DJ Losen

Who Controls the Internet? Jack Goldsmith, JACK L AUTOR GOLDSMITH, Tim Wu, 2006-03-17 In this provocative new book, the authors tell the fascinating story of the Internet's challenge to governmental rule in the 1990s, and of the fate of one idea--that the Internet might liberate users forever from government, borders, and even their physical selves.

Snappsy the Alligator (Did Not Ask to Be in This Book) Julie Falatko, 2016-02-02 Snappsy the alligator is having a normal day when a pesky narrator steps in to spice up the story. Is Snappsy reading a book ... or is he making CRAFTY plans? Is Snappsy on his way to the grocery store ... or is he PROWLING the forest for defenseless birds and fuzzy bunnies? Is Snappsy innocently shopping for a party ... or is he OBSESSED with snack foods that start with the letter P? What's the truth? Snappsy the Alligator (Did Not Ask to Be in This Book) is an irreverent look at storytelling, friendship, and creative differences, perfect for fans of Mo Willems.

Access Controlled Ronald Deibert, John Palfrey, Rafal Rohozinski, Jonathan Zittrain, 2010-04-02 Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content, and online surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at

key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks, surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a combination of technical interrogation and field research methods.

The Control Revolution How The Internet Is Putting Individuals In Charge And Changing The World We Know Andrew L. Shapiro, 1999 Dissidents around the world use the Internet to evade censorship and get their message out.
