*Habitat Capability Model for Birds Wintering in the Black Hills, South Dakota* Mark A. Rumble,1999 Habitat models have considerable economic effects on management decisions and are used to predict consequences of land management decisions on wildlife. The Black Hills National Forest uses the habitat capability model (HABCAP), but its accuracy relative to resident wintering bird populations is largely unknown. We tested the model's predictive accuracy for resident nongame birds wintering in 11 vegetation structural stages of ponderosa pine, quaking aspen/paper birch, and meadows in the Black Hills, South Dakota. Six species, hairy woodpecker, gray jay, black-capped chickadee, white-breasted nuthatch, red-breasted nuthatch, and dark-eyed junco, had HABCAP coefficients for vegetation structural stages during winter. Red crossbills were not previously included in the model, so we developed HABCAP coefficients for them. Predicted abundance of winter birds in vegetation structural stages based on HABCAP coefficients differed from observed abundance for gray jays, black-capped chickadees, white-breasted nuthatches, red-breasted nuthatches, and dark-eyed juncos. HABCAP coefficients were modified to reflect observed abundance patterns of birds. These changes to HABCAP coefficients should provide managers with more appropriate estimates of land management impacts on nongame birds wintering in the Black Hills.

**Vegetation of the Glacier Lakes Ecosystem Experiments Site** Claudia M. Regan,1998 Vegetation at the Glacier Lakes Ecosystem Experiment Site, a 600 ha research site at 3200 to 3500 m elevation in the Snowy Range of southeastern Wyoming, was categorized and described from an intensive sampling of species abundances. A total of 304 vascular plant taxa were identified through collection and herbarium documentation. Plots with tree species were separated from those without tree species for ordination and classification analyses. Detrended correspondence analysis was used to order plots along major axes of composition variation, which are inferred moisture and topographic gradients. Cluster analysis was used to categorize plots based on composition similarity. The resulting groups were named according to species dominants. We identified and described in detail 4 meadow, 4 thicket or scrub, 3 krummholz, and 2 forest plant associations.

*The Urban Towers Handbook* Eric Firley,Julie Gimbal,2011-06-20 The Urban Towers Handbook Eric Firley and Julie Gimbal with Philippe Honnorat For well over a century, the modern skyscraper has provided an ingenious solution to high-density living and working - accommodating the greatest number of people in a building with a minimal footprint. In the contemporary context of drastic urban growth, its role can only gain in importance. The question is how to avoid past mistakes and how to conceive the tower as a positive component of an existing or newly created urban fabric. In a thoroughly analytical and comparative way The Urban Towers Handbook provides answers to these questions and serves as a reference book and design tool for architects, planners and developers alike. Its comprehensive graphic documentation includes not only aerials and to-scale plans and sections, but also purpose-made photography, drawings and diagrams. The core of the book is made up of over fifty case studies which have been classified according to three major typological groups and their respective sub-groups: solitaires, clusters and vertical cities. Twenty-one of these examples feature detailed documentation, including classics such as the Rockefeller Center in Manhattan and Torre Velasca in Milan, as well as contemporary milestones such as Roppongi Hills in Tokyo and the making of Sheikh Zayed Road in Dubai. Among others, several districts in Hong Kong, Shanghai and São Paulo have been analysed as existing examples of vertical cities. The case studies section of the book is consolidated by a second section that outlines high-rise regulations in seven cities around the world, and highlights how planning authorities use tall buildings for the realisation of their urban goals and visions. The third and final section of the book addresses the uneasy relationship between high-rise structures and sustainability, placing the emphasis on the urban implications.

Solitary Action Ira J. Cohen,2016 'Solitary Action' presents a unique and engaging view of the world of behaviours individuals perform by themselves. The book's central claim is that solitary action, in its many diverse and often highly absorbing forms, is as prevalent in everyday life as the complimentary domain of social interaction. But, while there are numerous studies of social interaction, this is the first work in social theory to develop an understanding of what people do when they are on their own.

*The Dodo and the Solitaire* Jolyon C. Parish,2013 The most comprehensive book to date about these two famously extinct birds.

*Solitaire* Graham Masterton,2017-11-22 An immense diamond pits two brothers in bitter rivalry in this “multifaceted and fascinating” story of nineteenth century South Africa by the author of *Railroad* (The New York Times). Kimberley, South Africa, 1868: As colonial powers vie for control of the diamond-rich land, Englishman Barney Blitz goes searching for his brother Joel across the South African countryside. When he finally finds him, arrested and condemned to death, Barney performs a daring rescue—but his act of heroism will ultimately lead him down a path of greed, betrayal, and doom. Obsessed with pillaging the greatest diamond field in the world, Barney and Joel soon discover the Natalia Star: a flawless and priceless 350 carat specimen. But to whom does this brilliant and hypnotic diamond belong? Acclaimed author Graham Masterton takes his readers on an epic adventure of passion and tragedy in this “robust, stirring, and thought-provoking tale” (Publishers Weekly). “Engrossing.” —The New York Times “A gleaming adventure, sharply faceted with splendid period background, diamond-mining details, and rapacity that could cut glass.” —Kirkus Reviews (starred review)

*Lost Land of the Dodo* Anthony S. Cheke,Julian Pender Hume,2008-01-01 Uninhabited by humans, the Mascarene Islands of the Indian Ocean were once home to an extraordinary range of birds and reptiles: giant tortoises, parrots, skinks, geckos, burrowing boas, flightless rails and herons, and, most famously, dodos. But the discovery of the three isolated islands in the 1500s, and their colonization in the 1600s, led to dramatic ecological changes. The dodo became extinct on its home island of Mauritius within several decades, and over the next 150 years most native vertebrates suffered the same fate. This fascinating book provides the first full ecological history of the Mascarene Islands as well as the specific story of each extinct vertebrate, accompanied by Julian Hume’s superb color illustrations.

Solitaire Spirit Les Powles,2012-01-15 Les Powles only had 8 hours of sailing experience when he decided to sail solo around the world. Many novices would be content to just dream of such an adventure, and maybe get as far as a solo Channel crossing a couple of years down the line. Not so Les Powles, one of the twentieth century's most extraordinary and eccentric sailors. Les was in his 50s when he built himself a yacht with little prior knowledge of boatbuilding. Remarkably he made it across the Atlantic, though his navigation skills didn't match his boatbuilding abilities; his first landfall was Brazil. He'd been aiming for Barbados - 100 miles north, and in a different hemisphere! Three complete solo circumnavigations followed, all of them full of incident. The last one saw him given up for dead when he hadn't been heard from for four months. His boat had been damaged in a storm, he'd lost all communications and had virtually run out of food. When he sailed up the Lymington River (aged 70) in a skeletal state his arrival caused a media frenzy. Lymington Yacht Haven subsequently gave him a free berth for life. A terrific achiever who has beaten the odds, Les Powles tells his story in a lively, entertaining, humorous and compelling way. It will resonate with sailors and non sailors alike, and may inspire one of them to become the twenty-first century's Les Powles.

**A Little Solitaire** Murray Pomerance,R. Barton Palmer,2011 Think about some commercially successful film masterpieces--The Manchurian Candidate. Seven Days in May. Seconds. Then consider some lesser known, yet equally compelling cinematic achievements--The Fixer. The Gypsy Moths. Path to War. These triumphs are the work of the best known and most highly regarded Hollywood director to emerge from live TV drama in the 1950s--five-time Emmy-award-winner John Frankenheimer. Although Frankenheimer was a pioneer in the genre of political thrillers who embraced the antimodernist critique of contemporary society, some of his later films did not receive the attention they deserved. Many claimed that at a midpoint in his career he had lost his touch. World-renowned film scholars put this myth to rest in A Little Solitaire, which offers the only multidisciplinary critical account of Frankenheimer's oeuvre. Especially emphasized is his deep and passionate engagement with national politics and the irrepressible need of human beings to assert their rights and individuality in the face of organizations that would reduce them to silence and anonymity.
