Children's Early Text Construction Clotilde Pontecorvo, Margherita Orsolini, Barbara Burge, Lauren B. Resnick, 2014-02-04 For decades, research on children's literacy has been dominated by questions of how children learn to read. Especially among Anglophone scholars, cognitive and psycholinguistic research on reading has been the only approach to studying written language education. Echoing this, debates on methods of teaching children to read have long dominated the educational scene. This book presents an alternative view. In recent years, writing has emerged as a central aspect of becoming literate. Research in cognitive psychology has shown that writing is a highly complex activity involving a degree of planning unknown in everyday conversational uses of language. At the same time, developmental studies have revealed that when young children are asked to write, they show a surprisingly sophisticated understanding of the representational constraints of alphabetic writing systems. They show this understanding long before they can read conventional writing on their own. The rich structure of meanings involved in the word text provided the glue that brought together a group of scholars from several disciplines in an international workshop held in Rome. Reflecting the state of the field at the time, the majority of the workshop participants were scholars working in languages other than English, especially the romance languages. Their work mirrors a linguistic and psychological research tradition that Anglophone scholars knew little of until recently. This volume provides English-language readers with updated versions of the papers presented at the meeting. The topics discussed at the workshop are represented in the chapters as follows: * the relationship between acquisition of language and familiarity with written texts; * the reciprocal permeability between spoken and written language; * the initial phases of text construction by children; and * the educational conditions that facilitate written language acquisition and writing practice.

Celebrating Ethnicity and Nation Jürgen Heideking, Geneviève Fabre, Kai Dreisbach, 2001 Arising out of the context of the reconfiguration of Europe, new perspectives are applied by the authors of this volume to the process of nation-building in the United States. By focusing on a variety of public celebrations and festivities from the Revolution to the early twentieth century, the formative period of American national identity, the authors reveal the complex interrelationships between collective identities on the local, regional, and national level which, over time, shaped the peculiar character of American nationalism. This volume combines vivid descriptions of various public celebrations with a sophisticated methodological and theoretical approach.

The Great Sports Documentaries Michael Peters, 2018-01-16 Sports and competition have been film subjects since the dawn of the medium. Olympic sports documentaries have been around nearly as long as the games themselves; films about surfing, boxing, roller derby, motorcycle racing and bodybuilding were theatrical successes during the 1960s and 1970s. The author surveys the history of the sports documentary subgenre, covering more than 100 award-winning films of 40+ different competitions, from traditional team sports to dogsled racing to ballroom dancing.

Ice and Snow in the Cold War Julia Herzberg, Christian Kehrt, Franziska Torma, 2018-10-19 The history of the Cold War has focused overwhelmingly on statecraft and military power, an approach that has naturally placed Moscow and Washington center stage. Meanwhile, regions such as Alaska, the polar landscapes, and the cold areas of the Soviet periphery have received little attention. However, such environments were of no small importance during the Cold War: in addition to their symbolic significance, they also had direct implications for everything from military strategy to natural resource management. Through histories of these extremely cold environments, this volume makes a novel intervention in Cold War historiography, one whose global and transnational approach undermines the simple opposition of "East" and "West."

Winter Adam Gopnik,2011-08-24 The 2011 CBC Massey Lectures celebrates fifty years with bestselling author, essayist, cultural observer, and famed New Yorker contributor Adam Gopnik, whose subject is winter -- the season, the space, the cycle. Gopnik takes us on an intimate tour of the artists, poets, composers, writers, explorers, scientists, and thinkers, who helped shape a new and modern idea of winter. Here we learn how a poem by William Cowper heralds the arrival of the middle class; how snow science leads to existential questions of God and our place in the world; how the race to the poles marks the human drive to imprint meaning on a blank space. Gopnik's kaleidoscopic work ends in the present day, when he traverses the underground city in Montreal, pondering the future of Northern culture. A stunningly beautiful meditation buoyed by Gopnik's trademark gentle wit, Winter is at once an enchanting homage to an idea of a season and a captivating journey through the modern imagination. This deluxe 50th anniversary edition includes full-colour images printed on two 8-page inserts.

The Smalbanac Christine M. Garretson-Persans, 2010-03-15 A quirky yet practical guide to the Capital Region. Let the Swords Encircle Me Scott Peterson, 2010-09-21 NO OTHER COUNTRY SO DOMINATES THE HEADLINES: Iran is portrayed as a nuclear threat, a terrorist nation, a charter member of the Axis of Evil bent on the destruction of Israel. But behind those headlines—and the fierce rhetoric of Iran's most hard-line leaders—is a proud nation with a 2,500-year history of Persian poetry, art, and passion. Based on more than thirty extended reporting trips to Iran, including the turbulent aftermath of the disputed June 2009 election, Scott Peterson's portrait is the definitive guide to this enigmatic nation, from the roots of its incendiary internal struggles to the rise and slide of Iran's earthshaking 1979 Islamic Revolution. This prize-winning American journalist with unparalleled experience in Iran takes us there, inside a country where an educated and young population is restlessly eager to take its

place in the world; where martyrs of the sacred Iran-Iraq War are still mourned with tears of devotion; where the cultural and religious forces of light and darkness are locked in battle. Peterson brings stunningly alive the diversity within Iran—from the hardliners who shout Death to America to the majority who comprise the most pro-American population in the Middle East. Let the Swords Encircle Me gives voice to Iranians themselves—the clerics and the reformers, the filmmakers and the journalists, the True Believers and their Westernized and profane brethren—to understand the complexities of Iran today. Through dedicated and in-depth reporting, Peterson shows how every word, image, and sensibility in Iran is often deliciously unexpected and counterintuitive. Ideology matters. So does resistance. And azadi: freedom. Peterson deftly holds a mirror up to both sides of the U.S.-Iran conflict. Americans and Iranians, he writes, share a belief in their own exceptionalism and manifest destiny (which for Iran includes its nuclear ambitions) and frequent need of an enemy in political discourse. The same elements that have locked the United States and Iran in the most vicious of struggles—stretching back to the 1953 CIA coup in Tehran and the 1979 U.S. Embassy hostage saga—are the same ones that could one day make Iran and the United States the most natural allies in the region. In this critical and personal account, Peterson illumines the latest episodes of Iran's century-old quest for democracy and freedom. He explains how the Islamic Revolution—launched as a beacon of justice and resistance for Iranians and all the world's Muslims—has not lived up to its ambitious promise. He shows how the violence of 2009 damaged the regime's legitimacy and marks the start of an irreversible decline. Let the Swords Encircle Me takes us into the minds and hearts of Iranians today, and will be a crucial guide as Americans and Iranians attempt to overcome their bitter estrangement.
