The Hour of Decision Oswald Spengler,2022-03-04 Reprint Edition. First published in 1934, the majority of this book was developed just prior to the Nazi seizure of power, with additional material which reflects on its aftermath. It assessed the decline of European power and the crisis of Western civilization in the face of conflict between the ruling class and the lower classes, arguing that only by adherence to their inherited 'Prussianism' would Germany have the solidity to be able to combat these dangers. Despite the influence of his previous writings on key Nazi figures, his criticisms of National Socialism led to the book being banned, although not before it had been widely distributed throughout Germany. Contents: Introduction; The Political Horizon World Wars and World Powers The White World-Revolution The Colored World-Revolution; Indexution; Index

Sir Francis Galton, FRS Milo Keynes,1993-07-20 '...this is a splendid, first-class book, the definitive book on Francis Galton and his legacy. The editing has been superb...The timing of its publication is excellent in relation to the increasing interest in human genetics in all areas of the biological and behavioural sciences'.R.Plomin, Distinguished Professor and Director, Center for Development and Health Genetics, Pennsylvania State University Sir Francis Galton (1822-1911), a grandson of Erasmus Darwin, was one of the most versatile men of his time. In his twenties he won fame as an explorer. He worked at the prediction of weather, and described his discovery of the anticyclone He first became an anthropologist in 1862 when he joined the Ethnological Society. He initiated anthropometry and the measurement of human variation, and the use of photography for the analysis of differencies, or individual characteristics, in a group. He recognised the uniqueness of Finger Prints, and, in 1875, first used the records of pairs of identical twins in his researches into the laws of heredity. Besides contributions to human genetics, Galton devised the correlation coefficient, and was thus concerned with the advancement of statistics. In 1883, he coined the word eugenics by which he meant 'good in birth' and 'noble in heredity', and, in 1904, he founded the Galton Laboratory at University College, London. He was first President of the Eugenics Education Society in 1907.
