Here in this land of howling wind and infernal sand, four siblings find themselves scattered and lost. And the world he left behind might be next. Welcome to the world of Sand, a novel by New York Times best-selling author Hugh Howey. Sand is an exploration of lawlessness, the tale of a land ignored. Here is a people left to fend for themselves. Adjust your ker and take a last, deep breath before you enter.

Near to the Wild Heart Clarice Lispector, 2012-06-13 This new translation of Clarice Lispector's sensational first book tells the story of a middle class woman's life from childhood through an unhappy marriage and its dissolution to transcendence. Near to the Wild Heart, published in Rio de Janeiro in 1943, introduced Brazil to what one writer called "Hurricane Clarice": a twenty-three-year-old girl who wrote her first book in a tiny rented room and then baptized it with a title taken from Joyce: "He was alone, unheeded, near to the wild heart of life." The book was an unprecedented sensation – the discovery of a genius. Narrative epiphanies and interior monologue frame the life of Joana, from her middle-class childhood through her unhappy marriage and its dissolution to transcendence, when she proclaims: "I shall arise as strong and comely as a young colt."

The Antinomies of Realism Fredric Jameson, 2015-03-10 The Antinomies of Realism is a history of the nineteenth-century realist novel and its legacy told without a glimmer of nostalgia for artistic achievements that the movement of history makes it impossible to recreate. The works of Zola, Tolstoy, Pérez Galdós, and George Eliot are in the most profound sense inimitable, yet continue to dominate the novel form to this day. Novels to emerge since struggle to reconcile the social conditions of their own creation with the history of this mode of writing: the so-called modernist

novel is one attempted solution to this conflict, as is the ever-more impoverished variety of commercial narratives – what today’s book reviewers dub “serious novels,” which are an attempt at the impossible endeavor to roll back the past. Fredric Jameson examines the most influential theories of artistic and literary realism, approaching the subject himself in terms of the social and historical preconditions for realism’s emergence. The realist novel combined an attention to the body and its states of feeling with a focus on the quest for individual realization within the confines of history. In contemporary writing, other forms of representation – for which the term “postmodern” is too glib – have become visible: for example, in the historical fiction of Hilary Mantel or the stylistic plurality of David Mitchell’s novels. Contemporary fiction is shown to be conducting startling experiments in the representation of new realities of a global social totality, modern technological warfare, and historical developments that, although they saturate every corner of our lives, only become apparent on rare occasions and by way of the strangest formal and artistic devices. In a coda, Jameson explains how “realistic” narratives survived the end of classical realism. In effect, he provides an argument for the serious study of popular fiction and mass culture that transcends lazy journalism and the easy platitudes of recent cultural studies.

Swamps and the New Imagination Nomeda Urbonas, Gediminas Urbonas, Kristupas Sabolius, 2023-02-07 Contributors consider the vital urgency of human cohabitation with other forms of life, beginning a dialogue with possible futures. It is not easy to define a swamp, even in biology. The term is frequently used to characterize marshes, bogs, mires, wetlands, meadows, and other grey zones between land and water. In that sense, “swamp” is a metonym for a variety of transitional ecosystems and functions. This book invokes that concept as a tool to address the vital urgency of human cohabitation with other forms of life, placing the swamp at the crossroad of disciplines and practices. It is more than a biological ecosystem; it is a milieu of manifold sympoietic relationships, a locus of imagination, fostering the dialogue for possible futures. It is also a very particular modality—“an interface of Gaia”—offering a “face,” a certain physiognomy to faceless networks of relations, inviting us to engage in regimes of entanglement. The contributors to this volume expand on swampy notions, probing global and speculative art and architecture, intercalating philosophy and queer theory, and filtering these notions through the lens of posthumanist ecology, informed by the histories and theories of cybernetics, sociology, and the commons. Contributors Lorena Bello and Brent D. Ryan, Nikola Bojić, Chiara Bottici, Jonathan Jae-an Crisman and Newton Harrison, Glorianna Davenport and Gershon Dublon, T.J. Across the Sand Hugh Howey, 2022-10-04 "Hugh's imaginative worlds and tales within them never fail to entertain!" –Andy Weir, New York Times bestselling author of Project Hail Mary The first original novel from author Hugh Howey in six years, *Across the Sand* takes us back to the world of Sand, to a far future many generations after a disaster has destroyed civilization as we know it, where four siblings struggle to build their futures amid the harsh wastes of endless desert. The old world is buried. A new one has been forged atop the shifting dunes, a land of howling wind and infernal sand. In this barren home, siblings Conner, Rob, Palmer and Violet daily carve out a future. They live in the shadow of their father and oldest sister, Vic, two of the greatest sand divers ever to comb the desert's depths. But these branches of their family tree are long gone, disappeared into the wastes beyond, leaving the younger siblings scratching in the dust, hopeful for a better life. On the other side of No Man's Land, Anya was born beside the abundant mines knowing her prospects would be to marry, have a family, and work in ore, in service to the Empire of the East. But when an atomic bomb delivered by a stranger destroys most of her town—murdering all her friends and community—she follows her father to a strange land of dunes to bring vengeance to their enemies.

Basquiat : The Unknown Notebooks Dieter Buchhart, 2015 Accompanying a major traveling exhibition, this first-ever survey of the rarely seen notebooks of Basquiat features the artist's handwritten notes, poems, and drawings, along with related works on paper and large-scale paintings. With no formal training, Jean-Michel Basquiat (1960-1988) succeeded in developing a new and expressive style to become one of the most influential artists in the postmodern revival of figurative during the 1980s. In a series of notebooks from the early to mid-1980s, never before exhibited, Basquiat combined text and images reflecting his engagement with the countercultures of graffiti and hip-hop in New York City, as well as pop culture and world events. Filled with handwritten texts, poems, pictograms, and drawings, many of them iconic images that recur throughout his artwork—teepees, crowns, skeleton-like silhouettes, and grimacing masks—and these notebooks reveal much about the artist's creative process and the importance of the written word in his aesthetic. With over 150 notebook pages and numerous drawings and paintings, this important book sheds new light on Basquiat's career and his critical

place in contemporary art history.--

Deformation Characteristics of Geomaterials H. DiBenedetto, T. Doanh, H. Geoffroy, C. Sauzéat, 2005-03-03 Solutions for soil engineering and soil-structure interaction problems need realistic and pertinent experimental and

modelling tools. In this work, extensive developments proposed by the invited speakers of the Lyon International Symposium held in September 2003 are presented, including experimental investigations into deformation properties; laboratory, in-situ and field observation interpretations; behaviour characterisation and modelling; and case histories. The contributions include recent investigations into anisotropy and non-linearity, the effects of stress-strain-time history, ageing and time effects, yielding, failure and flow, cyclic and dynamic behaviour. In addition, advanced geotechnical testing is applied to real engineering problems, and to ways of synthesising information from a range of sources while engaging in practical site characterisation studies.

Ars Homo Erotica Paweł Leszkowicz, 2010

Urban Styles Freddy Alva, 2017-10 Urban Styles chronicles the under the radar phenomenon of Punk Hardcore music blending with Graffiti in the metropolis known as New York City. This tale is told through the eyes of band members that were adept at wielding spray cans and writers that represented New York Hardcore on the streets as well as related iconography that reinforced the connection between these two subcultures. The conventional notion of what a graffiti writer is supposed to look and be into, is challenged, as stated on this quote from the book's jacket: When you hear the term Graffiti Artist most people think of B-Boys in Kangol hats parachute pants and break dancing. No one thinks shaved heads, Doc Martens and CBGB mosh pits! But there was and is a strong connection between the NYC graffiti scene and the NY Hardcore scene... Lou Koller from Sick Of It All A vital component of this synthesis was, the native to NYC, inclusion of Hardcore fans within traditional Graffiti crews, sometimes at odd with one another, but always united in spreading the aesthetic of this music onto a wider visual medium. Inside the book you'll find interviews with key crew members as well as the first writers who played in bands; the ones that followed them and the modern day practitioners that are still upholding this tradition. There is also a plethora of iconic images within, culled from record/demo tape covers, flyers, t-shirts and paintings that celebrate the union of these two street cultures, most of them never seen or done specifically for the book. Underground movements, art, music, sociology, urban cultures; all of these disparate yet related topics are a piece of the puzzle. They collectively shine a spotlight on subcultures that have gone on to have a far reaching influence onto the world-at-large and it all can be traced back to

this concrete jungle known as the big apple.
