Thinking Kids' Math , Grade 1 Brighter Child, 2014-05-01 Thinking Kids' (R) Math is a fun and hands-on approach to learning math! Increase your first grader's critical thinking and problem solving skills with the colorful, interactive activities. Each activity supports early learning standards and uses a variety of manipulatives to encourage your child to connect with the math skills he or she is learning. In *Thinking Kids Math*, your child will learn about counting, place value, ordinal numbers, addition and subtraction, patterns, geometric shapes, graphing and measurement, and time. Thinking

Kids'(R) Math is a series of hands-on, manipulative math activities aligned to the Common Core State Standards. Each 192-page book consists of different types of grade-appropriate hands-on activities. This series was built on the idea that children learn math concepts best through hands-on experiences. These activities will provide hours of fun while encouraging Common Core Standards through active learning.

How Many Socks Make a Pair? Rob Eastaway, 2013-02-18 DIV How many socks make a pair? The answer is not always two. And behind this question lies a world of maths that can be surprising, amusing and even beautiful. Using playing cards, a newspaper, the back of an envelope, a Sudoku, some pennies and of course a pair of socks, Rob Eastaway shows how maths can demonstrate its secret beauties in even the most mundane of everyday objects. If you already like maths you'll discover plenty of new surprises. And if you've never picked up a maths book in your life, this one will change your view of the subject forever. /div

Socks Are Like Pants, Cats Are Like Dogs Malke Rosenfeld, Gordon Hamilton, 2016 Do you want your children to feel like algebra is beautiful, playful, and intuitive? *Socks Are Like Pants, Cats Are Like Dogs* inspires families and groups to play, solve, talk, and make math--together! The book is filled with a diverse collection of math games, puzzles, and activities exploring the mathematics of choosing, identifying and sorting. The activities inside are portable and easy to start. Many require little in the

way of materials and preparation. Teacher and parent tested in real classrooms and living rooms, the ideas in this book are created to encourage endless inventiveness and variation. Be inspired to play and create, again and again, each time with a different, perhaps surprising result. Don't hesitate--play math today!

Assessing Children'S Mathematical Knowledge Cooper, Barry,Dunne,

Mairead,1999-12-01 'this work is highly relevant to the proliferation of accountability measures worldwide' James Scheurich and Douglas Foley In many countries, the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects. In England, the majority of the items in such tests have set mathematical tasks in every day situations such as 'shopping'. This requires children to make decisions about whether to use or not their own every day knowledge and experience in their problem-solving. Some children are likely to have a better 'feel for this game' than others. Assessing Children's Mathematical Knowledge draws on the analysis of national curriculum test data from more than 600 children of 10-11 and 13-14 years of age, as well as in-depth interviews with 250 of these as they attempt to solve test problems, in order to explore the nature of the difficulties children experience with 'realistic' items. The book shows, by comparing test and interview data, that many children, as a consequence of their confusion over the requirements of 'realistic' test items, fail in tests to demonstrate mathematical knowledge and understanding that they actually possess. The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds, and across the sexes. The book will be of interest to academics and teachers studying for advanced degrees in mathematics education, sociology of education and educational assessment.
