**Water, Creativity and Meaning** Liz

Roberts, Katherine Phillips, 2018-08-06 At a time of great turmoil and crisis, environmentally, socially and politically, water has emerged as a topic of huge global concern. Moreover, many argue that what is needed in order to change our relationship with the environment is a cultural paradigm shift. To this end, this volume brings together diverse approaches to exploring human relationships with the watery world and the other living things that rely upon it. Through exploring multiple creative ways of engaging with water and people, the volume adds to the current zeitgeist of writing about water by expanding the discussion about this vital substance and how, as humans, we relate to it. Chapters focus on creative explorations and explorations of creativity in relation to developing these understandings, including concepts such as hydrocitizenship and responses to drought and flooding. Drawing on the in-depth research and experience of arts practitioners including participatory artists, as well as academics from a variety of fields including geography, anthropology, health studies and environmental humanities, the book provides a rich and multidisciplinary perspective on water

and creative ways of engaging and understanding human–water relationships. It represents a valuable source and inspiration for academics, arts practitioners and those involved in environmental policy and governance.

When visualising information for advocacy these are the factors we need to consider. In this guide we explore how to influence issues using the right combination of information, design, technologies and networks. Through over 60 examples of visual information campaigns from around the world we show how they capture attention, present stories and take us on journeys through data.
