Thomas G. Burton

The Black Mamba Lisa Owings,2007-01-01 Black mambas give snakes a bad name. They are aggressive and have a bite that is usually a death sentence. Their venom is 10 to 15 times stronger than a rattlesnake's! Tread carefully as you move from page to page. The black mambas inside are ready to strike!

Serpent-handling Believers Thomas G. Burton,1993 Burton seeks to present a balanced view of the remote churches of East Tennessee where believers take literally the words of Saint Mark: and they shall take up serpents; and if they drink any deadly thing, it shall not hurt them.

Dissolving Binding Theory Johan Rooryck,Guido Vanden Wyngaerd,2011-07-28 This book examines the distribution and interpretation of anaphors and pronouns. Through a detailed analysis of simplex and complex anaphors in Dutch and English, as well as other Romance and Germanic languages, the authors show that the relationship between an anaphor and its antecedent can be captured in terms of general Minimalist principles.

Implementing a 21st Century Competency-Based Curriculum Through Lesson Study Eric C.K. Cheng,Bruce Lander,2024-03-12 Drawing from a comprehensive collection of university-funded teaching development projects, this edited volume explores the theories and practices behind developing pedagogies through Lesson Study for a 21st-century curriculum. It encompasses various aspects such as lesson observation, assessment literacy, online teaching pedagogy, values education, STEM education, language education, and mathematics education. The chapters investigate the application of Lesson Study in diverse contexts, highlighting its use in ICT-based teaching and learning environments, the development and refinement of e-pedagogies, as well as the integration of AI in education. Through these cases, the content demonstrates how Lesson Study empowers teachers to craft pedagogies that enhance student learning, while emphasizing its pivotal role as an innovative approach to address the evolving landscape of education in this digital era. Implementing a 21st Century Competency-Based Curriculum Through Lesson Study is the first to address the academic discussion of using Lesson Study to develop pedagogies for effective curriculum implementation to tackle the impact of Industry 4.0 on school education. It offers valuable insights, reflections, and practical guidance to policy makers, school leaders, teacher educators, and teachers who are dedicated to enhancing student learning and nurturing the essential skills required for success in the 21st century.

Research Methods in Second Language Psycholinguistics Jill Jegerski,Bill VanPatten,2013-12-17 Addressing a rapidly growing interest in second language research, this hands-on text provides students and researchers with the means to understand and use current methods in psycholinguistics. With a focus on the actual methods, designs, and techniques used in psycholinguistics research as they are applied to second language learners, this book offers the practical guidance readers need to determine which method is the best for what they wish to investigate as well as the tools that will enhance their research. Each methods chapter is written by a leading expert who describes, discusses, and comments on how a method is used and what its strengths and limitations are for second language research. These chapters follow a specific format to ensure cohesion and a predictable structure across all chapters. The chapters also inform the novice researcher on such key issues as ease of use, costs, potential pitfalls, and other related matters, each of which impact decisions that researchers make about the paths they take. With the most reliable information available from experienced reseachers, Research Methods in Second Language Psycholinguistics is an essential resource for anyone interested in conducting second language reserach using psycholinguistic methods.

College Writing Skills Peder Jones,Jay Farness,2002-10 College Writing Skills uses explanation, demonstration, and practice to teach skills essential to success in college writing. For this course Peder Jones and Jay Farness have constructed a framework of rhetoric--work in composing paragraphs and essays--around disciplined study of sentences and words. The authors have sought in each section of the book to combine the most useful features of contemporary and traditional approaches to college English. Their overall aim is to enable the beginning college writer to compose clear and effective sentences, paragraphs, and compositions. This new edition of College Writing Skills is a refinement of the four previous editions; it has been shaped by helpful comments from students and instructors who have used the course. Exercises have been updated, and many minor changes for clarity have been made. Basic features of this text have not changed, however. As a hybrid of textbook and workbook, it continues to stress focused practice leading to directed independent composing activities; it emphasizes student writing rather than students reading about writing. This emphasis translates into more than 500 sets of exercises, more than 100 optional workshop activities, and an Appendix covering special problems in the acquisition of English. The exercises in this textbook embody our belief that practice is crucial to improving one's writing skills. Accordingly, this text provides practice in forming ideas, in getting ideas out of one's head and onto paper, in experimenting with various sentence structures in order to achieve clarity, in following models of correct grammar and effective style, and in making the writing process pay off through effective revision and editing. Modality in Underdescribed Languages Jozina Vander Klok,Núbia Ferreira Rech,Simone Guessier,2022-11-07 Current semantic fieldwork research has shown that the study of modality cannot be conducted via translation alone, yet much of what we know about modal expressions across the world’s language is still translation-based. This book aims to facilitate the study of modality across more diverse languages and a wider participant base by explaining and illustrating a nuanced set of methods, including storyboards, questionnaires, corpora research, experimental tasks, as well as a discussion of practical semantic fieldwork techniques. The methodological protocols tested and employed by the authors on underdescribed languages - spanning seven different language families - are intended to be applicable as cross-linguistic tools, while also indicating the successes and challenges of their contributions. Expanding the study of modality to a wider set of underdescribed languages will undoubtedly bring new insights into our theoretical understanding of modality and deepen our understanding of a cross-linguistic typology of modal expressions.
