Mark E. Hauber

Space Shuttle Missions Summary

(NASA/TM-2011-216142) Robert D. Legler, Floyd V. Bennett, 2011-09-01 Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically as flown data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.

Red Hat Enterprise Linux 6 Administration Sander van Vugt, 2013-01-23 The definitive guide to administering a Red Hat EnterpriseLinux 6 network Linux professionals who need a go-to guide on version 6 of RedHat Enterprise Linux (RHEL) will find what they need in thiscomprehensive Sybex book. It covers RHEL administration in detail,including how to set up and manage web and mail services, use RHELin enterprise environments, secure it, optimize storage, configurefor virtualization and high availability, and much more. It also provides a great study aid for those preparing for either the RHCSAor RHCE certification exam. Red Hat is the Linux market leader, and Red Hat administratorsare in demand This Sybex guide is a comprehensive resource on Red HatEnterprise Linux administration and useful for those preparing forone of the Red Hat certification exams Covers setting up and managing web and mail services, usingRHEL in enterprise environments, securing RHEL, and optimizingstorage to fit your environment Explores advanced RHEL configurations, including virtualizationand

high availability Red Hat Enterprise Linux 6 Administration is the guideLinux professionals and Red Hat administrators need to stay currenton the newest version.

Philosophy of Psychology: Contemporary Readings Jose Luis Bermudez,2007-01-24 *Philosophy of Psychology: Contemporary Readings* is a comprehensive anthology that includes classic and contemporary readings from leading philosophers. Addressing in depth the major topics within philosophy of psychology, the editor has carefully selected articles under the following headings: pictures of the mind commonsense psychology representation and cognitive architecture. Articles by the following philosophers are included: Blackburn, Churchland, Clark, Cummins, Dennett, Davidson, Fodor, Kitcher, Lewis, Lycan, McDowell, McLeod, Rey, Segal, Stich. Each section includes a helpful introduction by the editor which aims to guide the student gently into the topic. The book is highly accessible and provides a broad-ranging exploration of the subject, including discussion of the leading philosophers in the field. Ideal for any student of philosophy of psychology or philosophy of mind.

The Articulate Mammal Jean Aitchison,2007-09-12 An established bestseller, *The Articulate Mammal* is a concise and highly readable introduction to the main topics in psycholinguistics. This fifth edition brings the book up-to-date with recent theories, including new material on: the possibility of a 'language gene' post-Chomskyan ideas language within an evolutionary framework spatial cognition and how this affects language how children become acclimatized to speech rhythms before birth the acquisition of verbs construction and cognitive grammar aphasia and dementia. Requiring no prior knowledge of the subject, chapter by chapter, *The Articulate Mammal* tackles the basic questions central to the study of

psycholinguistics. Jean Aitchison investigates these issues with regard to animal communication, child language and the language of adults, and includes in the text full references and helpful suggestions for further reading.

The Book of Eggs Mark E. Hauber, 2014-08-01 From the brilliantly green and glossy eggs of the Elegant Crested Tinamou—said to be among the most beautiful in the world—to the small brown eggs of the house sparrow that makes its nest in a lamppost and the uniformly brown or white chickens’ eggs found by the dozen in any corner grocery, birds’ eggs have inspired countless biologists, ecologists, and ornithologists, as well as artists, from John James Audubon to the contemporary photographer Rosamond Purcell. For scientists, these vibrant vessels are the source of an array of interesting topics, from the factors responsible for egg coloration to the curious practice of “brood parasitism,” in which the eggs of cuckoos mimic those of other bird species in order to be cunningly concealed among the clutches of unsuspecting foster parents. *The Book of Eggs* introduces readers to eggs from six hundred species—some endangered or extinct—from around the world and housed mostly at Chicago’s Field Museum of Natural History. Organized by habitat and taxonomy, the entries include newly commissioned photographs that reproduce each egg in full color and at actual size, as well as distribution maps and drawings and descriptions of the birds and their nests where the eggs are kept warm. Birds’ eggs are some of the most colorful and variable natural products in the wild, and each entry is also accompanied by a brief description that includes evolutionary explanations for the wide variety of colors and patterns, from camouflage designed to protect against predation, to thermoregulatory adaptations, to adjustments for the circumstances of a particular habitat

or season. Throughout the book are fascinating facts to pique the curiosity of binocular-toting birdwatchers and budding amateurs alike. Female mallards, for instance, invest more energy to produce larger eggs when faced with the genetic windfall of an attractive mate. Some seabirds, like the cliff-dwelling guillemot, have adapted to produce long, pointed eggs, whose uneven weight distribution prevents them from rolling off rocky ledges into the sea. A visually stunning and scientifically engaging guide to six hundred of the most intriguing eggs, from the pea-sized progeny of the smallest of hummingbirds to the eggs of the largest living bird, the ostrich, which can weigh up to five pounds, *The Book of Eggs* offers readers a rare, up-close look at these remarkable forms of animal life.

E-Retailing Eleonora Pantano, Bang Nguyen, Charles Dennis, Sabine Gerlach, Bill Merrilees, 2004-08-26 Most experts agree that the advent of internet retailing has transformed the marketplace, but until now students of the subject have had to search far and wide for comprehensive up-to-date analyses of the new business landscape. Coverage of the recent dot-com boom and bust obscured the fact that e-retailing is now firmly established in global business, promising growth rates that will continue to rise globally. This much-needed book provides readers with a guide to the implementation and operation of a successful e-retailing business, and has been written for students, entrepreneurs and researchers at all levels. By identifying and explaining the underlying principles of e-retailing and its relationship with conventional retail methods, this research-based book leads readers through this exciting and emerging subject. Throughout, case studies are explored, including: Ipod Nike Amazon e-Bay McDonald's Nokia. With accessibly written features such as key learning points, questions, think points and further

reading, e-Retailing is core reading for anyone using, studying or researching the internet or e-retailing.

The Engineering Index ,1968

An Introduction to the Geography of Health Helen Hazen, Peter Anthamatten, 2012-05-23 Health issues such as the emergence of infectious diseases, the potential influence of global warming on human health, and the escalating strain of increasing longevity and chronic conditions on healthcare systems are of growing importance in an increasingly peopled and interconnected world. A geographic approach to the study of health offers a critical perspective to these issues, considering how changing relationships between people and their environments influence human health. *An Introduction to the Geography of Health* provides an accessible introduction to this rapidly growing field, covering theoretical and methodological background. The text is divided into three sections which consider distinct approaches and techniques related to health geographies. Section one introduces ecological approaches, with a focus on how natural and built environments affect human health. For instance, how have irrigation projects influenced the spread of water-borne diseases? How can modern healthcare settings, such as hospitals, affect the spread and evolution of pathogens? Section two discusses social aspects of health and healthcare, considering health as not merely a biological interaction between a pathogen and human host, but as a process that is situated among social factors which ultimately drive who suffers from what, and where disease occurs. Section three then considers spatial techniques and approaches to exploring health, giving special focus to the growing role of cartography and geographic information systems (GIS) in the study of health. This clearly written text contains a

range of pedagogical features including a wealth of global case studies, discussion questions and suggestions for further reading at the end of each chapter, a colour plate section and over eighty diagrams and figures. The accompanying website also provides presentations, exercises, further resources, and tables and figures. This book is an essential introductory text for undergraduate students studying Geography, Health and Social Studies.

Scientific and Technical Aerospace Reports, 1979 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

The Mind's Eye Ralph Radach, Jukka Hyona, Heiner Deubel, 2003-06-05 The book provides a comprehensive state-of-the-art overview of current research on cognitive and applied aspects of eye movements. The contents include peer-reviewed chapters based on a selection of papers presented at the 11th European Conference on Eye Movements (Turku, Finland 2001), supplemented by invited contributions. The ECEM conference series brings together researchers from various disciplines with an interest to use eye-tracking to study perceptual and higher order cognitive functions. The contents of the book faithfully reflect the scope and diversity of interest in eye-tracking as a fruitful tool both in basic and applied research. It consists of five sections: visual information processing and saccadic eye movements; empirical studies of reading and language production; computational models of eye movements in reading; eye-tracking as a tool to study human-computer interaction; and eye movement applications in media and communication research. Each section is concluded by a commentary chapter by one of the leading authorities in the field. These commentaries

discuss and integrate the contributions in the section and provide an expert view on the most significant present and future developments in the respective areas. The book is a reference volume including a large body of new empirical work but also principal theoretical viewpoints of leading research groups in the field.

Managing Information and Knowledge in Organizations Alistair Mutch, 2008-01-15 Knowledge is increasingly regarded as central, both to the successful functioning of organizations and to their strategic direction. *Managing Information and Knowledge in Organizations* explores the nature and place of knowledge in contemporary organizations, paying particular attention to the management of information and data and to the crucial enabling role played by information and communication technology. Alistair Mutch draws on a wide range of literature spanning the disciplines of business, management, information management, and information systems. This material is located in a framework based on critical realism but covering the full range of contemporary debates. *Managing Information and Knowledge in Organizations* distinguishes itself by: taking a process-based approach centered around the notion of information literacy giving more attention to issues of data and information than other texts emphasizing the importance of technology while continuing to stress the centrality of social and organizational factors placing issues of organizational and national culture in a broader politico-economic context. Featuring such useful features as chapter objectives, mini-cases, chapter summaries, and suggestions for further reading, this text is ideal for advanced undergraduate and graduate students in knowledge management, information management, and management of information systems courses and modules.

Monsoon Summer Mitali Perkins, 2007-12-18 From the author of *Rickshaw Girl* and *You Bring the Distant Near*, a National Book Award Longlist title, comes a story about the magic of India's monsoon season—"monsoon madness"—and all the change it brings to a teenage girl and her family. Jasmine "Jazz" Gardner heads off to India during the monsoon season. The family trip is her mother's doing: Mrs. Gardner wants to volunteer at the orphanage that cared for her when she was young. But going to India isn't Jazz's idea of a great summer vacation. She wants no part of her mother's do-gooder endeavors. What's more, Jazz is heartsick. She's leaving the business she and her best friend, Steve Morales, started—as well as Steve himself. Jazz is crazy in love with the guy. Only when Jazz befriends Danita, a girl from the orphanage who cooks for her family and faces a tough dilemma, does Jazz begin to see how she can make a difference—to her own family, to Danita, to the children at the orphanage, and even to Steve. As India claims Jazz, the monsoon works its madness and magic.

Register Your Book David Wogahn, 2016-03-17
Updated 2020 Edition LEARN THE RIGHT WAY...
...to set your book up for long-term success, improve sales opportunities, and protect your investment, including: Everything you need to know about ISBNs, Barcodes, Copyright, & LCCNs. Make sure your book can be distributed by any distributor. Never have to abandon your hard-earned reader reviews. Ensure your book can be printed by any printer. It is also an

appropriate text for students enrolled in Educational Technology and Distance Education Masters and PhD programs--

Radio and Television Broadcasting Specialist (AFSC 79151). ,1984

Discourse in Action Rodney H Jones, Sigrid Norris, 2005-09-21 From emails relating to adoption over the Internet to discussions in the airline cockpit, the spoken or written texts we produce can have significant social consequences. The area of Mediated Discourse Analysis considers texts in their social and cultural contexts to explore the actions individuals take with texts - and the consequences of those actions. *Discourse in Action*: brings together leading scholars from around the world in the area of Mediated Discourse Analysis reveals ways in which its theory and methodology can be used in research into contemporary social situations explores real situations and draws on real data in each chapter shows how analysis of texts in their social contexts broadens our understanding of the real world. Taken together, the chapters provide a comprehensive overview to the field and present a range of current studies that address some of the most important questions facing students and researchers in linguistics, education, communication studies and other fields.

Computers in Libraries ,1993

Sport, Culture and Society Grant Jarvie, 2006-04-18 This exciting, accessible introduction to the field of Sports Studies is the most comprehensive guide yet to the relationships between sport, culture and society. Taking an international perspective, *Sport, Culture and Society* provides students with the insight they need to think critically about the nature of sport, and includes: a clear and comprehensive structure unrivalled coverage of the

history, culture, media, sociology, politics and anthropology of sport coverage of core topics and emerging areas extensive original research and new case study material. The book offers a full range of features to help guide students and lecturers, including essay topics, seminar questions, key definitions, extracts from primary sources, extensive case studies, and guides to further reading. Sport, Culture and Society represents both an important course resource for students of sport and also sets a new agenda for the social scientific study of sport.

World Yearbook of Education 2004 Andrew Brown, Niki Davis, 2013-04-15 A real revolution is taking place in the way in which we conceptualise and practise education and learning. This book sets out to explore the immense impact which digital technology is having on education around the world and the ways in which it is used by a wide range of individuals and communities. Contributors analyse changes in technology such as e-mail, the Internet, digital video and other media, but also the effect of this new technology on the way people live and learn around the world. Cultural changes taking place range from the blurring of boundaries between formal and informal learning to the development of new 'virtual communities' which revolve around particular social or cultural interests, and which serve as a crucial tool and source of identity for spatially displaced communities such as refugees. Digital technology is changing the way we all live, and this book is an authoritative study of these changes in all their diversity.
