Intercropping Under Rice-Based Cropping System: An Experimental Study on Productivity and Profitability Manish Kumar Singh,2014-02-01 Rice farmers are mostly involved in monoculture practices. This deprives the land for growing other food crops. Hence, a better alternative of mono/sole cropping is required to overcome this shortcoming. Therefore, a shift from mono cropping to inter/multiple cropping as an excellent strategy for intensifying land use and increasing income and production per unit area and time is appreciated. Production efficiency, economic efficiency and employment generation efficiency of any diversified system is a direct measure of its preferability. Keeping this view in mind, this study deals with the production potential and economic viability of different rabi intercropping in rabi cereal, legume, oilseeds and spices to identify the suitable/remunerative rice (*Oryza sativa* L.) based cropping systems.  
**Machine Learning and Artificial Intelligence** J.-L. Kim,2022-12-09 Machine learning (ML) and artificial intelligence (AI) applications are now so pervasive that they have become indispensable facilitators which improve the quality of all our daily lives. This book presents the proceeding of MLIS 2022, the 4th International Conference on Machine Learning and Intelligent Systems, held as a virtual event due to the continued uncertainty caused by the Covid-19 pandemic and hosted in Seoul, South Korea from 8 to 11 November 2022. The aim of the annual MLIS conference is to provide a platform for the exchange of the most recent scientific and technological advances in the field of machine learning and intelligent systems, and to strengthen links in the scientific community in related research areas. Scientific topics covered at MLIS 2022 included data mining, image processing, neural networks, natural language processing, video processing, computational intelligence, expert systems, human-computer interaction, deep learning, and robotics. The book contains the 20 papers selected for acceptance after a rigorous peer review process from the more than 90 full papers submitted. Selection criteria were based on originality, scientific/practical significance, compelling logical reasoning and language, and the 20 papers included here all provide either innovative and original ideas or results of general significance in the field of ML and AI. Providing an overview of the latest research and developments in machine learning and artificial intelligence, the book will be of interest to all those working in the field.
