Sort It by Texture Nicholas O'Hara,2015-07-15 Eww, that feels gross! Young learners love learning about texture up close. This accessible book enables readers to imagine how objects would feel that might not be available in the classroom, such as an alligator! Smooth, bumpy, dry, sticky, hard, and soft are just some of the adjectives introduced in this valuable volume. The text and photographs demonstrate objects that illustrate each adjective as well as how to sort objects of a certain texture from a mixed group.

Energy Makes Things Happen Kimberly Brubaker Bradley,2002-12-24 Did you know that energy comes from the food you eat? From the sun and wind? From fuel and heat? You get energy every time you eat. You transfer energy to other things every time you play baseball. In this book, you can find out all the ways you and everyone on earth need energy to make things happen.

The Crayola ® Sorting Book Jodie Shepherd,2017-08-01 Sorting by color, by shape, or by size—there are lots of ways to group similar things together! How do you sort the objects in your world? What can you create by sorting? Bright and colorful photos encourage young readers to think about how they can sort the objects around them.

Sorting (Math Counts: Updated) Henry Pluckrose,2021-08-03 An introduction to capacity for the youngest readers! Math Counts series introduces young readers (grades K-3) to early math concepts. Real-world examples and corresponding photos make math concepts easy to grasp. When things are sorted together, they are called a set. Things that make up a set have something in common.

Sort It by Color Emmett Alexander,2015-07-15 Learning to identify colors is an essential skill in the early elementary classroom. Learning to sort by color takes this aptitude one step further. Through accessible text and helpful photographs, beginning readers will be able to see familiar objects, such as toys and crayons, both mixed up and sorted into their favorite colors. They'll be able to demonstrate their mastery of the concept by this inviting book's end.

Concept-Based Inquiry in Action Carla

Marschall, Rachel French, 2018-05-30 Create a thinking classroom that helps students move from the factual to the conceptual Concept-Based Inquiry is a framework for inquiry that promotes deep understanding. The key is using guiding questions to help students inquire into concepts and the relationships between them. Concept-Based Inquiry in Action provides teachers with the tools and resources necessary to organize and focus student learning around concepts and conceptual relationships that support the transfer of understanding. Step by step, the authors lead both new and experienced educators to implement teaching strategies that support the realization of inquiry-based learning for understanding in any K-12 classroom.

Let's Sort Shapes Lauren Coss, 2014-08-01 This Level 2 guided reader teaches how to classify objects by shape and sort them into categories. Students will develop word recognition and reading skills while learning how to identify, compare, and describe shapes and sort them by their key attributes.

Fewer, Better Things Glenn Adamson, 2018-08-07

From the former director of the Museum of Arts and Design in New York, a timely and passionate case for the role of the well-designed object in the digital age. Curator and scholar Glenn Adamson opens Fewer, Better Things by contrasting his beloved childhood teddy bear to the smartphones and digital tablets children have today. He laments that many children and adults are losing

touch with the material objects that have nurtured human development for thousands of years. The objects are still here, but we seem to care less and know less about them. In his presentations to groups, he often asks an audience member what he or she knows about the chair the person is sitting in. Few people know much more than whether it's made of wood, plastic, or metal. If we know little about how things are made, it's hard to remain connected to the world around us. Fewer, Better Things explores the history of craft in its many forms, explaining how raw materials, tools, design, and technique come together to produce beauty and utility in handmade or manufactured items. Whether describing the implements used in a traditional Japanese tea ceremony, the use of woodworking tools, or the use of new fabrication technologies, Adamson writes expertly and lovingly about the aesthetics of objects, and the care and attention that goes into producing them. Reading this wise and elegant book is a truly transformative experience.

Sorting Karen Bryant-Mole, 1999 Marmaduke the bear uses paint-brushes, buttons, crayons and cups to help young children learn how to sorting objects into sets. Suggested level: junior.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This

provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to

their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Big Nate Lincoln Peirce, 2010-10-19 Self-proclaimed genius Nate Wright blazes a haphazard trail through the sixth grade at P.S. 38, where between endless misadventures, marked by complaining observations, he earns straight As and numerous detentions.

No Thanks Mom Elizabeth Stewart, 2017-08-25 A concise guide for parents of millennials, NO THANKS MOM offers sage advice on what to do with those objects 'saved' but NOT welcomed by the next generation. Collections and treasured objects do not always span the generation gap, sustaining both high market value and the taste and style of the 21st century. Learn to downsize what formerly was valued without upsizing your kid's home. A valuable chapter, The Top Ten Objects Kids Do Not Want discusses the current taste for once-treasured objects such as formal dinner china. Often a flashpoint between parents and heirs, objects are a reflection of lives and homes. Tales of 'stuff' not in style include market remedies for antiques, fine art, and collectibles: how and

where to sell, what to donate, what to save, and what NOT to bequest to heirs. Offered by an appraiser with three decades of experience, a collector of collector's stories, the guide sets forth roadmaps and plans for what to do with objects once your kids have said No Thanks. Topics include The Five Piles Theory of Downsizing, and Rules and Habits for Creative Divesting.

Sorting at the Market Tracey Steffora, 2011-01-01 Introduces the concept of sorting objects by shape, color, and size.

Make a Match Tish Rabe, 2006-07 To help young children learn color, shapes, and object recognition, this story and game combination features more than ten games to play, offering dozens of ways to match and sort. Includes a built-in sorting tray, 40 matching pieces, and ten matching cards. Full color. Consumable.
