*Tactical Biopolitics* Beatriz Da Costa, Kavita Philip, 2010-08-13 Scientists, scholars, and artists consider the political significance of recent advances in the biological sciences. Popular culture in this "biological century" seems to feed on proliferating fears, anxieties, and hopes around the life sciences at a time when such basic concepts as scientific truth, race and gender identity, and the human itself are destabilized in the public eye. *Tactical Biopolitics* suggests that the political challenges at the intersection of life, science, and art are best addressed through a combination of artistic intervention, critical theorizing, and reflective practices. Transcending disciplinary boundaries, contributions to this volume focus on the political significance of recent advances in the biological sciences and explore the possibility of public participation in scientific discourse, drawing on research and practice in art, biology, critical theory, anthropology, and cultural studies. After framing the subject in terms of both biology and art, *Tactical Biopolitics* discusses such topics as race and genetics (with contributions from leading biologists Richard Lewontin and Richard Levins); feminist bioscience; the politics of scientific expertise; bioart and the public sphere (with an essay by artist Claire Pentecost); activism and public health (with an essay by Treatment Action Group co-founder Mark Harrington); biosecurity after 9/11 (with essays by artists' collective Critical Art Ensemble and anthropologist Paul Rabinow); and human-animal interaction (with a framing essay by cultural theorist Donna Haraway). Contributors Gaymon Bennett, Larry Carbone, Karen Cardozo, Gary Cass, Beatriz da Costa, Oron Catts, Gabriella Coleman, Critical Art Ensemble, Gwen D'Arcangelis, Troy Duster, Donna Haraway, Mark Harrington, Jens Hauser, Kathy High, Fatimah Jackson, Gwyneth Jones, Jonathan King, Richard Levins, Richard Lewontin, Rachel Mayeri, Sherie McDonald, Claire Pentecost, Kavita Philip, Paul Rabinow, Banu Subramanian, subRosa, Abha Sur, Samir Sur, Jacqueline Stevens, Eugene Thacker, Paul Vanouse, Ionat Zurr

**Vital Directions for Health & Health Care** National Academy of Medicine, 2023-09-09 What can be more vital to each of us than our health? Yet, despite unprecedented health care spending, the U.S. health system is substantially underperforming, especially with respect to what should be possible, given current knowledge. Although the United States is currently devoting 18% of its Gross Domestic Product to delivering medical care?more than \$3 trillion annually and nearly double the expenditure of other advanced industrialized countries?the U.S. health system ranked only 37 in performance in a World Health Organization assessment of member nations. In *Vital Directions for Health & Health Care: An Initiative of the National Academy of Medicine*, the National Academy of Medicine (NAM), which has long stood as the nation's most trusted independent source of guidance in health, health care, and biomedical science, has marshaled the wisdom of more than 150 of the nation's best researchers and health policy experts to assess opportunities for substantially improving the health and well-being of Americans, the quality of

care delivered, and the contributions of science and technology. This publication identifies practical and affordable steps that can and must be taken across eight action and infrastructure priorities, ranging from paying for value and connecting care, to measuring what matters most and accelerating the capture of real-world evidence. Without obscuring the difficulty of the changes needed, in *Vital Directions*, the NAM offers an important blueprint and resource for health, policy, and leaders at all levels to achieve much better health outcomes at much lower cost.

New Thinking, New Future Samuel R. Chand, 2019-05-07 "The way leaders think matters—it matters a lot. The problem is that we almost universally make a colossal subconscious assumption that the way we think is the only possible way to consider our situations.... It's like our minds are running antiquated software that's slow, glitchy, and unproductive—but it's all we've ever known. We need to upgrade the software in our heads!"—Sam Chand With candor, humor, and personal stories, Sam peels back the layers of our assumptions to challenge us to think more deeply, more clearly, and more productively than ever before. He addresses fundamental topics all leaders instinctively address, including security, location, ownership, team, growth, and benchmarks of success. And he provides questions that leaders can ask themselves to develop New Thinking for a New Future.
