Here's what to change now.* What 3¢-a-day habit could be the most important thing you could do for more life and longevity.* That the medical specialist you now see is almost certainly not the one you should have caring for you.* Why overpopulation will not be a problem... even if people live forever.* Why less is more when it comes to exercise.* What two immediate low-tech adjustments could add 20 active years to your average lifespan.* Which short-term gratifying habits may snatch away your chance for open-ended youth and an ever-expanding mind.* How to help ensure your longevity, even if everything else fails.
