Christopher J. Castaneda, Lee M. A. Simpson

River City and Valley Life Christopher J. Castaneda, Lee M. A. Simpson, 2013-12-09 Often referred to as “the Big Tomato,” Sacramento is a city whose makeup is significantly more complex than its agriculture-based sobriquet implies. In *River City and Valley Life*, seventeen contributors reveal the major transformations to the natural and built environment that have shaped Sacramento and its suburbs, residents, politics, and economics throughout its history. The site that would become Sacramento was settled in 1839, when Johann Augustus Sutter attempted to convert his Mexican land grant into New Helvetia (or “New Switzerland”). It was at Sutter’s sawmill fifty miles to the east that gold was first discovered, leading to the California Gold Rush of 1849. Nearly overnight, Sacramento became a boomtown, and cityhood followed in 1850. Ideally situated at the confluence of the American and Sacramento Rivers, the city was connected by waterway to San Francisco and the surrounding region. Combined with the area’s warm and sunny climate, the rivers provided the necessary water supply for agriculture to flourish. The devastation wrought by floods and cholera, however, took a huge toll on early populations and led to the construction of an extensive levee system that raised the downtown street level to combat flooding. Great fortune came when local entrepreneurs built the Central Pacific Railroad, and in 1869 it connected with the Union Pacific Railroad to form the first transcontinental passage. Sacramento soon became an industrial hub and major food-processing center. By 1879, it was named the state capital and seat of government. In the twentieth century, the Sacramento area benefitted from the federal government’s major investment in the construction and operation of three military bases and other regional public works projects. Rapid suburbanization followed along with the building of highways, bridges, schools, parks, hydroelectric dams, and the Rancho Seco nuclear power plant, which activists would later shut down. Today, several tribal gaming resorts attract patrons to the area, while “Old Sacramento” revitalizes the original downtown as it celebrates Sacramento’s pioneering past. This environmental history of Sacramento provides a compelling case study of urban and suburban development in California and the American West. As the contributors show, Sacramento has seen its landscape both ravaged and reborn. As blighted areas, rail yards, and riverfronts have been reclaimed, and parks and green spaces created and expanded, Sacramento’s identity continues to evolve. As it moves beyond its Gold Rush, Transcontinental Railroad, and government-town heritage, Sacramento remains a city and region deeply rooted in its natural environment.

Distributed Electricity Generation with Renewable Resources Raphael Edinger, 2012-07 Solarenergie ist die Basis für eine nachhaltige Wirtschaftsweise. Die Liberalisierung der Elektrizitätsindustrie stellt die Stromerzeugung aus erneuerbaren Energien vor eine große Herausforderung. Solarstrom gilt als teuer und nicht wirtschaftlich. Dieses Buch untersucht die ökonomischen Aspekte von kleinen dezentralen Photovoltaikanlagen, die auch von Konsumenten betrieben werden können. Der Autor entwickelt eine Marktstrategie, die es kleinen kommunalen Energieversorgern erlaubt, mit erneuerbaren Energien in einem zukünftigen freien Stromwettbewerb zu bestehen. Aktuelle Fallstudien aus Deutschland und den USA illustrieren die Chancen und Herausforderungen für eine umweltfreundliche Energieversorgung mit Solarstrom. Making a Place for Community Thad Williamson, David Imbroscio, Gar Alperovitz, 2014-06-03 When pundits refer to the death of community, they are speaking of a number of social ills, which include, but are not limited to, the general increase in isolation and cynicism of our citizens, widespread concerns about declining political participation and membership in civic organizations, and periodic outbursts of small town violence. *Making a Place for Community* argues that this death of community is being caused by contemporary policies that, if not changed, will continue to foster the decline of community. Increased capital flow between nations is not at the root of the problem, however, increased capital flow within our nation is. Small towns shouldn't have to hope for a prison to open nearby and downtown centers shouldn't sit empty as suburban sprawl encroaches, but they do and it's a result of widely agreed upon public policies.

The Electric Battery Kevin B. Jones, Benjamin B. Jervy, Matthew Roche, Sara Barnowski, 2017-04-24 An easy-to-understand and engaging exploration of the battery's development across history that reveals current technological advances, celebrates the innovators who have led the charge forward, and shows how the electric battery represents the path to a low-carbon future. Now more than ever, consumers want to understand not only the basic facts behind the electric battery and the challenges of battery storage in everyday devices, including vehicles, but also whether increased, widespread application of battery technology has real environmental benefits that could change the future of our planet. Is 21st-century battery technology the foundation on which our low-carbon future will be built? *The Electric Battery: Charging Forward to a Low-Carbon Future* documents the long history of the battery and identifies the reasons it is now a key to achieving a low-carbon world. The book provides an unprecedented and easy-to-understand explanation of both the policy issues and technological challenges facing the battery in the quest to significantly reduce humanity's collective carbon footprint on the earth. Readers will be able to intelligently evaluate the chances of electric storage batteries ultimately becoming as mainstream as petroleum-product-fueled infrastructure and vehicles. The chapters in the book break down the complexity of the technology and elucidate the historic confluence of events that makes battery technology economically viable to any reader looking to understand the technological and policy breakthroughs that could enable a low-carbon future—for this generation as well as for subsequent ones.
