The State of Knowledge on Medical Assistance in Dying Where a Mental Disorder Is the Sole Underlying Medical Condition The Expert Panel Working Group on MAID Where a Mental Disorder Is the Sole Underlying Medical Condition, 2018-12-12 In December 2016, the CCA was asked by then Minister of Health Jane Philpott and Minister of Justice and Attorney General of Canada Jody Wilson-Raybould to undertake independent reviews related to medical

assistance in dying (MAID). Specifically, the CCA was tasked with examining three particularly complex types of requests for MAID that were identified for further review and study in the legislation passed by Parliament in 2016: requests by mature minors, advance requests, and requests where a mental disorder is the sole underlying medical condition. On December 12, 2018 the CCA released the three final reports of the Expert Panel, one on each type of request: The State of Knowledge on Medical Assistance in Dying for Mature Minors; The State of Knowledge on Advance Requests for Medical Assistance in Dying; and The State of Knowledge on Medical Assistance in Dying Where a Mental Disorder is the Sole Underlying Medical Condition.

Embedded Flash Memory for Embedded Systems: Technology, Design for Sub-systems, and Innovations Hideto Hidaka, 2017-09-09 This book provides a comprehensive introduction to embedded flash memory, describing the history, current status, and future projections for technology, circuits, and systems applications. Pirate Modernity Ravi Sundaram, 2009-07-30 Using Delhi's contemporary history as a site for reflection, *Pirate Modernity* moves from a detailed discussion of the technocratic design of the city by US planners in the 1950s, to the massive expansions after 1977, culminating in the urban crisis of the 1990s. As a practice, pirate modernity is an illicit form of urban globalization. Poorer urban populations increasingly inhabit non-legal spheres: unauthorized neighborhoods, squatter camps and bypass legal technological infrastructures (media, electricity). This pirate culture produces a significant enabling resource for subaltern populations unable to enter the legal city. Equally, this is an unstable world, bringing subaltern populations into the harsh glare of permanent technological visibility, and attacks by urban elites, courts and visceral media industries. The book examines contemporary Delhi from some of these sites: the unmaking of the city's modernist planning design, new technological urban networks that bypass

states and corporations, and the tragic experience of the road accident terrifyingly enhanced by technological culture. *Pirate Modernity* moves between past and present, along with debates in Asia, Africa and Latin America on urbanism, media culture, and everyday life. This pioneering book suggests cities have to be revisited afresh after proliferating media culture. *Pirate Modernity* boldly draws from urban and cultural theory to open a new agenda for a world after media urbanism.

Ferroelectric Ceramics Setter, Colla, 2012-12-06 One of the fascinating aspects of the field of ferroelectric ceramics is its interdisciplinary nature. This aspect is also a source of difficulty for the people working in the field. In a successful team of ferroelectricians the physics theoretician must understand the sintering technologist, the electrical engineer has to communicate with the crystallographer, the organic chemist will interact with the microelectronics engineer, the electron microscopist should collaborate with the systems engineer. It was the purpose of the summer school on ferroelectric ceramics that took place at the Centro Stefano Franscini (ETHZ), Monte Verità, Ascona, Switzerland, in September 1991 to help to build bridges between people from the different disciplines and to draw for them, in the form of tutorial lectures, some of the different facets of ferroelectrics. The book is a written version of this summer school. It contains the following subjects: ferroelectric materials, physics of ferroelectrics, thin films, processing of ferroelectrics and their applications. It represents a cross section of topics of current interest.

Materials are presented (L. E. Cross) from the point of view of the user, i. e. the tailoring of materials for specific applications. Two reviews address the important topic of ferroelectric domains and domain walls (I. Fousek and H. Schmid). In the part devoted to theory, three subjects of current interest are presented: phase transition in thin films (D. R. Tilley), weak ferroelectrics (A. K. Tagantsev) and dielectric losses (A. K. Tagantsev).
