Heterotopia and the City Michiel Dehaene, Lieven De Cauter, 2008-05-15 Heterotopia, literally meaning 'other place', is a rich concept in urban design that describes a space that is on the margins of ordered or civil society, and one that possesses multiple, fragmented or even incompatible meanings. The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since. *Heterotopia and the City* seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world: in museums, theme parks, malls, holiday resorts, gated communities, wellness hotels and festival markets. With theoretical contributions on the concept of heterotopia, including a new translation of Foucault's influential 1967 text, *Of Other Space* and essays by well-known scholars, the book comprises a series of critical case studies, from Beaubourg to Bilbao, which probe a range of (post)urban transformations and which redirect the debate on the privatization of public space. Wastelands and terrains vagues are studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized, postcivil condition through case studies on Jakarta, Dubai, and Kinshasa. *Heterotopia and the City* provides a collective effort to reposition heterotopia as a crucial concept for contemporary urban theory. The book will be of interest to all those

wishing to understand the city in the emerging postcivil society and post-historical era. Planners, architects, cultural theorists, urbanists and academics will find this a valuable contribution to current critical argument.

Trap Door Reina Gossett, Eric A. Stanley, Johanna Burton, 2017-12-15 Essays, conversations, and archival investigations explore the paradoxes, limitations, and social ramifications of trans representation within contemporary culture. The increasing representation of trans identity throughout art and popular culture in recent years has been nothing if not paradoxical. Trans visibility is touted as a sign of a liberal society, but it has coincided with a political moment marked both by heightened violence against trans people (especially trans women of color) and by the suppression of trans rights under civil law. *Trap Door* grapples with these contradictions. The essays, conversations, and dossiers gathered here delve into themes as wide-ranging yet interconnected as beauty, performativity, activism, and police brutality. Collectively, they attest to how trans people are frequently offered “doors”—entrances to visibility and recognition—that are actually “traps,” accommodating trans bodies and communities only insofar as they cooperate with dominant norms. The volume speculates about a third term, perhaps uniquely suited for our time: the trapdoor, neither entrance nor exit, but a secret passageway leading elsewhere. *Trap Door* begins a conversation that extends through and beyond trans culture, showing how these issues have relevance for anyone invested in the ethics of visual culture. Regulating Telecommunications in South Africa Charley Lewis, 2020-06-10 This book provides the first full account of the 20-year story of universal access and service in South Africa's ICT sector. From 1994 the country's first democratic government set out to redress the deep digital divide afflicting the overwhelming majority of its citizens, already poor and disenfranchised, but likewise marginalised in access to telephone infrastructure and services. By this time, an incipient global policy regime was driving reforms in the

telecomms sector, and also developing good practice models for universal service. Policy diffusion thus led South Africa to adopt, adapt and implement a slew of these interventions. In particular, roll-out obligations were imposed on licensees, and a universal service fund was established. But an agency with a universal service mandate was also created; and licences in under-serviced areas were awarded. The book goes on to identify and analyse the policy success and failure of each of these interventions, and suggests some lessons to be learned.

Persuasion in Advertising John O'Shaughnessy, Nicholas J. O'Shaughnessy, 2004
Effective advertising is, almost always, persuasive advertising, and while not all advertising seeks to persuade, in a competitive situation those who best persuade are those most likely to win. This exciting new book seeks to explain the precise ways in which advertising successfully persuades consumers, setting out the strategies for advertisers to adopt and illustrating the theories at work. Offering not only a conceptual and theoretical grounding in persuasive techniques, this book also provides concrete empirical research that is uniquely incorporated into a marketing textbook format. The authors cover topics including: difficulties of persuasion, rationality and emotion in persuasion, positive reinforcement techniques and cognitive approaches to persuasion. To illuminate these theories, the authors include original case-studies on campaigns as diverse as Death Cigarettes, Mecca Cola, The Oxo Family and Renault Clio, as well as recent advertisements from BMW, McDonalds, Omega and Silk Cut. A genuinely fresh text on the art of persuasion in advertising, this book is essential reading for all marketing students and academics.

Furthermore, international examples are also included to further explore the psychologist's perspective of health issues around the world and highlight what works in the field. Global Media Discourse David Machin, Theo Van Leeuwen, 2007-05-17 Featuring a wide range of exercises, examples, and images, this textbook provides a practical way of analyzing the discourses of the global media industries. Building on a comprehensive introduction to the history and theory of global media communication, specific case studies of lifestyle and entertainment media are explored with examples from films, global women's magazines, Vietnamese news reporting and computer war games. Finally, this book investigates how global media communication is produced, looking at the formats, languages and images used in creating media materials, both globally and in localized forms. At a time when the media is becoming increasingly global, often with the same films, news and television programmes shown all over the world; Global Media Discourse provides an accessible, lively introduction into how globalization is changing the language and communicative practices of the media. Integrating a range of approaches, including political economy, discourse analysis and ethnography, this book will be of particular interest to students of media and communication studies, applied linguistics, and (critical) discourse analysis.

China's Outbound Tourism Wolfgang Arlt, 2006-09-27 The People's Republic of China has changed from a country which actively discouraged tourism into one of the major source markets for the international industry; the 35 million Chinese travelling across the border in 2005 are merely the tip of the iceberg. China's Outbound Tourism is the first book on this major development and has been written using a multitude of sources from China and around the world. The topic is approached from many angles, using methods from the fields of economics, political sciences, sociology and cross-cultural studies. The book explains the economic and social background of the surge in tourism and the changes in policy in the country since 1949, when it moved from prevention through controlled development to encouragement of outbound travels. Throughout the book, facts and figures are given for the global development as well as in-depth information about China's key destinations. The growing importance of tourists from China is however not

just a question of quantity; the text explains the features which distinguish their travel motivations and behaviours from 'western' and Japanese tourists, and the consequences for product adaptation and marketing methods for destinations interested in attracting and satisfying Chinese tourists. Arlt's groundbreaking book cannot be ignored by professionals, academics and students of tourism and leisure; it offers fresh insight into the topic and indicates some of the future lines of development in this area.

Mobile Technologies of the City Mimi Sheller, John Urry, 2006-04-18 Mobile communications technologies are taking off across the world, while urban transportation and surveillance systems are also being rebuilt and updated. Emergent practices of physical, informational and communicational mobility are reconfiguring patterns of movement, co-presence, social exclusion and security across many urban contexts. This book brings together a carefully selected group of innovative case studies of these mobile technologies of the city, tracing the emergence of both new socio-technical practices of the city and of a new theoretical paradigm for mobilities research.

Policy Uncertainty in Japan Ms. Elif C Arbatli, Steven J Davis, Arata Ito, Naoko Miake, Ikuo Saito, 2017-05-30 We develop new economic policy uncertainty (EPU) indices for Japan from January 1987 onwards building on the approach of Baker, Bloom and Davis (2016). Each index reflects the frequency of newspaper articles that contain certain terms pertaining to the economy, policy matters and uncertainty. Our overall EPU index co-varies positively with implied volatilities for Japanese equities, exchange rates and interest rates and with a survey-based measure of political uncertainty. The EPU index rises around contested national elections and major leadership transitions in Japan, during the

Asian Financial Crisis and in reaction to the Lehman Brothers failure, U.S. debt downgrade in 2011, Brexit referendum, and Japan's recent decision to defer a consumption tax hike. Our uncertainty indices for fiscal, monetary, trade and exchange rate policy co-vary positively but also display distinct dynamics. VAR models imply that upward EPU innovations foreshadow deteriorations in Japan's macroeconomic performance, as reflected by impulse response functions for investment, employment and output. Our study adds to evidence that credible policy plans and strong policy frameworks can favorably influence macroeconomic performance by, in part, reducing policy uncertainty.
