Asian Digital Libraries. Looking Back 10 Years and Forging New Frontiers Dion Hoe Lian Goh,Tru Hoang Cao,Ingeborg Sølvsberg,Edie Rasmussen,2008-01-22 This book constitutes the refereed proceedings of the 10th International Conference on Asian Digital Libraries, ICADL 2007, held in Hanoi, Vietnam, in December 2007. The 41 revised full papers, 15 revised short papers, and extended abstracts of 10 poster papers presented together with three keynote and three invited papers were carefully reviewed and selected from a total of 154 submissions. The papers are organized in topical sections.

Social Media Tools and Platforms in Learning Environments Bebo White,Irwin King,Philip Tsang,2011-09-20 Online social media have transformed the face of human interaction in the 21st century. Wikis, blogs, online groups and forums, podcasts, virtual worlds, and social tagging are but a few of the applications enabling innovative behaviors that support acquisition, access, manipulation, retrieval, and visualization of information. It is, therefore, no surprise that educational practitioners and theorists have begun to explore how social media can be harnessed to describe and implement new paradigms for communication, learning, and education. The editors' goal in publishing this book was to identify original research on the application of online social media and related technologies in education as well as emerging applications in Web technologies that could provide and shape future educational platforms. The selected contributions deal with questions such as how social media can truly enrich and enhance learning and teaching experiences in ways not otherwise possible; how learning can be integrated in a

distributed and ubiquitous social computing environment; or what theories, paradigms, and models are applicable for the support of social computing in education. Researchers in education or educational software will find interesting and sometimes provocative chapters on paradigms and methodologies, virtual and mobile learning spaces, and assessment and social factors. Practitioners in these fields will benefit from an additional section devoted to case studies and first experience reports.

From Web to Social Web: Discovering and Deploying User and Content Profiles Bettina Berendt, Andreas Hotho, Dunja Mladenic, Giovanni Semeraro, 2007-09-04 This book constitutes the refereed proceedings of the Workshop on Web Mining, WebMine 2006, held in Berlin, Germany, September 2006. Topics included are data mining based on analysis of bloggers and tagging, web mining, XML mining and further techniques of knowledge discovery. The book is especially valuable for those interested in the aspects of Web 2.0 and its inherent dynamic and diversity of user-generated content.

Social Bookmarking Kevin Roebuck, 2011 Social bookmarking is a method for Internet users to organize, store, manage and search for bookmarks of resources online. Unlike file sharing, the resources themselves aren't shared, merely bookmarks that reference them. Descriptions may be added to these bookmarks in the form of metadata, so users may understand the content of the resource without first needing to download it for themselves. Such descriptions may be free text comments, votes in favour of or against its quality, or tags that collectively or collaboratively become a folksonomy. Folksonomy is also called social tagging, the process by which many users add metadata in the form of keywords to shared content. This book is your ultimate resource for

Social Bookmarking. Here you will find the most up-to-date information, analysis, background and everything you need to know. In easy to read chapters, with extensive references and links to get you to know all there is to know about Social Bookmarking right away, covering: Social bookmarking, Comparison of enterprise bookmarking platforms, Enterprise bookmarking, List of social bookmarking websites, Social bookmark link generator, 2collab, A.nnotate, AddThis, AddToAny, Areapal, BibSonomy, BookmarkSync, Broowaha, CiteULike, Cleeng, Connotea, Delicious (website), Digg, Diigo, Faves.com, Flattr, Folkd, Folksonomy, Furl, GiveALink.org, Gnolia, Google Bookmarks, Hacker News, Licorize, Linkwad, MemeStreams, Meneame, Mister Wong, Models of collaborative tagging, NewsTrust, Newsvine, Ngbot mobile, Oneview, PopUrls, Propeller.com, Reddit, Scuttle (software), ShareThis, Simpy, SiteBar, StumbleUpon, Sturvs, Taringa!, Twine (website), Wink Technologies, Yahoo! Buzz, Yarbarker This book explains in-depth the real drivers and workings of Social Bookmarking. It reduces the risk of your technology, time and resources investment decisions by enabling you to compare your understanding of Social Bookmarking with the objectivity of experienced professionals.

Leading Issues in Social Knowledge Management

David Gurteen, 2012-01-01 Perhaps one of the most surprising if not actually unsettling things about the Internet and the Web is that there is always something new on the horizon and that it is very difficult to see where this new technology will take us. When ICT was just about big computers and organisational systems it was pretty obvious where the technology was moving us. We all knew about Moore's Law and that we were going to have greater capacity, smaller and faster devices every year. And during

the 1990s and the first decade of the third millennium we all became used to what the Internet and the Web had to offer. But Social Software in the form of Web 2.0 is different. It has put technology in the hands of people who we would never have given it a second thought a few years ago. Leading Issues in Social Knowledge Management contains leading edge research which addresses some of the main issues for those of us who want to use Social Software in a Knowledge Management context or who want to study it or research it. There are 10 research papers as well as an introduction from David Gurteen who is a leading thinker in this field.

Social Software in Libraries Meredith G. Farkas, 2007 Social software lets libraries show a human face online, helping them communicate, educate, and interact with their communities. This nuts-and-bolts guide provides librarians with the information and skills necessary to implement the most popular and effective social software technologies: blogs, RSS, wikis, social networking software, screencasting, photo-sharing, podcasting, instant messaging, gaming, and more. Success stories and interviews highlight these tools ease-of-use and tremendous impact.

On Collective Intelligence Theo J Bastiaens, Ulrike Baumöl, Bernd Krämer, 2010-10-12 Welcome to the proceedings of the inaugural Symposium on Collective Intelligence (COLLIN 2010). This was the first of a new series of events that will evolve over the coming years, and we were happy to hold the event in Hagen where the idea for this symposium was born. The participants visited Hagen in April, with excellent opportunities to get rain, wind and sun. Collective intelligence denotes a phenomenon according to which the purposeful interaction between individuals creates intelligent solutions and behaviors that might not have come to existence without this concerted effort of a community. The members of such communities form a social network, typically over the Internet. They are engaged with each other over a sustained period of time to develop an area of innovation through collaboration and exchange of ideas, experiences and information. Leading-edge information and communication technologies (ICT) offer ample opportunities for enabling collective intelligence. COLLIN aims to become the flagship conference in the areas collective intelligence and ICT-enabled social networking, which is attracting more and more researchers and practitioners from both academia and industry.

Small-business Guide to Winning at Web Marketing

Cyndie Shaffstall,2010-05-05 If you're launching a new company or becoming a self-employed entrepreneur, then this book is for you. Small-business Guide to Winning at Web Marketing will help you to understand the electronic and traditional marketing landscapes and show how you can use them to benefit and grow your business. Today's marketing is a lot like playing pinball. It's not a straight shot - you have to bounce around a lot to really rack up the points and since some pins are worth more than others, you need a certain amount of skill and luck to be able to ping them more than once. In this book, you'll learn the game basics, some strategy, and a few tricks, but mastering pinball -- web marketing -- will depend entirely on how long you can keep the ball in play. I've spent 30 years as an entrepreneur - where you do it yourself because you don't have the budget for otherwise. There are thousands of search-engine optimization services that you can enlist, but you should understand the options available. There is so much where you can contribute and this will reduce the financial impact on your company that expensive contractors can have. This book starts with your web site and rolls right on through social media, social bookmarking, blogging, press releases, news announcements, printed material, QR codes, and much more. Don't flounder - you don't have time. Get this book and win at web marketing.
