Advances in Simulation, Product Design and Development M. S. Shunmugam, M. Kanthababu, 2020-11-07 This volume comprises select proceedings of the 7th International and 28th All India Manufacturing Technology, Design and Research conference 2018 (AIMTDR 2018). The papers in this volume discuss simulations based on techniques such as finite element method (FEM) as well as soft computing based techniques such as artificial neural network (ANN), their optimization and the development and design of mechanical products. This volume will be of interest to researchers, policy makers, and practicing engineers alike.

Advances in Micro and Nano Manufacturing and Surface Engineering M. S. Shunmugam, M. Kanthababu, 2019-11-30 This volume presents research papers on micro and nano manufacturing and surface engineering which were presented during the 7th International and 28th All India Manufacturing Technology, Design and Research conference 2018 (AIMTDR 2018). The papers discuss the latest advances in miniature manufacturing, the machining of miniature components and features as well as improvement of surface properties. This volume will be of interest to academicians, researchers, and practicing engineers alike.

Over the Spectrum Philip Williams, 2022-08-08 Over the Spectrum was first published in 1982 and at the time was considered one of the best introductions to programming on Sir Clive Sinclair's incredible new home computer. Many who went on to have long careers in the computer industry started with the programs in this excellent book. As such it is not only a great re-print for purposes of nostalgia, but also a practical and helpful guide to anyone interested in the programming of retro games. As Personal Computer World stated at the time: *** Final entrant in the Spectrum stakes is Melbourne House's OVER THE SPECTRUM, and for me it runs out the clear winner. Not a teach-yourself-programming guide, it is a collection of programs: each program has a detailed breakdown of exactly what happens when and how it's all achieved. The listings are not trivial, and the result is well worth the effort. The book is liberally illustrated showing screen displays for almost all the programs so you know what you are trying to achieve at the outset. As a demonstration of what can be achieved using the Spectrum's User Defined Characters this book cannot be faulted, and although it contains no programming hints as such, a diligent reader is going to learn a lot about the Spectrum by working his or her way through it. Take a bow gents, and give us more. *** Acorn Books is proud to present its Retro Reproductions series, a collection of classic computing works from the 1980s and 90s, lovingly reproduced in the 21st century. From standards of programming reference no self-respecting microcomputer programmer would be without, to obscure works not found in print anywhere else, these modern reprints are perfect for any connoisseur of retro computing.

J2EE Professional Projects Shadab Siddiqui, Pallavi Jain, 2002 This title builds on the existing skills of intermediate Java developers and shows them how to build better and faster enterprise applications using a hands-on, project oriented approach.

High-Speed Machining Kapil Gupta, Paulo Davim, 2020-01-31 High-Speed Machining covers every aspect of this important subject, from the basic mechanisms of the technology, right through to possible avenues for future research. This book will help readers choose the best method for their

particular task, how to set up their equipment to reduce chatter and wear, and how to use simulation tools to model high-speed machining processes. The different applications of each technology are discussed throughout, as are the latest findings by leading researchers in this field. For any researcher looking to understand this topic, any manufacturer looking to improve performance, or any manager looking to upgrade their plant, this is the most comprehensive and authoritative guide available. Summarizes important R&D from around the world, focusing on emerging topics like intelligent machining Explains the latest best practice for the optimization of high-speed machining processes for greater energy efficiency and machining precision Provides practical advice on the testing and monitoring of HSM machines, drawing on practices from leading companies

I Murdered Your Mother, I Think? Robert Beckstedt, 2018-11-30 Maria the nurse and nanny - invoking Haitian Voodoo to protect those she loves from her damaged, violent sister Andrea. And Michael - the wealthy man between them, fighting desperately to save his baby son and escape with the sister he truly loves. This exhilarating saga of love and revenge sweeps us from Hispaniola in 1916, where the sisters' family originated in poverty and slavery, to the lurking drug culture of Balboa, Panama, and finally, to the United States. The ripples of the sisters' family history spread insidiously and threaten all that Michael has built. Will the Voodoo that was meant to protect save them? Or will it finally bring disaster upon Michael, Maria, and everything they love?

Women in the Sun, Linen in the Wind María Claudia Otsubo, 2018-10-30 These fifteen short stories dive deeply into reality looking to pull out new senses. They have the ability to show - especially what cannot be told. Tales of the feminine world, the natural world and of freedom (or the lack of it) open up the blinds to let us see beyond everyday's acts and wordly rites; to let us see beyond words and gestures.

Light Weight Materials Kaushik Kumar, Bathini Sridhar Babu, J. Paulo Davim, 2022-01-26 In the automotive and aerospace industries, the need for

strong yet light materials has given rise to extensive research into aluminum and magnesium alloys and formable titanium alloys. All of these are categorized as light weight materials. The distinguishing feature of light weight materials is that they are low density, but they have a wide range of properties and, as a result, a wide range of applications. This book provides researchers and students with an overview of the recent advancements in light weight material processing, manufacturing and characterization. It contains chapters by eminent researchers on topics associated with light weight materials, including on the current buzzword "composite materials". First, this book describes the current status of light weight materials. Then, it studies applications of these materials, given that, as the densities vary, so do the applications, ranging from automobiles and aviation to bio-mechatronics. This book will therefore serve as an excellent guide to this field.

Fist of the Blue Sky Nobu Horie, Buronson, 2004-03 It is just before World War II and Kasumi Kenshiro hides as a quiet, absent-minded professor teaching literature at a small women's college in Tokyo. Once the 62nd Grand Master of Kohuto Shinken, God Fist of the North Star, and known as Yan Wang, or the king of Death who preserved the peace in the City of Devils, a fighter of thugs and drug dealers, Kasumi now seeks anonymity and a quiet life until the death of his lover, and former brothers, forces him to return to Shanghai to fulfill his destiny and avenge the deaths of his associates.
