Balloonomania Belles Sharon Wright, 2018-03-31 Award-winning journalist Sharon Wright presents a fascinating account of the fabulous eighteenth and nineteenth-century female pioneers of balloon flight. More than a century before the first airplane took flight, women were heading for the heavens in crazy, inspired contraptions that brought both danger and glory. Women were in the vanguard of the “Balloonomania” craze that took hold in the eighteenth and nineteenth centuries, sweeping across Europe and then the world. Their exploits were a vital element of our first voyages into the sky. In a time when women’s lives were often severely limited by law and convention, these intrepid pioneers took on an exhilarating quest for spectacle, adventure, and danger. From the perilous ascent in 1784 by feisty French teenager Elisabeth Thible, female aeronauts have never looked back . . . or down. But who were these brave women who fearlessly—and scandalously—took to the air? In *Balloonomania Belles*, journalist Sharon Wright reveals the hair-raising adventures of the first flying women in a book that celebrates the brightest stars of an extraordinary era in human achievement.

Cultural Techniques Jörg Dünne,Kathrin Fehringer,Kristina Kuhn,Wolfgang Struck,2020-08-24 This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt. Taking up an impulse from media studies, its contributions examine —from a variety of disciplinary perspectives—the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques. Case studies in the fields of history, literary (and media) studies, and the history of science reconstruct seemingly fundamental demarcations such as nature and culture, the human and the nonhuman, and materiality and the symbolical order as the result of concrete practices and operations. These studies reveal that particularly basic operations of spatialization form the very

conditions that determine emergence within any cultural order. Ranging from manual and philological paper work to practices of opening up and closing off spaces and collective techniques of assembly, these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific constellations between human and nonhuman actors.
