Becoming a Digital Marketer Gil Gildner, Anya Gildner, 2021-03-17 In the rapidly paced world of marketing, fresh graduates and traditional marketers alike are learning that the industry is blending with technology at a rate never before seen. It's no longer enough to just be a traditional marketer: in today's tech-driven industry, you've got to be able to build websites, install analytics, run pay-per-click campaigns, join Twitter chats, understand SEO strategy, and experience the underrated power of email marketing. In Part 1, you'll learn the hard skills crucial to a marketing career, like: search engine optimization (SEO), pay-per-click advertising (PPC), social media marketing, reporting & analytics, web development, and email marketing. In Part 2, you'll read about the soft skills essential to business, like writing emails, getting your first entry level position, working as a marketing freelancer, starting your marketing agency, and how to work remotely. Also included are in-depth vignettes and interviews with renowned communicators for insightful alternate views on what makes a successful marketer. Authors Gil & Anya Gildner are the cofounders of Discosloth, a search marketing company that has worked with brands like Volvo, MSF, AirTreks, and have been featured in Inc Magazine, the New York Times, Arkansas Business, the Washington Post, and more. They regularly speak at industry conferences and conduct corporate & academic training seminars.

The Heart of Marketing Judith Sherven, Jim Sniechowski, 2009 This book is about marketing. But more important, this is a book about you, the soft sell marketer--your desire, as a service provider or care-giver, to market and sell your products and services online or off without compromising your personal or professional values. In short, it's about putting your heart into marketing. This book: Validates the power of heart-to-heart connections that lead to emotional authenticity and marketing believability, taking sales beyond mere commercial transactions into long-term customer relationships; Presents the principle that Selling Is Spiritual Service, healing the split soft sell marketers often feel between spirituality and sales; Sheds light on the internal aspects of marketing beginning with integrity and ending with a balance between commerce and conscience. Will open and inspire your soft sell imagination, setting the foundation for you to understand and profit from the practice of soft sell marketing.

Marketing Intelligent Systems Using Soft Computing Jorge Casillas, Francisco J. Martínez López, 2010-10-05 Dr. Jay Liebowitz Orkand Endowed Chair in Management and Technology University of Maryland University College Graduate School of Management & Technology 3501 University Boulevard East Adelphi, Maryland 20783-8030 USA jliebowitz@umuc.edu When I first heard the general topic of this book, Marketing Intelligent Systems or what I'll refer to as Marketing Intelligence, it sounded quite intriguing. Certainly, the marketing field is laden with numeric and symbolic data, ripe for various types of mining—data, text, multimedia, and web mining. It's an open laboratory for applying numerous forms of intelligentsia—neural networks, data mining, expert systems, intelligent agents, genetic algorithms, support vector machines, hidden Markov models, fuzzy logic, hybrid intelligent systems, and other techniques. I always felt that the marketing and finance domains are wonderful application areas for intelligent systems, and this book demonstrates the synergy between marketing and intelligent systems, especially soft computing. Interactive advertising is a complementary field to marketing where intelligent systems can play a role. I had the pleasure of working on a summer faculty fellowship with R/GA in New York City—they have been ranked as the top interactive advertising agency worldwide. I quickly learned that interactive advertising also takes advantage of data visualization and intelligent systems technologies to help inform the Chief Marketing Officer of various companies. Having improved ways to present information for strategic decision making through use of these technologies is a great benefit.
