Space and Energy L. G. Napolitano, 2013-10-22 *Space and Energy* contains the proceedings of the 26th Congress of the International Astronautical Federation, held in Lisbon, Portugal, on September 21-27, 1975. The papers explore developments and trends of interest as well as research in space and energy. Topics covered range from engineering and life sciences to space systems, space technology, and communication satellites. This book is comprised of 16 chapters and begins with a discussion on the Earth as an open system and how to utilize solar energy. The next section is devoted to engineering and life sciences and includes chapters giving surveys and/or assessments of a number of basic topics in astrodynamics and bioastronautics. Propulsion system concepts for a single stage shuttle are also considered, along with the reliability of outer planet spacecraft and the contribution of biological satellites to space biology and medicine. Specific systems such as an experimental hybrid rocket are also described. The last part evaluates application satellites, with particular reference to communication and earth resource satellites. This monograph should be of interest to space scientists and engineers.

Mobile Messaging Technologies and Services Gwenaël Le Bodic, 2005-07-08 Building on the success of the first edition, *Mobile Messaging Technologies and Services* offers extensive new and revised material based upon the latest research and industry developments. While early implementations targeted person-to-person messaging, MMS has now evolved to facilitate such requirements as the mass delivery of time-sensitive messages for content-to-person messaging. This Second Edition exploits the technical maturity of MMS as it is poised to generate a wealth of new business opportunities across the mobile communications sector. The author provides the fundamental technical background required for SMS, EMS and MMS, and supports this with industry cutting-edge developments. ● Contains a revised section on the fundamentals of MMS, including an updated section on GPRS to explain current commercial implementations such as GRX applications. ● Presents the latest developments in MMS standardization, including the design of synchronized multimedia integration language (SMIL) presentations, Digital Rights Management (DRM), transcoding techniques, postcard service and support of advanced multimedia formats. ● Describes the processes for standardizing telecommunications services and technologies (3GPP, OMA, GSM Association, IETF and W3C). ● Provides updated sections on SMS, EMS and heavily revised coverage of the developments in MMS, including MMS interworking and the forthcoming MMS version 1.3. This resource will be invaluable for application developers, manufacturers, operators and content providers involved in the design and deployment of messaging services. It will also be of interest to practitioners involved in the process of standardizing telecommunications services and technologies. Postgraduate students and researchers will benefit from having access to state-of-the-art findings backed by numerous illustrative real-world examples. Includes a companion website featuring information on relevant standards, available phones and developers' resources.

SMS and MMS Interworking in Mobile Networks A. Henry-Labordère, Vincent Jonack, 2004 Here is a comprehensive and highly practical guide to SMS and MMS interworking in GSM, TDMA, and CDMA mobile communications systems. The text provides the knowledge needed to plan SMS or MMS interworking both commercially and technically, and to develop software for SMS and MMS centers.

Integration of Information for Environmental Security H. Gonca Coskun, H. Kerem Cigizoglu, M. Derya Maktav, 2008-10-28 Water management and disasters, including droughts and floods are becoming very important subjects in the international platforms. Information, Accountability, and Cumulative Learning Thad Dunning, Guy Grossman, Macartan Humphreys, Susan D. Hyde, Craig McIntosh, Gareth Nellis, 2019-07-11 Throughout the world, voters lack access to information about politicians, government performance, and public services. Efforts to

remedy these informational deficits are numerous. Yet do informational campaigns influence voter behavior and increase democratic accountability? Through the first project of the Metaketa Initiative, sponsored by the Evidence in Governance and Politics (EGAP) research network, this book aims to address this substantive question and at the same time introduce a new model for cumulative learning that increases coordination among otherwise independent researcher teams. It presents the overall results (using meta-analysis) from six independently conducted but coordinated field experimental studies, the results from each individual study, and the findings from a related evaluation of whether practitioners utilize this information as expected. It also discusses lessons learned from EGAP's efforts to coordinate field experiments, increase replication of theoretically important studies across contexts, and increase the external validity of field experimental research.

Visual Media in Indonesia Edwin Jurriëns, 2017-02-24 In the age of digital communication and global capitalism, people's mental, social and natural environments are interconnected in complex and often unpredictable ways. This book focuses on the visual media, one of the key factors in shaping the contemporary ecology of colliding environments. Case-studies include video artists, community media activists, television programme makers and literary authors in the fourth most populous country in the world, Indonesia. The author demonstrates that these actors are part of an international creative and social vanguard that reflect on, criticise and rework the multidimensional impact of the visual media in imaginative and innovative ways. Their work explores alternative and more sustainable presents and futures for Indonesia and the world. This research is urgent and timely, as Indonesia has emerged in recent years as one of the world's most vibrant hubs for contemporary art and media experimentation. Using an innovative interdisciplinary framework of visual culture analysis that derives from a wide range of academic fields, the book will be of interest to academics in the field of Southeast Asian Studies, Media Studies, Cultural Studies and Art History, Anthropology and Sociology.
