Internal Auditing Andrew D. Chambers, 1996 Control by management is synonymous with internal control in counterdistinction from external control. Internal auditing is the independent appraisal of the effectiveness of internal control. It is internal not because it is necessarily performed by people who are internal to the business but because it is the review of internal control. Market testing of internal auditing provision leading, possibly, to contracting out of internal auditing is becoming more popular. The impetus for outsourcing internal audit provision has often been the introduction of a mandatory internal auditing requirement into institutions and businesses which are quite small and where management considers a full in-house provision cannot be justified: in the UK this has often been seen to apply to hospitals, universities and local government bodies.

Written by an expert with three decades of forensic investigation experience, this book is geared specifically toward private, non-public small businesses and their unique needs in the realm of fraud protection. Covering all elements of an internal control structure applicable to the small business community, this guide provides a step-by-step roadmap for designing and implementing an effective, efficient internal control structure/anti-fraud program tailored to your business's particular needs. Case studies are used throughout to illustrate internal control weaknesses and the fraud that can result, and follow-up analysis describes the controls that would have reduced the probability of fraud had they been in place.
