Producing Open Source Software Karl Fogel, 2005-10-07 The corporate market is now embracing free, open source software like never before, as evidenced by the recent success of the technologies underlying LAMP (Linux, Apache, MySQL, and PHP). Each is the result of a publicly collaborative process among numerous developers who volunteer their time and energy to create better software. The truth is, however, that the overwhelming majority of free software projects fail. To help you beat the odds, O'Reilly has put together *Producing Open Source Software*, a guide that recommends tried and true steps to help free software developers work together toward a common goal. Not just for developers who are considering starting their own free software project, this book will also help those who want to participate in the process at any level. The book tackles this very complex topic by distilling it down into easily understandable parts. Starting with the basics of project management, it details specific tools used in free software projects, including version control, IRC, bug tracking, and Wikis. Author Karl Fogel, known for his work on CVS and Subversion, offers practical advice on how to set up and use a range of tools in combination with open mailing lists and archives. He also provides several chapters on the essentials of recruiting and motivating developers, as well as how to gain much-needed publicity for your project. While managing a team of enthusiastic developers -- most of whom you've never even met -- can be challenging, it can also be fun. *Producing Open Source Software* takes this into account, too, as it speaks of the sheer pleasure to be had from working with a motivated team of free software developers.

Screens Fade to Black David J. Leonard, 2006-06-30 The triple crown of Oscars awarded to Denzel Washington, Halle Berry, and Sidney Poitier on a single evening in 2002 seemed to mark a turning point for African Americans in cinema. Certainly it was hyped as such by the media, eager to overlook the nuances of this sudden embrace. In this new study, author David Leonard uses this event as a jumping-off point from which to discuss the current state of African-American cinema and the various genres that currently compose it. Looking at such recent films as *Love and Basketball*, *Antwone Fisher*, *Training Day*, and the two *Barbershop* films—all of which were directed by black artists, and most of which starred and were written by blacks as well—Leonard examines the issues of representation and opportunity in contemporary cinema. In many cases, these films—which walk a line between confronting racial stereotypes and trafficking in them—made a great deal of money while hardly playing to white audiences at all. By examining the ways in which they address the American Dream, racial progress, racial difference, blackness, whiteness, class, capitalism and a host of other issues, Leonard shows that while certainly there are differences between the grotesque images of years past and those that define today's era, the consistency of images across genre and time reflects the lasting power of racism, as well as the black community's response to it.

Rembrandt, the Printmaker Erik Hinterding, Rembrandt Harmenszoon van Rijn, Ger Luitjen, Martin Royalton-Kisch, 2000 Rembrandt was the most original printmaker of all time. In no fewer than 300 images he covered the full range of styles and subjects for which he is celebrated, including self-portraits, scenes from the Bible, vignettes of everyday life and character studies. The well-known 'Hundred Guilder print', the 'Three Trees' and the 'Three Crosses' are among his most extraordinary creations. He was also famously experimental, often reworking and scratching at his copper plates to improve and extend their expressive power. The results can look startlingly modern, and continue

to inspire artists today. This catalogue, compiled by three leading authorities on Rembrandt and printmaking, aims to illustrate a representative selection of his finest prints. Exciting new areas of research have opened up in recent years, making it possible not only to follow the progress of Rembrandt's work on each plate, but also revealing details of his practice of revising the images at various times during his life. The different papers he used will be studied and all the watermarks reproduced. The role played by Rembrandt's preparatory drawings is also now better understood, and all these new insights are presented to a wider public for the first time in this lavishly illustrated volume--Provided by publisher.

Industry Structure, Strategy, and Public Policy Frederic M. Scherer,1996 Industry Structure, Strategy, and Public Policy is the result of two decades of the author's successful teaching and classroom experience using a case approach to organization. Designed to serve either as a core text or supplemental case book, Industry Structure, Strategy, and Public Policy works to help students learn relevant economic theory through the use of rich, real-world industries. Nine industry case studies integrate theories in industrial organization with historical and statistical information as well as important national and international public policy of problems. Scherer clearly demonstrates to the readers the relevancy of issues in industrial organization to the economic and business world within which they work.

Human Resources Management Perspectives on TQM Stephen B. Knouse,1996-01-01 A human resources management (HRM) analysis relating total quality management (TQM) to important behavioral issues involved in HRM. Knouse (management, U. of Southwestern Louisiana) considers human resource topics in leadership, organizational culture, reward, performance evaluation, compensations,

The Ethical Business Kamel Mellahi, Kevin Morrell,2017-09-16 This text provides an up-to-date, critical analysis of contemporary issues in business ethics. The authors begin with an overview of the major, broad themes in business ethics, then move to a more practical discussion of ethics in key management functions. The second edition of The Ethical Business has been updated to address current thinking and new problems faced, with new chapters focusing on the symbiotic relationship between business and the environment and new case studies. An essential core text for today's business students, bringing ethical dilemmas into context to provide the foundation of good management practice.

Cultural Moves Herman Gray,2005-02-14 Examines the importance of culture in the push for black political power and social recognition and argues the key black cultural practices have been notable in reconfiguring the shape and texture of social and cultural life in the U.S. Drawing on examples from jazz, television, and academia, Gray highlights cultural strategies for inclusion in the dominant culture as well as cultural tactics that move beyond the quest for mere recognition by challenging, disrupting, and unsettling dominant cultural representations and institutions. In the end, Gray challenges the conventional wisdom about the centrality of representation and politics in black cultural production--Provided by publisher.

Advanced Marketing Strategy Glen L. Urban, Steven H. Star,1991 This book aims to present state-of-the-art marketing technology in a three-level decision and analysis framework, and to integrate case studies with the text. It provides a flow diagram for formulating marketing strategies, and offers case studies developed to provide practice with the book's concepts, applying both managerial judgement and higher-level analytical approaches to complex marketing strategy problems. There is also software support demonstrating the level of analysis, and an annual marketing plan.

Finding Fish Antwone Fisher, Mim E. Rivas,2009-10-13 Baby Boy Fisher was raised in institutions from the moment of his birth in prison to a single mother. He ultimately came

to live with a foster family, where he endured near-constant verbal and physical abuse. In his mid-teens he escaped and enlisted in the navy, where he became a man of the world, raised by the family he created for himself. Finding Fish shows how, out of this unlikely mix of deprivation and hope, an artist was born -- first as the child who painted the feelings his words dared not speak, then as a poet and storyteller who would eventually become one of Hollywood's most sought-after screenwriters. A tumultuous and ultimately gratifying tale of self-discovery written in Fisher's gritty yet melodic literary voice, Finding Fish is an unforgettable reading experience.

Theories of Race Jared Sexton, 2009-12-01 This book presents a critical framework for understanding how and why race matters past, present, and future. The readings trace the historical emergence of modern racial thinking in Western society by examining religious, moral, aesthetic, and scientific writing; legal statutes and legislation; political debates and public policy; and popular culture. Readers will follow the shifting ideological bases upon which modern racial theories have rested, from religion to science to culture, and the links between race, class, gender, and sexuality, and between notions of race and the nation-state. The authors discuss the relationship of racial theories to material contexts of racial oppression and to democratic struggles for freedom and equality. First and foremost in this discussion is the vast system of racial slavery instituted throughout the Atlantic world and the international movement that sought its abolition. Continuing campaigns to redress racial divisions in health, wealth, housing, employment, and education are also examined. There is a focus on the specificity of racial formation in the United States and the centrality of anti-black racism, but this text also looks comparatively at other regions of racial inequality and the construction of a global racial hierarchy since the 15th century CE. Jared Sexton is an associate professor of African American studies and film and media studies at the University of California, Irvine. A graduate of the University of New Hampshire, he received his Ph.D. from the University of California, Berkeley. He is the author of *Amalgamation Schemes: Antiblackness and the Critique of Multiracialism* (University of Minnesota Press, 2008).
