Don't Fear the Spreadsheet Tyler Nash, Bill Jelen, Kevin Jones, Tom Urtis, 2012-07-01

Written in a question-and-answer format, this lowest-level beginner book covers the extreme basics of using spreadsheets in Excel. Instead of delving into advanced topics that scare most Excel novices away, the guide starts at a much more basic level, quickly providing a passable knowledge of the program and allowing users to overcome their fears

and frustrations. It answers hundreds of common questions, including Can I delete data from a spreadsheet without changing the formatting? How can I merge two cells, columns, or rows? How do I use text-wrapping? How do I create custom functions? and What is a Macro and how do I go about creating it? Intended for the roughly 40 percent Excel users who have never even entered a formula, this book will demystify the problems and confusion that prevent them from using the program to its potential.

The Musical Guide Friederich Erhardt Niedt,1989 This is the first complete English translation and edition of Niedt's Musicalische Handleitung (Musical Guide). The first volume, a treatise on thorough-bass (1700) and the only one generally available at the time, attracted the attention of J.S. Bach who apparently modelled his teaching on it. The second volume (1706), revised and edited in 1721 by the music theorist Johann Mattheson, is on variation and includes a chaconne and two complete suites as models, as well as a dictionary of musical terms, one of the first published in the eighteenth century. The third volume, assembled by Mattheson and published in 1721, discusses counterpoint, canon, motets, chorales, recitative style, and cantatas. These volumes, presented here in one volume with an Introduction and Explanatory Notes by Professor Poulin, provide valuable insights into the music, theory, and practice of the early eighteenth century.
