VLSI Micro- and Nanophotonics El-Hang Lee, Louay A. Eldada, Manijeh Razeghi, Chennupati Jagadish, 2018-09-03 Addressing the growing demand for larger capacity in information technology, VLSI Micro- and Nanophotonics: Science, Technology, and Applications explores issues of science and technology of micro/nano-scale photonics and integration for broad-scale and chip-scale Very Large Scale Integration photonics. This book is a game-changer in the sense that it is quite possibly the first to focus on VLSI Photonics. Very little effort has been made to develop integration technologies for micro/nanoscale photonic devices and applications, so this reference is an important and necessary early-stage perspective on this field. New demand for VLSI photonics brings into play various technological and scientific issues, as well as evolutionary and revolutionary challenges—all of which are discussed in this book. These include topics such as miniaturization, interconnection, and integration of photonic devices at micron, submicron, and nanometer scales. With its disruptive creativity and unparalleled coverage of the photonics revolution in information technology, this book should greatly impact the future of micro/nano-photonics and IT as a whole. It offers a comprehensive overview of the science and engineering of micro/nanophotonics and photonic integration. Many books on micro/nanophotonics focus on understanding the properties of individual devices and their related characteristics. However, this book offers a full perspective from the point of view of integration, covering all aspects of benefits and advantages of VLSI-scale photonic integration—the key technical concept in developing a platform to make individual devices and components useful and

practical for various applications.

Desert Island Discs: 70 Years of Castaways Sean Magee, 2012-09-13 'For seventy years now Desert Island Discs has managed that rare feat – to be both enduring and relevant. By casting away the biggest names of the day in science, business, politics, showbiz, sport and the arts, it presents a cross-sectional snapshot of the times in which we live. As the decades have passed, the programme has kept pace; never frozen in time yet always, somehow, comfortingly the same.' Kirsty Young BBC Radio 4's Desert Island Discs celebrates its seventieth birthday in 2012. Since the programme's deviser Roy Plomley interviewed comedian Vic Oliver in January 1942, nearly 3,000 distinguished people from all walks of life have been stranded on the mythical island, accompanied by only eight records, one book and a luxury. Here the story of one of BBC Radio 4's favourite programmes is chronicled through a special selection of castaways. Roy Plomley, inventor of the programme as well as its presenter for over forty years, quizzes the young Cliff Richard about 'these rather frenzied movements' the 1960s pop sensation makes on the stage. Robert Maxwell tells Plomley's successor Michael Parkinson that 'I will have left the world a slightly better place by having lived in it.' Diana Mosley assures Sue Lawley that Adolf Hitler was 'extraordinarily fascinating' and had mesmeric blue eyes. And Johnny Vegas tugs Kirsty Young's heart-strings with his account of a childhood so impoverished that family pets were fair game: 'My dad had always claimed that rabbits were livestock, but we'd never eaten one before.' Desert Island Discs is much more than a radio programme. It is a unique and enduringly popular take on our lives and times – and this extensively illustrated book tells in rich detail the colourful and absorbing story of an extraordinary institution.
