The Other Side of Russia Sharon

Hudgins,2004-04-21 Travel to post Soviet Siberia and the Russian Far East with author Sharon Hudgins as she takes readers on a personal adventure through the Asian side of Russia—an area closed to most Westerners and many Russians prior to the 1990s. Even today, few people from the West have ridden the TransSiberian railroad in winter, stood on the frozen surface of Lake Baikal, feasted with the Siberian Buryats, or lived in the highrise villages of Vladivostok and Irkutsk. One of the few American women who has lived and worked in this part of the world, Hudgins debunks many of the myths and misconceptions that surround this other side of Russia. She artfully depicts the details of everyday life, set within their cultural and historical context—local customs, foods, and festivals, as well as urban life, the education system, and the developing market economy in postSoviet Siberia and the Russian Far East. Hudgin's prose shines in her colorful descriptions of multicourse meals washed down with champagne and vodka, often eaten by candlelight when the electricity failed. The author's accounts of hors d'oeuvres made of sea slugs and roulades of raw horse liver will fascinate those with adventuresome tastes, while her stories of hosting Spanish, French, and TexMex feasts will come as a

surprise to anyone who thinks of Russia as a gastronomic wasteland. Readers of *The Other Side of Russia: A Slice of Life in Siberia and the Russian Far East* will find themselves among the guests at Christmas parties, New Year's banquets, Easter dinners, and birthday celebrations. They will experience the challenges of living in highrise apartment buildings often lacking water, heat, and electricity. Above all, Asian Russia's natural beauty, thriving cities, and proud people shine from the pages, proving it is not only a land of harsh winters and vast uninhabited spaces, but also home to millions of Russian citizens who live and work in modern metropolises and enjoy a rich cultural and social life.

The Political Theory of Animal Rights Robert Garner, 2005-07-22 Looking at the impact on political thinking caused by the idea that animals are morally important beings, this text suggests that liberalism, despite having weaknesses, is the most appropriate ideological position for the protection of animal interests.

Labour and the Countryside Clare V. J. Griffiths, 2007-05-10 The common reputation of the British Labour Party has always been as 'a thing of the town', an essentially urban phenomenon which has failed to engage with the rural electorate or identify itself with rural issues. Yet during the inter-war years, Labour viewed the countryside as a crucial electoral battleground - even claiming that the party could never form a majority administration without winning a

significant number of seats across rural Britain. Committing itself to a series of campaigns in rural areas during the 1920s and 30s, Labour developed a rural and often specifically agricultural programme on which to attract new support and members. Labour and the Countryside takes this forgotten chapter in the party's history as a starting point for a fascinating and wide-ranging re-examination of the relationship between the British Left and rural Britain. The first account of this aspect of Labour's history, this book draws on extensive research across a wide variety of original source material, from local party minutes and trade union archives to the records of Labour's first two periods in government.

Historical, literary, and visual representations of the countryside are also examined, along with newspapers, magazines, and propaganda materials. In reconstructing the contexts within which Labour attempted to redefine itself as a voice for the countryside, the resulting study presents a fresh perspective on the political history of the inter-war years.

The Tyranny of Socialism ... Yves Guyot, 1894

The Atlantic Provinces in Confederation Ernest R. Forbes, Delphin A. Muise, 1993-12-15 Canada's four easternmost provinces, while richly diverse in character and history, share many elements of their political and economic experience within Confederation. In this volume thirteen leading historians explore the shifting tides of Atlantic Canada's history, beginning with the union of Nova Scotia and New Brunswick with Ontario and Quebec to form the Dominion in 1867. Continuing on

through Prince Edward Island's entry into Confederation six years later and Newfoundland's in 1949, they take the story of Atlantic Canada up to the 1980s. Collectively their work sheds light on the complex political dynamic between the region and Ottawa and reveals the roots of current social and economic realities. Fragmentation versus integration, plenty versus scarcity, centre versus periphery, and other models inform their analysis. The development of regional disparity, and responses to it, form a major theme. The tradition of regional protest by Maritimers, and later Atlantic Canadians, runs deep; so does their commitment to the idea of an integrated Canadian nation. Protests, over the decades, have primarily been expressions of frustration at perceived exclusion from the full benefits of national union. The creation of national markets for labour, capital, and goods often operated to their detriment, and political decisions at the national level frequently reinforced rather than alleviated the regional predicament. More than an account of the wealthy and powerful, this book often places ordinary men and women at the centre of the story. Above all, it reveals the resilience of Atlantic Canadians as they have struggled to overcome their problems and to share in the benefits of life in the Canadian community.

The Geography of Environmental Crime Gary R. Potter, Angus Nurse, Matthew Hall, 2016-06-30 This book critically examines both theory and practice around conservation crimes. It engages with the full complexity of environmental crimes and different responses to them, including: poaching,

conservation as a response to wildlife crime, forest degradation, environmental activism, and the application of scientific and situational crime prevention techniques as preventative tools to deal with green crime. Through the contributions of experts from both the social and ecological sciences, the book deals with theoretical and practical considerations that impact on the effectiveness of contemporary environmental criminal justice. It discusses the social construction of green crimes and the varied ways in which poaching and other conservation crimes are perceived, operate and are ideologically driven, as well as practical issues in environmental criminal justice. With contributions based in varied ideological perspectives and drawn from a range of academic disciplines, this volume provides a platform for scholars to debate new ideas about environmental law enforcement, policy, and crime prevention, detection and punishment.

Issues in Green Criminology Piers Beirne, Nigel South, 2013-09-05 Explores the ways in which governments, transnational corporations, military apparatuses and ordinary people routinely harm environments, other animals and humanity.

Woman the Hunter Mary Zeiss Stange, 1998-07-01 Over two million American women hunt. By taking up weapons for the explicit purpose of killing, they

are shattering one of Western culture's oldest and most firmly entrenched taboos. The image of a woman 'armed and dangerous' is profoundly threatening to our collective psyche--and it is rejected by macho males and radical feminists alike. *Woman the Hunter* juxtaposes unsettlingly beautiful accounts of the author's own experiences hunting deer, antelope, and elk with an argument that builds on the work of thinkers from Aldo Leopold to Clarissa Pinkola Estes. Exploring how women and men relate to nature and violence, Mary Zeiss Stange demonstrates how false assumptions about women and about hunting permeate contemporary thought. Her book is a profound critique of our society's evasion of issues that make us uncomfortable, and it culminates in a surprising claim: that only by appreciating the value of hunting can we come to understand what it means to be human. Controversial and original, defying easy stereotypes, *Woman the Hunter* is sure to provoke strong reactions in almost every reader.

Geographies of Meat Harvey Neo, Jody Emel, 2017-03-16 With the ever rising demand for meat around the world, the production of meat has changed dramatically in the past few decades. What has brought about the increasing popularity and attendant normalization of factory farms across many parts of the world? What are some of the ways to resist such broad convergences in meat production and how successful are they? This book locates the answers to these questions at the intersection between the culture, science and political economy of meat production and

consumption. It details how and why techniques of production have spread across the world, albeit in a spatially uneven way. It argues that the modern meat production and consumption sphere is the outcome of a complex matrix of cultural politics, economics and technological faith. Drawing from examples across the world (including America, Europe and Asia), the tensions and repercussions of meat production and consumption are also analyzed. From a geographical perspective, food animals have been given considerably less attention compared to wild animals or pets. This book, framed conceptually by critical animal studies, governmentality and commodification, is a theoretically driven and empirically rich study that advances the study of food animals in geography as well as in the wider social sciences.

Lords and Lemurs Alison Jolly, 2004 Chronicles the rich human, plant, and animal diversity of this Isle off the East Coast of Africa, home to lemurs, unusual reptiles, and other creatures more at home in mythology than natural science.

Legitimacy in International Society I.
Miyaoka, 2003-11-24 Legitimacy in International Society addresses collective legitimization of emergent norms at international meetings and its effect on state behaviour. Drawing mainly on constructivist approaches in International Relations and social psychology, Isao Miyaoka discusses the international and domestic sources of legitimacy and the basic conditions under which collective legitimization matters for norm adoption. Three case studies examine Japan's responses to wildlife preservationist norms

against high seas driftnet fishing, scientific whaling and international trade in African elephant ivory.
