Audio Recorders to Zucchini Seeds Mark Robison,Lindley Shedd,2017-05-30 This exploration of the range of options for a library of things collection demonstrates what has been implemented successfully and offers practical insights regarding these nontraditional projects, from the development of concepts to the everyday realities of maintaining these collections. What services libraries provide and how they function in their communities is constantly being reconsidered and redefined. One example of this is the trend of experimenting with building circulating collections of nonliterary things—such as tools, seeds, cooking equipment, bicycles, household machinery, and educational materials—by drawing on traditional library functions and strengths of acquisition, organization, and circulation. *Audio Recorders to Zucchini Seeds: Building a Library of Things*

enables you to consider the feasibility of creating a specific type of thing collection in your library and get practical advice about the processes necessary to successfully launch and maintain it, from planning and funding to circulation, promotion, and upkeep. This contributed volume provides a survey of library of things projects within the United States, from both public and academic libraries, offering real-world lessons learned from these early experiments with nontraditional collections. The authors offer practical insights from their projects, from the development of their initial ideas to the everyday realities of maintaining and circulating these collections, including cataloging, space needs, safety concerns, staff training, circulation, marketing, and assessment. The contributed chapters are organized thematically, covering things collections that encompass a wide variety of objects first, followed by collections with a community-building focus (seeds, recreation, tools) and those that serve an educational purpose, such as curriculum centers, children's toys, or collections that support a university curriculum. The last section addresses collections that support media production.

This comprehensive kit draws upon the expertise of one of the world's greatest libraries, the only facility of its kind with both world-class research and circulating collections. The 96-page book celebrates the myriad of joys of being a book lover, and addresses such issues as evaluating and organizing a collection, and keeping it in place with bookends and shelves; caring for

books, and the art of loaning books that are actually returned.

A Plan of Organization for Small Libraries Mrs. Minnie Clarke Budlong, 2018-01-02 Excerpt from *A Plan of Organization for Small Libraries: Methods of Work, Lists of Supplies and Aids* It is recommended that all orders for books be made out on book order cards which will be kept and form the shelf list. In libraries too small to be classified the books will be recorded by accession number and shelved alphabetically by author. All methods of work from the selection of the book until it is ready for circulation and eventually with drawn are described in detail and lists of supplies needed are given with prices. There are suggestions and lists of aids for equipment, for care of books, for library economics, for publicity and allied activities. A brief history of the library movement in America leads to the relations between the librarian and the board, the schools, the teachers and the community; and to suggestions given for making the library an attractive center in the town life.
