**Snapshots of Hope** Richmond Webster, 2005-09-01

Snapshots of Hope is a series of reflections on hope, a timely subject in today's world. Written by an excellent storyteller, this collection features stories of ordinary people trying to find hope in the midst of chaos, challenging times, and everyday living. A little girl, a crossing guard at school, gets a spot where no one ever needs help, so she turns her job into one of waving all at the cars and welcoming everyone as they come to school. An old man who stubbornly sits on a rocking chair in his driveway in the midst of a flooded town gives the rest of the town's residents the courage to come home and start cleaning up. Hope, it would seem, is everywhere, even in the most unlikely places. Told in a simple and charming voice, Snapshots of Hope will provide inspiration—and a few giggles—for its readers.

**Photography: Theoretical Snapshots** J.J.

Long, Andrea Noble, Edward Welch, 2009-06-02 Over the past twenty-five years, photography has moved to centre-stage in the study of visual culture and has established itself in numerous disciplines. This trend has brought with it a diversification in approaches to the study of the photographic image. Photography: Theoretical Snapshots offers exciting perspectives on photography theory today from some of the world's leading critics and theorists. It introduces new means of looking at photographs, with topics including: a community-based understanding of Spencer Tunick's controversial installations the tactile and auditory dimensions of photographic viewing snapshot photography the use of photography in human rights discourse. Photography: Theoretical Snapshots also addresses the question of photography history, revisiting the work of some of the most influential theorists such as Roland Barthes, Walter Benjamin, and the October group, re-evaluating the neglected genre of the carte-de-visite photograph, and addressing photography's wider role within the ideologies of modernity. The collection opens with an introduction by the editors, analyzing the trajectory of photography studies and theory over the past three decades and the ways in which the discipline has been

constituted. Ranging from the most personal to the most dehumanized uses of photography, from the nineteenth century to the present day, from Latin America to Northern Europe, Photography: Theoretical Snapshots will be of value to all those interested in photography, visual culture, and cultural history.

Snapshots of the Soul Molly Thomasy

Blasing, 2021-07-15 Snapshots of the Soul considers how photography has shaped Russian poetry from the early twentieth century to the present day.

Drawing on theories of the lyric and the elegy, the social history of technology, and little-known archival materials, Molly Thomasy Blasing offers close readings of poems by Boris Pasternak, Marina Tsvetaeva, Joseph Brodsky, and Bella Akhmadulina, as well as by the late and post-Soviet poets Andrei Sen-Sen'kov, Arkadii Dragomoshchenko, and Kirill Medvedev, to understand their fascination with the visual language, representational power, and metaphorical possibilities offered by the camera and the photographic image. Within the context of long-standing anxieties about the threat that visual media pose to literary culture, Blasing finds that these poets were attracted to the affinities and tensions that exist between the lyric or elegy and the snapshot. Snapshots of the Soul reveals that at the core of each poet's approach to writing the photograph is the urge to demonstrate the superior ability of poetic language to capture and convey human experience.

Digital Scenography in Opera in the Twenty-First

Century Caitlin Vincent, 2021-09-15 Digital Scenography in Opera in the Twenty-First Century is the first definitive study of the use of digital scenography in Western opera production. The book begins by exploring digital scenography's dramaturgical possibilities and establishes a critical framework for identifying and comparing the use of digital scenography across different digitally enhanced opera productions. The book then investigates the impacts and potential disruptions of digital scenography on opera's longstanding production conventions, both on and off the stage. Drawing on interviews with major industry practitioners, including Paul Barritt, Mark Grimmer, Donald Holder, Elaine J. McCarthy, Luke Halls, Wendall K. Harrington, Finn Ross, S. Katy Tucker, and Victoria 'Vita' Tzykun, author Caitlin Vincent identifies key correlations between the use of digital scenography in practice and subsequent impacts on creative hierarchies, production design processes, and organisational management. The book features detailed case studies of digitally enhanced productions premiered by Dutch National Opera, Komische Oper Berlin, Opéra de Lyon, The Royal Opera, Covent Garden, San Francisco Opera, Santa Fe Opera, Théâtre Royal de la Monnaie, The Metropolitan Opera, Victorian Opera, and Washington National Opera.
