Ocean Energy R. H. Charlier, Charles W. Finkl, 2009-02-08 Engineers' dreams and fossil energy replacement schemes can come true. Man has been tapping the energy of the sea to provide power for his industries for centuries. Tidal energy combined with that of waves and marine winds rank among those most successfully put to work. Large scale plants are capital intensive but smaller ones, particularly built in China, have proven profitable. Since the initiation of the St Malo project in France, similar projects have gone into active service where methods have been devised to cut down on costs, new types of turbines developed and cost competitiveness considerably improved. Tidal power has enormous potential. The book reviews recent progress in extracting power from the ocean, surveys the history of tidal power harnessing and updates a prior publication by the author.

The Protocols of the Learned Elders of Zion Sergei Nilus, Victor Emile Marsden, 2019-02-26 The Protocols of the Elders of Zion is almost certainly fiction, but its impact was not. Originating in Russia, it landed in the English-speaking world where it caused great consternation. Much is made of German anti-semitism, but there was fertile soil for The Protocols across Europe and even in America, thanks to Henry Ford and others.

Dave Pelz's Short Game Bible Dave Pelz, James A. Frank, 1999-05-11 Dave Pelz's Short Game Bible is the first book in a four-book series, The Dave Pelz Scoring Game Series. The next volume in the series will be Dave Pelz's Putting Bible. He who rules the short game collects the gold. --Dave Pelz's Golden Rule of Golf Fed up with trying to imitate the pros, buying the latest expensive equipment, and seeing your handicap stay the same? The first book by bestselling author and internationally revered golf instructor Dave Pelz since *Putt Like the Pros*, his bestselling classic, *Dave Pelz's Short Game Bible* can show you the way to lower scores by improving your short game. The result of decades of scientific research studying thousands of golfers, Dave's philosophy is as simple as it is revolutionary and groundbreaking: Instead of practicing the wrong things the right way, or the right things the

wrong way, Pelz shows you how to find your own personal weaknesses and how to improve them to efficiently lower your scores. Packed with all the knowledge, charts, and photos needed to learn from the master, Dave Pelz's Short Game Bible is the essential book for every golfer who's looking to improve his or her game. Dave's approach to golf is easy to understand: 80 percent of the strokes golfers lose to par are determined by their play within 100 yards of the green--the crucial scoring game. The most important and yet the least focused-on aspect of golf, your short game, can indeed make or break your entire game. And nobody teaches the short game like Dave Pelz. His renowned golf schools and clinics focus exclusively on putting and the short game, attracting top players like Tom Kite, Colin Montgomerie, two-time U.S. Open champion Lee Janzen, reigning PGA champion Vijay Singh, Steve Elkington, Payne Stewart, Peter Jacobsen, and many LPGA players including Annika Sorenstam and Liselotte Neumann. The pros know, as you are about to learn, that while others teach golfers how to swing, Dave Pelz teaches golfers how to score . . . and win. A former physicist for NASA, Dave brings a scientific rigor to his research and instruction that has made him the top short-game expert in the world. Dave has observed and then taught thousands of golfers to improve their ability to score better. The years he has spent studying the short game, including chipping, lobs, pitches, distance wedges, and bunker play, have resulted in an unequalled expertise and a fascinating body of knowledge on golf, with the statistics and data to back it up. In this new book, Dave for the first time shares the understanding and techniques he has taught the pros, including a wide array of innovative tests and exercises for mastering those deceptive and high-pressure shots of the short game. Dave Pelz's Short Game Bible is an essential book for golfers of all levels.

Covering everything golfers need to know to improve their short game, Dave's system can-- and will--help you to consistently shoot lower scores.

The Battle of Britain Memorial Flight Jarrod Cotter, 2007-01-01 The history of the Flight began with the formation of the Historic Aircraft Flight in July 1957, it was later to become known as The Battle of Britain Memorial Flight. Countless displays and fly-pasts have enthralled audiences and enthusiasts all over Britain and in many parts of Europe, when the traditional Avro Lancaster, Spitfire and Hurricane can be seen in their wartime colors and the growl of all six Merlin engines stirs many nostalgic memories. This book is written with the wholehearted support of the Flight's Commanding Officer and the author has access to archive material. The book includes a Foreword from the OC BBMF, a complete history of the unit, chapters on each of the types operated, including the DC-3 Dakota and de Havilland Chipmunk and present-day operations. Photos include superb images from the BBMF archives, the author's collection that includes historic black and white shots from the early days, air-to-air color, personalities and behind-the-scenes images. This is the ultimate souvenir of the celebration of the BBMF's 50th Anniversary. **REVIEWS** ...clearly the definitive history of this unit. It is a very easy and enjoyable read that is more than just a history of the Flight's activities. It is a history of a national tribute to all who have served, and continue to continue to serve. **Air Power History** Spring 2009

Climate Affairs Michael H. Glantz, 2003-05-16 Climate Affairs sets forth in a concise primer the base of knowledge needed to begin to address questions surrounding the unknown impacts of climate change. In so doing, it outlines a new approach to understanding the interactions among climate, society, and the environment. Chapters

consider: • the key concepts and terms in climate affairs • the effects of climate around the world • important but overlooked aspects of climate-society-environment interactions • examples of societal uses, misuses, and potential uses of climate-related information such as forecasts • a research agenda, challenges, and methodologies for future climate research. Climate Affairs draws on a range of study areas—including climate science, impacts on ecosystems and society, politics, policy and law, economics, and ethics—to address the complexity and gravity of impacts that our increasing vulnerability to climate portends. It is the first book to consider the full range of climate-related topics and the interactions among them, and will be a key resource for decision makers, as well as for students and scholars working in climate and related fields.

East of Sorrow Marc Hudson, 2017 Poetry. EAST OF SORROW is Marc Hudson's fourth full-length collection of poems. In some ways, it is a continuation of his last two books, for it brings to a close the poetic journal of his life with his son, Ian, who died in 2002. But this book is equally about his daughter, Alix. Parenthood is a persistent theme in EAST OF SORROW: its pain because time is a slow mitigator, and its joy at seeing a vivacious young woman come into her own. A Christian perspective inflects some of these poems; others are distinctly Buddhist. More broadly, the book is a meditation on water, its shaping and animating presence on our planet. In its final section, the book moves fully out into the natural world; the personal gives way to the ecological, to a contemplation of our planet in this age that is sometimes called the Anthropocene. Though elegiac in places, EAST OF SORROW ends in praise.

Family Tree Whakapapa, 2020 Family Tree Whakapapa brings together the work of four

sisters: elin o'Hara Slavick, Madeleine Slavick, Sarah Slavick and Susanne Slavick. As curators, painters, photographers and writers, all have incorporated images of trees in social, political and environmental conditions -- trees that stand as refuge and livelihood, consumed and consuming, under assault and triumphant, as historical record and as harbinger of things to come. Family Tree Whakapapa offers perspectives both unsettling and soothing as nature increasingly reflects salient issues of our times. Based on experiences in Japan, elin presents photographic works that bear witness to the ongoing aftermath of atomic bombs in Hiroshima and Nagasaki and the nuclear power disaster in Fukushima. Madeleine's photographs decry the marginalisation of trees, they reveal dichotomies and their collapses in our experience of nature in environments both rural and urban. Sarah's paintings explore the underground life of trees in an elegiac series that conveys both grief and hope, for what is threatened and for what might survive through possible strategies that trees offer for all species on the planet. Susanne hand paints trees derived from 'tree of life' carpet designs over printed scenes of environmental destruction and depredation. These trees do not lie down like doormats; they rise up and persist, suggesting the possibility of recovery.--Aratoi website (accessed 3/02/2021).
