*Slow Motion* Dani Shapiro,2012-09-05 From one of the most gifted writers of her generation comes the harrowing and exquisitely written true story of how a family tragedy saved her life. Dani Shapiro was a young girl from a deeply religious home who became the girlfriend of a famous and flamboyant married attorney—her best friend's stepfather. The moment Lenny Klein entered her life, everything changed: she dropped out of college, began to drink heavily, and became estranged from her family and friends. But then the phone call came. There had been an accident on a snowy road near her family's home in New Jersey, and both her parents lay hospitalized in critical condition. This haunting memoir traces her journey back into the world she had left behind. At a time when she was barely able to take care of herself, she was faced with the terrifying task of taking care of two people who needed her desperately. Dani Shapiro charts a riveting emotional course as she retraces her isolated, overprotected Orthodox Jewish childhood in an anti-Semitic suburb, and draws the connections between that childhood and her inevitable rebellion and self-destructiveness. She tells of a life nearly ruined by the gift of beauty, and then saved by the worst thing imaginable. This is a beautiful and unforgettable memoir of a life utterly transformed by tragedy.

*Slow Motion* Andie Miller,2010 Slow Motion is a collection of non-fiction stories (essays and interviews) about walking. The collection has been written over a period of six years and so the book has become something of a documentary project, witnessing transformation in South Africa through the eyes of pedestrians across the economic, racial and age spectrum. The book could be described as documenting recent history. Though it inevitably looks at the issue of crime, and how we have moved from a race-based to a class-based society and pedestrians of all colours continue to be marginalised and thought of as second-class citizens in an increasingly autocratic society, it is essentially an optimistic book. It tells the stories of South Africans (and visitors) who have chosen to 'reclaim the streets' from predators and traffic. While the focus is primarily on Johannesburg, several of the stories are about Cape Town, contrasting the experience of walking in these two cities. Other international cities such as Los Angeles, Paris, London and Mumbai are also visited along the way. The style of the book is such that, while it can be opened anywhere and each story can be read and enjoyed on its own (a bedside-table book), the stories are interlinked, as people's paths inevitably cross. There is a bigger story at play as well. The band of pedestrians includes writers, artists, political activists, disabled people, dogs and their owners, Walk for Life members, Jews on the Sabbath, domestic workers, refugees, babies learning to walk, and even a golfer and a caddie. The purpose of the book is both to entertain and inform readers--Publisher's website.

India In Slow Motion Mark Tully,2017-11-22 Mark Tully is incomparable. No foreign commentator has a greater understanding of the passions, the contradictions, the charms and the resilience that constitute India. In India in Slow Motion, Tully and his colleague Gillian Wright delve further than ever before into this nation of over one billion people, attempting to unravel a culture that, famously, has always resisted unravelling. India in Slow Motion is the account of a journey that for Tully and Wright has no true beginning or end. Covering a diverse range of subjects-from Hindu extremism to child labour, Sufi mysticism to the crisis in agriculture, the persistence of political corruption to the problem of Kashmir-this book challenges the preconceptions others have about India, as well as those India has about itself. India is often depicted as a victim of forces too wild to be controlled-of post-colonial malaise, of religious strife, of the caste system, of a corrupt bureaucratic machine. India in Slow Motion refutes this, probing into the heart of the Indian experience and arguing that change is possible and that solutions do exist. In the process it brings the country and its people brilliantly alive.

**The Creed in Slow Motion** Martin Kochanski,2022-06-30 I believe in one God, the Father almighty, maker of heaven and earth... The Creed is the bones of our faith. In all our different ways, it makes us who we are. But when we stand up and recite the Creed in unison, we have no time to contemplate what it is that we are committing ourselves to. The words rush past, their meaning blurred by familiarity. If we could only slow them down and hear them properly, they would have the power to change worlds. That is what The Creed in Slow Motion aims to do. This is a book for people who like to think things through from first principles. It will not tell you what to believe. (It is for you to engage your mind and discover that for yourself. And for unbelievers to learn what exactly they disbelieve, and why.) In forty short chapters, with clarity and wit, The Creed in Slow Motion draws examples from real-life stories, history and even science to uncover the core claims of Christianity. By turns it is deep, heartening, startling, revolutionary and even, by the world's standards, outrageous.

**Virtual Nonlinear Multibody Systems** Werner Schiehlen,Michael Valásek,2003-06-30 This book contains an edited versIOn of lectures presented at the NATO ADVANCED STUDY INSTITUTE on VIRTUAL NONLINEAR MUL TIBODY SYSTEMS which was held in Prague, Czech Republic, from 23 June to 3 July 2002. It was organized by the Department of Mechanics, Faculty of Mechanical Engineering, Czech Technical University in Prague, in cooperation with the Institute B of Mechanics, University of Stuttgart, Germany. The ADVANCED STUDY INSTITUTE addressed the state of the art in multibody dynamics placing special emphasis on nonlinear systems, virtual reality, and control design as required in mechatronics and its corresponding applications. Eighty-six participants from twenty-two countries representing academia, industry, government and research institutions attended the meeting. The high qualification of the participants contributed greatly to the success of the ADVANCED STUDY INSTITUTE in that it promoted the exchange of experience between leading scientists and young scholars, and encouraged discussions to generate new ideas and to define directions of research and future developments. The full program of the ADVANCED STUDY INSTITUTE included also contributed presentations made by participants where different topics were explored, among them: Such topics include: nonholonomic systems; flexible multibody systems; contact, impact and collision; numerical methods of differential-algebraical equations; simulation approaches; virtual modelling; mechatronic design; control; biomechanics; space structures and vehicle dynamics. These presentations have been reviewed and a selection will be published in this volume, and in special issues of the journals Multibody System Dynamics and Mechanics of Structures and Machines.
