MONTESORI explained simply! Mathematics Wilhelm Weinhäupl ,2021-03-01 MONTESORI explained simply! - Mathematics - Booklet - February 2021 by Wilhelm Weinhäupl (author), Maria Neuhauser (author) Montessori materials are unique tools for the self-instruction of the child. However, they do not explain themselves. In order to work well with a material, the child needs an introduction that opens up the material and motivates to continue. This is the task of the pedagogues. Montessori, simply clear! - Mathematics shows in a clear and well-structured way how to work with the mathematics materials. For the two authors it was important to work out what the materials have in common, so that the constant ways of thinking and acting are clearly visible at a glance.

Snake Eyes: A universal RPG system Aron Christensen,Erica Lindquist,2023-04-10 A table-top role-playing game (TTRPG) combines improvisation, tactical gaming, and dramatic stories into a unique pastime that is gaining a well-deserved mainstream audience. There's never been a better time to pick up role-playing, but how to choose what game? There are so many game genres waiting for you, from high fantasy to science fiction and urban fantasy to high school romance and cosmic horror – plus everything beyond and in between. Many gaming systems pick one of these genres to help you build and enjoy a campaign, but every different system and every genre has something to offer. But Snake Eyes is a role-playing system designed to be flexible and to engage your creativity in building games and characters for any genre! A versatile magic system allows for epic fantasy, a mecha-construction system lets you create your own giant robots or science fiction starships, and a martial arts system gives you all the tools you need for an anime-style campaign! Snake Eyes supports any genre of game, but also different levels of complexity. For a simple game, use the stats only. Comfortable with that? Then add in skills. You can play with or without maps, or even without round-by-round combat at all with our crisis system. Or jump right into the middle of it all with traits and complications, custom attacks and equipment! The Snake Eyes system gives players and Storytellers alike not just the pieces to create campaigns, but guidelines for creating custom traits, complications and more. After all, no game system should limit your imagination.

Embedded Computer Systems: Architectures, Modeling, and Simulation Timo D. Härmäläinen,Andy D. Pimentel,Jarmo Takala,Stamatis Vassiliadis,2005-07-11 The SAMOS workshop is an international gathering of highly qualified researchers from academia and industry, sharing in a 3-day lively discussion on the quiet and - spiring northern mountainside of the Mediterranean island of Samos. As a tradition, the workshop features workshop presentations in the morning, while after lunch all kinds of informal discussions and nut-cracking gatherings take place. The workshop is unique in the sense that not only solved research problems are presented and discussed but also (partly) unsolved problems and in-depth topical reviews can be unleashed in the scientific arena. Consequently, the workshop provides the participants with an environment where collaboration rather than competition is fostered. The earlier workshops, SAMOS I–IV (2001–2004), were composed only of invited presentations. Due to increasing expressions of interest in the workshop, the Program Committee of SAMOS V decided to open the workshop for all submissions. As a result the SAMOS workshop gained an immediate popularity; a total of 114 submitted papers were received for evaluation. The papers came from 24 countries and regions: Austria (1), Belgium (2), Brazil (5), Canada (4), China (12), Cyprus (2), Czech Republic (1), Finland (15), France (6), Germany (8), Greece (5), Hong Kong (2), India (2), Iran (1), Korea (24), The Netherlands (7), Pakistan (1), Poland (2), Spain (2), Sweden (2), Taiwan (1), Turkey (2), UK (2), and USA (5). We are grateful to all of the authors who submitted papers to the workshop.
