The American Speed Shop Bob McClurg,2021-02-15 The history of hot rodding and performance cars has been well chronicled through the years. Books and magazines have covered the cars, builders, pioneers, engineers, early racers, muscle cars, street racers, etc. Most take a nostalgic and fun look at the cars that many have loved their entire lives. Some even cover the lifestyle, the hobby as it involves people, and the effort, time, and commitment people put into it. It is more than just a hobby to most, and to many, a certain wave of nostalgia comes over them when remembering what the car scene was like back in the day. The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth. Speed shops were not just parts stores, they were a communal gathering place for car guys wanting to talk smart, bench race, and catch up on the local scene, as well as to solicit the expert advice from the owner or staff behind the counter. Here, longtime hot rodder and industry veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography. He covers the birth of the industry, racing versus hot rodding, mail-order, and advertising wars. You learn about the performance boom of the 1960s and 1970s, lost speed shops as well as survivors, and a overview of the giant mail-order speed shops of today.

Auto Repair For Dummies Deanna Sclar,1999-09-30 Most of us don't know the first thing about the machines we're licensed to drive - and this can turn a ticket to freedom into a ticket to trouble. If you're like most people, you probably tend to drive around until something goes wrong with the car. You then incur the expense of replacing worn and burnt-out parts (or the entire engine) when low-cost, regular maintenance could have kept your wheels turning for a long time. Auto Repair For Dummies is indispensable for anyone who is tired of nodding and smiling at the incomprehensible mutterings of your mechanic, only to end up shelling out money for repairs that you neither fully understand nor always need. This easy-to-understand guide is also for you if you Don't have the vaguest idea of how a car works. Can't identify anything you see under the hood of your vehicle. Are tired of other people assuming (especially if you're a teenager or a woman) that you aren't capable of handling repairs yourself. Don't want to feel helpless in an emergency. Are tired of being ripped off because of your own ignorance. This book shows you how your car works; what it needs in the way of tender loving care; and how to keep from being overcharged if you need to entrust repairs to someone else. Auto Repair For Dummies also gives you the scoop on these topics and more: What makes your vehicle go (and how and why) A program of preventive medicine to avoid trouble Shopping for tools and knowing how to use them Diesel engines and alternatively powered cars How to keep your car looking its best Dealing with on-road emergencies Checking your tires, alignment, and steering By handling the simple maintenance and tune-ups and being able to diagnose trouble and perform the less complex repairs yourself, you'll save some serious money. Once you break the ice (or crack open the hood), the heady sense of power will carry you through basic car repair and maintenance with confidence and ease.

Street Smart Sam Contino,Catherine Leggitt,2012-05-01 Sam Contino doesn't take no for an answer. As far as he is concerned, the impossible just takes a little longer. In his book of memories, Contino tells how to get the job done, no matter what "the job" might entail.From his early days growing up on the streets of Chicago in an Italian neighborhood, Sam Contino has always been an outside-the-box thinker. His beloved brother Raymond—who died during a training exercise prior to entering the war—has been a lifelong inspiration. Perseverance and hard work served Contino well through a stint in the Coast Guard and then in the Navy, where he worked in the motor pool. A creative and skilled mechanic, he taught specialized auto classes to the employees of General Motors, The U.S. Marine Corps, and Sun Electric. He also owned and operated his own auto shops in Chicago, and Las Cruces, New Mexico. Eventually, he settled his wife, Ida, in the Ontario area of southern California where he opened another auto shop and his family expanded to include six children.When Chaffey College hired him in 1966, Contino transformed their Automotive Technology Department into one of the finest and best known in the country. Students from all sections of the United States, Canada, Mexico, and Great Britain enrolled over the twenty years he taught at Chaffey. Contino gained national recognition for the college when the Auto Tech department conducted a 100,000-mile road test on a Pinto for Ford Motor Company and ran a set of steel-belted radials around the United States for Sears. Both these road tests garnered media attention

and prestige for Chaffey College. Contino pioneered the only for-credit racecar technology program in the world, which he started in a campus warehouse. This program launched many successful racing careers. The program also connected students with racing celebrities such as Dan Gurney, Andy Granatelli, Mario Andretti, Parnelli Jones, and the legendary actor Paul Newman. Newman donated three cars to the program including a souped-up 1963 VW, which the students rebuilt. Racecar Technology students also built and raced a 1968 Camaro, a 1969 Mustang and an American Motors Rambler. They raced their cars in intercollegiate races, which Contino engineered, as well as at the Ontario Motor Speedway, Laguna Seca, and the Riverside Raceway. In addition, the students participated in the Pikes Peak hill climb race, and tested cars at the Bonneville Salt Flats. They also raced in several off-road races like the Baja 500. One of the highlights of Contino's innovative and illustrious career in racing occurred in 1985 when he served in the pit crew with Mario Andretti's team at the Indianapolis 500. After retiring from teaching in 1989, Contino couldn't settle down in his easy chair and do nothing more challenging than wield a remote control. Retirement takes on a new meaning when applied to energetic people like Sam Contino. As long as there are more challenges to be met, more hills to climb, more sports to conquer, Contino continues turning corners and starting over. Once, Contino solicited money, food, clothing, and lumber for the poor people living in the Tijuana dump. Donors sponsored Sam's 150-mile jog from Ontario to Tijuana. Later, he won medals in the Senior Olympics, rode a horse in a cattle drive, and operated a hot-air balloon. Contino even drove a racecar of his own. And always, he made time to mentor and advise. Ida passed away in 2004. Contino's second wife, Beverly, complements him well. Today in his 80s, Sam continues to be active in a variety of sports and adventures, now teaching water aerobics and "Sammy" Yoga. He tells his story in his own rambling style, sparkling with his philosophy that good care of our bodies allows us to live life to the fullest. Contino's zest for life is infectious. Who knows what might lie in store for such a man.

High Voltage Jim Motavalli, 2011-11-08 A behind-the-scenes look at the robustly competitive race to dominate the market for electric cars, the larger-than-life moguls behind them, and the changes that are transforming the auto industry In the 1980s, it was unimaginable that the home computer would become as common and easy to use as a toaster. Today, plug-in charging stations and smart grids seem like something still far off in the future. But by 2020, the auto industry will look very different from today's field of troubled auto giants. The combination of technological breakthroughs and charging networks driven by global warming and peak oil makes it clear that revolutionary change in the auto industry is happening right now. In High Voltage, Jim Motavalli captures this period of unprecedented change, documenting the evolution from internal combustion engines to electric power. Driven by the auto world's ambitious and sometimes outlandish personalities, the book chronicles the race to dominate the market, focusing on big players like Tesla and Fisker, as well as a tiny start-up and a battery supplier. Flashing forward to the changes we'll see in the coming years, High Voltage shows a not-so-distant future where we will live on a smart grid, our cars fueling, that is, charging, while we shop or sleep. The ramifications of these changes will be on a grander scale than most of us ever imagined—altering foreign policy, reducing trade deficits, and perhaps even ending global warming.
