World Economic Outlook, April 2009 International Monetary Fund. Research Dept., 2009-04-22 This edition of the World Economic Outlook explores how a dramatic escalation of the financial crisis in September 2008 provoked an unprecedented contraction of activity and trade, despite active policy responses. It presents economic projections for 2009 and 2010, and also looks beyond the current crisis, considering factors that will shape the landscape of the global economy over the medium term, as businesses and households seek to repair the damage. The analysis also outlines the difficult policy challenges presented by the overwhelming imperative to take all steps necessary to restore financial stability and revive the global economy, and the longer-run need for national actions to be mutually supporting. The first of two analytical chapters, What Kind of Economic Recovery? explores the shape of the eventual recovery. The second, The Transmission of Financial Stress from Advanced to Emerging and Developing Economies, focuses on the role of external financial linkages and financial stress in transmitting economic shocks.

World Economic Outlook, April 2008 International Monetary Fund. Research Dept., 2008-04-09 The global expansion is losing speed in the face of a major financial crisis. The slowdown has been greatest in the advanced economies, particularly in the United States, where the housing market correction continues to exacerbate financial stress. The emerging and developing economies have so far been less affected by financial market developments and have continued to grow at a rapid pace, led by China and India, although activity is beginning to slow in some countries. At the same time, headline inflation has increased around the world, boosted by the continuing buoyancy of food and energy prices. Policymakers around the world are facing a diverse and fast-moving set of challenges, and although each country's circumstances differ, in an increasingly multipolar world it will be essential to meet these challenges broadly, taking full account of cross-border interactions. The World Economic Outlook (WEO) presents the IMF staff's analysis and projections of economic developments at the global level, in major country groups (classified by region, stage of development, etc.), and in many individual countries. It focuses on major economic policy issues as well as on the analysis of economic developments and prospects. It is usually prepared twice a year, as documentation for meetings of the International Monetary and Financial Committee, and forms the main instrument of the IMF's global surveillance activities.

African Economic Outlook 2009 OECD Publishing, Organisation for Economic Co-operation and Development (OECD) Staff, 2009-12 The African Economic Outlook 2009 reviews the recent economic situation and predicts the short-term evolution of 47 African countries which account for 99% of the continent's economic output and 97% of its population. The Outlook is drawn from a country-by-country analysis based on a unique analytical design. This common framework includes a forecasting exercise for the current and the two following years, using a simple macroeconomic model, together with an analysis of the social and political context. This Overview contains a comparative synthesis of African country prospects, placing the evolution of African economies in the world economic context. It also includes a section on innovation and information and communication technologies (ICTs) in Africa, presenting a comprehensive review of their proliferation and use on the African continent, as well as a statistical annex. A URL is provided for linking to the full-length country notes.

Regional Economic Outlook, October 2011, Europe International Monetary Fund. European Dept., 2011-10-05 Following a strong showing in early 2011, the economies across Europe now face the prospect of a pronounced slowdown, as global growth has softened, risk aversion has risen, and strains in Europe's sovereign debt and financial markets have deepened, according to this issue of the Regional Economic Outlook for Europe. Downside risks are significant, and a further deepening of the euro area crisis would affect not only advanced Europe, but also emerging Europe, given its tight economic and financial ties. The policy stance in advanced Europe will need to be adapted to reflect the weakening and tense outlook, financial systems strengthened further, and a consistent, cohesive and cooperative approach to monetary union adopted by all euro area stakeholders. The cross-country experience in the past decade in Europe shows the difference that good policies can make in boosting growth, with some European countries having grown rapidly while others have stagnated. Escaping low-growth traps, through broad-based reforms that address macroeconomic imbalances and country-specific structural rigidities, is possible.
