using the skills she'd learned in assisting her parents on their research trips into the jungle - before coming across a loggers hut, and, with it, safety. Now she tells her fascinating story for the first time, and in doing so tells us about her 'Gerald Durrell' childhood - with a menagerie of wild, exotic and sometimes dangerous pets - about how she learned to survive at her parents ecological station deep in the rainforest and about her present-day commitment to this wildlife as a biologist and dedicated environmentalist.

📖 **The Order of Time** Carlo Rovelli, 2018-05-08 One of TIME's Ten Best Nonfiction Books of the Decade Meet the new Stephen Hawking . . . The Order of Time is a dazzling book. --The Sunday Times From the bestselling author of Seven Brief Lessons on Physics, Reality Is Not What It Seems, and Helgoland, comes a concise, elegant exploration of time. Why do we remember the past and not the future? What does it mean for time to flow? Do we exist in time or does time exist in us? In lyric, accessible prose, Carlo Rovelli invites us to consider questions about the nature of time that continue to puzzle physicists and philosophers alike. For most readers this is unfamiliar terrain. We all experience time, but the more scientists learn about it, the more mysterious it remains. We think of it as uniform and universal, moving steadily from past to future, measured by clocks. Rovelli tears down these assumptions one by one, revealing a strange universe where at the most fundamental level time disappears. He explains how the theory of quantum gravity attempts to understand and give meaning to the resulting extreme landscape of this timeless world. Weaving together ideas from philosophy, science and literature, he suggests that our perception of the flow of time depends on our perspective, better understood starting from the structure of our brain and emotions than from the physical universe. Already a bestseller in Italy, and written with the poetic vitality that made Seven Brief Lessons on Physics so appealing, The Order of Time offers a profoundly intelligent, culturally rich, novel appreciation of the mysteries of time.

📖 **Expedition 196** Cassie de Pecol, 2018-07-30 A memoir of Cassie's life leading up to, and during her Expedition around the world. At age twenty-seven, Cassie De Pecol accomplished something remarkable. She became the first woman on record to travel to every country on Earth, and did it faster than anyone in history, male or female. She was inspired by her experiences on the Discovery Channel's Naked and Afraid both the three weeks she spent in the Panamanian wilderness and the cyberbullying she endured after the show. And it opened her eyes to the need for women to make a difference in the world. In Expedition 196, Cassie shares the secrets behind her personal triumphs and miraculous achievements. It's the story of a dreamer and a doer who went from restless college dropout to fearless adventurer to philanthropist and humanitarian activist dedicated to female empowerment and global sustainability. Thrilling, inspiring, and unforgettable, Expedition 196 views the world through the eyes of one extraordinary young woman whose heart took her farther than most people can even imagine.

📖 **Vogue**, 1952

📖 **The Incomplete Framley Examiner** The Editors, 2021-10-14 In 2001, fans of the internet were introduced to scanned pages from spoof local newspaper The Framley Examiner. Packed with humdrum and preposterous news stories, classified ads, local business features and headlines that seemed to have been typed while asleep, it skewered the banal madness of small-town existence, perfectly encapsulating the British national character. Framley's strange yet familiar community - stuffed with its own cast, insane geography and rich local history - struck a chord with those who recognised their own home towns in its reflection. The website was loved and shared by an eager public as well as famous fans from Little Britain, The Simpsons and the Cambridge Centre for Theoretical Cosmology (Professor Stephen Hawking was a Framley enthusiast). Marking the twentieth anniversary of the website's first appearance The Incomplete Framley Examiner combines the pages of the original book, published in 2002, with all the pages published online in the years since and brand new material for a bigger, more luxurious, toilet-proof compendium for the annals of history.

📖 **The Secret** Byron Preiss, 2016-10-05 The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels, are buried. The key to finding each can be found within the twelve full color paintings and verses of The Secret. Yet The Secret is much more than that. At long last, you can learn not only the whereabouts of the Fair People's treasure, but also the modern forms and hiding places of their descendants: the Toll Trolls, Maitre D'eamons, Elf Alphas, Tupperwerewolves, Freudian Sylphs, Culture Vultures, West Ghosts and other delightful creatures in the world around us. The Secret is a field guide to them all. Many armchair treasure hunt books have been published over the years, most notably Masquerade (1979) by British artist Kit Williams. Masquerade promised a jewel-encrusted golden hare to the first person to unravel the riddle that Williams cleverly hid in his art. In 1982, while everyone in Britain was still madly digging up hedgerows and pastures in search of the golden hare, The Secret: A Treasure Hunt was published in America. The previous year, author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum. Preiss was killed in an auto accident in the summer of 2005, but the hunt for his casques continues.

📖 **Balloonomania Belles** Sharon Wright, 2018-03-31 Award-winning journalist Sharon Wright presents a fascinating account of the fabulous eighteenth and nineteenth-century female pioneers of balloon flight. More than a century before the first airplane took flight, women were heading for the heavens in crazy, inspired contraptions that brought both danger and glory. Women were in the vanguard of the “balloonomania” craze that took hold in the eighteenth and nineteenth centuries, sweeping across Europe and then the world. Their exploits were a vital element of our first voyages into the sky. In a time when women's lives were often severely limited by law and convention, these intrepid pioneers took on an exhilarating quest for spectacle, adventure, and danger. From the perilous ascent in 1784 by feisty French teenager Elisabeth Thible, female aeronauts have never looked back . . . or down. But who were these brave women who fearlessly—and scandalously—took to the air? In Balloonomania Belles, journalist Sharon Wright reveals the hair-raising adventures of the first flying women in a book that celebrates the brightest stars of an extraordinary era in human achievement.

📖 **Air Time** Mark Bernardo, 2021-07-06 The first comprehensive reference for watch connoisseurs to explore a century of stylish timepieces inspired by and built for aviation, aeronautics and space exploration, and piloting. Air Time takes a keen look at more than ninety iconic timepieces that embody the spirit of flight, worn and made famous by the men and women who pioneered it, from daring balloonists and wartime jet pilots to jet-setters and astronauts. In a thoroughgoing look at nearly a century of aviation-inspired timepieces--from 1904 to the present day-- WatchTime's Mark Bernardo interweaves history, technical insight, and the distinctive style of pilot watches into a first-of-its-kind comprehensive monograph. Chapters showcase historical milestones such as Cartier's development of the first men's wristwatch for Alberto Santos-Dumont; Charles Lindbergh's invention of the Longines Hour Angle; and the Omega Speedmaster, the first watch to land on the moon. Also featured are iconic timepieces, including the Breitling Navitimer, IWC Big Pilot's Watch, Breguet Type XX, and Rolex GMT-Master, up through current category timepieces such as in the collections of Bell & Ross, Longines, Bremont, Patek Philippe, Hamilton, and Zenith. Informative and compelling, this fascinating guide is the perfect gift for connoisseurs of timepieces, aviation, and globetrotting travel.

📖 **Rocketeers and Gentlemen Engineers** Tom D. Crouch, 2006 Commissioned on the occasion of its 75th anniversary, here is the fascinating historical account of the American Institute of Aeronautics and Astronautics -- and its predecessor organizations, the American Rocket Society and The Institute of the Aeronautical Sciences -- and the significant contributions each has made to the evolution of flight. From the early struggles to create and distinguish aeronautics as a distinct profession, through the technological necessities brought on by two world wars, to the incredible advances spawned by the Space Age, this narrative covers it all in a highly readable, thoroughly researched way. Reading like an aeronautical and astronautical whos who, it is also the amazing story of the organizations founders, leaders and members -- visionary individuals and dedicated engineers advancing theories and technologies in a profession that has forever changed society and shaped everyday life as we know it.

EXPLORING THE NATURE OF LOSS AND MEMORY. FOLLOWING HER CELEBRATED MASTERPIECE *Mrs. Dalloway*, Virginia Woolf continues to develop her groundbreaking stream-of-consciousness technique in *To the Lighthouse*. Every summer, the Ramsey family returns to the Isle of Skye for a tranquil holiday, where the imposing lighthouse seems to promise everlasting constancy. But as their idyllic holiday confronts the realities of World War I, the Ramseys must also face the inescapable nature of change. A profound evocation of marriage, parenthood, aging, and grief, *To the Lighthouse* is regarded as one of the greatest novels of the twentieth century.

📖 **The Kite Runner** Khaled Hosseini, 2007 Traces the unlikely friendship of a wealthy Afghan youth and a servant’s son in a tale that spans the final days of Afghanistan’s monarchy through the atrocities of the present day.

📖 **A Stolen Life** Jaycee Dugard, 2011-07-12 A raw and powerful memoir of Jaycee Lee Dugard’s own story of being kidnapped as an 11-year-old and held captive for over 18 years On 10 June 1991, eleven-year-old Jaycee Dugard was abducted from a school bus stop within sight of her home in Tahoe, California. It was the last her family and friends saw of her for over eighteen years. On 26 August 2009, Dugard, her daughters, and Phillip Craig Garrido appeared in the office of her kidnapper’s parole officer in California. Their unusual behaviour sparked an investigation that led to the positive identification of Jaycee Lee Dugard, living in a tent behind Garrido’s home. During her time in captivity, at the age of fourteen and seventeen, she gave birth to two daughters, both fathered by Garrido. Dugard’s memoir is written by the 30-year-old herself and covers the period from the time of her abduction in 1991 up until the present. In her stark, utterly honest and unflinching narrative, Jaycee opens up about what she experienced, including how she feels now, a year after being found. Garrido and his wife Nancy have since pleaded guilty to their crimes.

📖 **The Mercury 13** Martha Ackmann, 2004-07-13 For readers of *The Astronaut Wives Club*, *The Mercury 13* reveals the little-known true story of the remarkable women who trained for NASA space flight. In 1961, just as NASA launched its first man into space, a group of women underwent secret testing in the hopes of becoming America’s first female astronauts. They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts, but they were summarily dismissed by the boys’ club at NASA and on Capitol Hill. The USSR sent its first woman into space in 1963; the United States did not follow suit for another twenty years. For the first time, Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women, all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America’s space race against the Soviet Union. In addition to talking extensively to these women, Ackmann interviewed Chuck Yeager, John Glenn, Scott Carpenter, and others at NASA and in the White House with firsthand knowledge of the program, and includes here never-before-seen photographs of the Mercury 13 passing their Lovelace tests. Despite the crushing disappointment of watching their dreams being derailed, the Mercury 13 went on to extraordinary achievement in their lives: Jerrie Cobb, who began flying when she was so small she had to sit on pillows to see out of the cockpit, dedicated her life to flying solo missions to the Amazon rain forest; Wally Funk, who talked her way into the Lovelace trials, went on to become one of the first female FAA investigators; Janey Hart, mother of eight and, at age forty, the oldest astronaut candidate, had the political savvy to steer the women through congressional hearings and later helped found the National Organization for Women. A provocative tribute to these extraordinary women, *The Mercury 13* is an unforgettable story of determination, resilience, and inextinguishable hope.
