Women's Influence on Classical Civilization Eireann Marshall, Fiona Mchardy, 2004-07-31 Written by an international range of renowned academics, this volume explores how women in antiquity influenced aspects of culture normally thought of as male. Looking at politics, economics, science, law and the arts, the contributors examine examples from around the ancient world asking how far traditional definitions of culture describe male spheres of activity, and examining to what extent these spheres were actually created and perpetuated by women. *Women's Influence of Classical Civilization* provides students with a valuable wider perspective on the roles and influence of women in the societies of the Greek and Roman worlds.

E-Business Fundamentals Peter Eckersley, Lisa Harris, Paul Jackson, 2003-05-29 This comprehensive textbook considers all of the key business, management and technical issues of e-Business, examining and explaining how technologies can help organizations in both the public and private sectors conduct business in new ways. After addressing the changing nature of the e-Economy and the impact of the dot.com 'bubble' of the late 1990s, Eckersley, Harris and Jackson go on to analyse key software developments and the impact these have had on organizational practices. They

then outline the legal and ethical frameworks of e-Business, and consider how companies use various e-commerce tools to enter new markets. Finally, they trace the progress public sector organizations have made in adopting e-Business practice. This is an accessible, jargon-free and focused textbook that offers readers both a technical and managerial overview of the issues surrounding e-Business. It uses illustrative cases and discussion questions to help students and managers in organizations not only to familiarize themselves with e-Business but also to equip themselves with the skills to challenge and analyze the changing business environment.

Consuming Books Stephen Brown, 2006-04-18 The buying, selling, and writing of books is a colossal industry in which marketing looms large, yet there are very few books which deal with book marketing (how-to texts excepted) and fewer still on book consumption. This innovative text not only rectifies this, but also argues that far from being detached, the book business in fact epitomises today's Entertainment Economy (fast moving, hit driven, intense competition, rapid technological change, etc.). Written by an impressive roster of renowned marketing authorities, many with experience of the book trade and all gifted writers in their own right, *Consuming Books* steps back from the practicalities of book marketing and takes a look at the industry from a broader consumer research perspective. Consisting of sixteen chapters, divided into four loose sections, this key text covers: * a historical overview * the often acrimonious marketing/literature interface * the consumers of books (from book groups to bookcrossing) * a consideration of the tensions that both literary types and marketers feel. With something for everyone, *Consuming Books* not only complements the 'how-to' genre but provides the depth that previous studies of book consumption conspicuously lack.

Making Change in Complex Organizations George K. Strodtbeck, 2016-04-14 This book is written for the leader or management team of any complex organization attempting to lead an organization-wide change. Successfully leading change has never been easy. Many realities of life in the 21st century have combined to intensify the challenge. This book captures the lessons learned during more than 43 years of experience working in complex, large-scale organizations, 14 years between West Point and the United States Army and more than 29 years in two large, very different American companies. These lessons learned are shared in the hope that it will help others lead change successfully and avoid at least some of the pitfalls that come with it. The principles and questions in this book also benefit leaders making changes in the small organization or those who desire to transform their small organization into a large one. This book is intended to serve as a leaders' guide of things to think about and how to plan for successful change. Many books have been written about management and leadership, as well as the dos and must-dos of leading an

organization. But few books discuss what it takes to make changes in today's complex organizations, and those that do are often written by consultants who have not practiced what they propose over any significant period of time. This book, by contrast, draws lessons from a successful long-term change made by leaders who had a personal and financial stake in the organization's success and saw the change all the way through. In my 40 years at Cummins one of the most successful changes made was our adoption of Six Sigma. When I became CEO it was clear that we needed to improve our product and overall business performance. We chose Six Sigma to help us do that. George's book concisely captures many of the things we had to think about when implementing Six Sigma throughout the company. I believe this is a good guide for any leader contemplating making an organization-wide change. Tim Solso former CEO Cummins, Inc. As CEO I have discovered that just saying I want something done doesn't make it happen. Change done well is hard work. George's book is a practical go-to guide for driving lasting change. Tom Linebarger CEO Cummins, Inc. In medicine today ever-higher quality has become an expectation. This expectation is causing us increasingly to transition from volume-based to value-based medicine. As an industry we are quickly adapting to this new value-based world. However, organizations don't transform easily. It requires dedicated and engaged teams to be leaders of change in their industry. I have been waiting for a book like this for years...whether you are a medical student or a senior attending physician...George Strodbeck's book on Making Change is a must read!!! James Grant, M.D. Chair, Department of Anesthesiology Beaumont Health System, Royal Oak, Michigan George Strodbeck draws on more than three decades of personal experience in planning and executing change in complex organizations. His incisive, fast-paced writing explains, engages and motivates. His guidance is candid about challenges faced but simultaneously practical and actionable in today's organizations. This book is for any leader seeking to accelerate the pace of change, improvement and innovation in their organizations. Mohan V. Tatikonda, PhD Professor of Operations Management Kelley School of Business, Indiana University

Systematic and progressive, it introduces the key approaches and shows how they relate to the understanding, study and practice of spirituality. Covering a vast amount of ground - from traditional themes such as images of God, spiritual direction and pilgrimage to more contemporary issues, such as place and space, cyberspace and postcolonialism - the author takes an ecumenical, inclusive stance, allowing the book to be used in a wide variety of courses and across denominations.

E-Retailing Eleonora Pantano, Bang Nguyen, Charles Dennis, Sabine Gerlach, Bill Merrilees, 2004-08-26 Most experts agree that the advent of internet retailing has transformed the marketplace, but until now students of the subject have had to search far and wide for comprehensive up-to-date analyses of the new business landscape. Coverage of the recent dot-com boom and bust obscured the fact that e-retailing is now firmly established in global business, promising growth rates that will continue to rise globally. This much-needed book provides readers with a guide to the implementation and operation of a successful e-retailing business, and has been written for students, entrepreneurs and researchers at all levels. By identifying and explaining the underlying principles of e-retailing and its relationship with conventional retail methods, this research-based book leads readers through this exciting and emerging subject. Throughout, case studies are explored, including: Ipod Nike Amazon e-Bay McDonald's Nokia. With accessibly written features such as key learning points, questions, think points and further reading, e-Retailing is core reading for anyone using, studying or researching the internet or e-retailing.

China's Outbound Tourism Wolfgang Arlt, 2006-09-27 The People's Republic of China has changed from a country which actively discouraged tourism into one of the major source markets for the international industry; the 35 million Chinese travelling across the border in 2005 are merely the tip of the iceberg. China's Outbound Tourism is the first book on this major development and has been written using a multitude of sources from China and around the world. The topic is approached

from many angles, using methods from the fields of economics, political sciences, sociology and cross-cultural studies. The book explains the economic and social background of the surge in tourism and the changes in policy in the country since 1949, when it moved from prevention through controlled development to encouragement of outbound travels. Throughout the book, facts and figures are given for the global development as well as in-depth information about China's key destinations. The growing importance of tourists from China is however not just a question of quantity; the text explains the features which distinguish their travel motivations and behaviours from 'western' and Japanese tourists, and the consequences for product adaptation and marketing methods for destinations interested in attracting and satisfying Chinese tourists. Arlt's groundbreaking book cannot be ignored by professionals, academics and students of tourism and leisure; it offers fresh insight into the topic and indicates some of the future lines of development in this area.
