The Simple Way To Learn Multiplication Nick Kerridge, 2020-05-10 Turn Your Kid Into a Mini Math Genius! Multiplication is an essential learning requirement for your child's understanding of basic math operations. Paired along with other algebraic functions (PEMDAS), this book serves to aid kids in their preparation for math tests, exams and other daily functions which may involve cognitive arithmetic like buying and selling. It makes use of the age-old learning techniques of repetition and rote memorization, to condition the brain for learning the multiplication tables as quickly as possible. In addition, an auxiliary feature called TEST mode has been included to aid the reader in a test for comprehension. Finally, it should be noted that while this book will aid in visual memorization and learning, students must also be able to commit the tables to heart, so much so that the desired permutations are processed upon hearing. To help with this, there is an accompanying audiobook that will be made available, to enable listening lessons. And so, from the stables of those who brought you The Simple Way Language Learning series, we present to you, The Simple Way to Learn Multiplication.

The Best Way to Learn Multiplication Tables Oksana Siniukov, Maryna Kuznetsova, Math Country, 2020-04-09 The Math Country team is made up of practicing mathematics teachers with a combined teaching experience of more than 35 years, who are also authors of unique methods of intensive children's education. In any beginner math course a big chunk of time is spent on learning the multiplication table. It's not a secret that just memorizing tables isn't

fun for kids. It's proportionate how much work has to be put in to somehow convince the kid that learning this table will in fact be useful later in life. The multiplication table isn't easy for kids to remember, so a big part of this training regime is spent on making it easier for kids to memorize it. It is critical that the child experiences the joy of figuring out ideas on their own, that they form self-esteem and trust in their own abilities, and also the curiosity to learn. These are the defining factors when it comes to accessing the overall intellectual development of a child. The material is recommended for self-training of grade 2-3 classes. The contents naturally join into the material kids of that age are learning in school about multiplication tables. Our material fits into any education program. The system of additional exercises leads to development of mental abilities such as: memory, attention, imagination, logical and spatial thinking, and artistic abilities. Instead of tedious repetitive memorization, the child will understand and easily remember the multiplication material. Exercises that are interesting allow those learning to quicker acquire the material and appreciate math for what it is, not just tedious repetitive memorization.
