Ker C. Thomson

Passive Test Pad Models Ker C. Thomson,1973 Seismic modeling techniques, appropriate to the study of models of test pads for motion sensitive instrumentation, were developed. A transient Rayleigh wave study of two model pads indicated that naively-developed isolation procedures may lead to enhancement of pad motion rather than to its suppression. As a step towards the development of more sophisticated design techniques, a two-dimensional mathematical model of pad motion was developed as a computer program. The test pad designer using this program provides input information consisting of a numerical description of the proposed pad, the substrate to which it is attached, and the nature of the seismic radiation arriving in the vicinity of the test pad. The program predicts the pad motion and, from a computer-controlled oscilloscope, can provide a 16-mm motion picture showing the magnified pad displacement as a function of time. (Modified author abstract).

Measuring the Science and Engineering Enterprise National Research Council,Committee on National Statistics,Office of Scientific and Engineering Personnel,Committee to Assess the Portfolio of The Division of Science Resources Studies of NSF,2000-03-14 The science and engineering enterprise has continued to evolve, responding over the last decade to increased economic globalization, a post-cold war military, federal budget fluctuations, and structural changes in the way science and engineering are conducted and innovations are adopted. This report suggests ways to revise the data collection activities of the Science Resources Studies Division (SRS) of the National Science Foundation to better capture the current realities of R&D funding and S&E human resources. The report's recommendations would improve the relevance of the data on graduate education, the labor market for scientists and engineers, and the funding and conduct of research and development, and thus better meet the data needs of policymakers, managers, and researchers.

The purpose of this book is to discuss the promise and the limitations of incorporating the best available evidence in clinical practice. It seeks to characterize and define how best available research evidence can be used in clinical practice and to what respect it applies to current public health issues.

Military Nuclear Accidents Jean-Claude Amiard,2018-11-28 The use of atomic energy for military purposes has given rise to a variety of nuclear accidents from the outset. This applies to all levels of use: from the manufacture of weapons to their commissioning. This book provides an overview of the potential impact of such accidents. The prospective consequences of local and global nuclear war are detailed. Similarly, for each accident, the environmental, ecological, health and socio-economic consequences are reviewed. The contamination of the environment and its fauna and flora is detailed and the effects of ionizing radiation are reported. The same is provided for human populations and the adverse effects on the health and physical and mental states of the populations concerned. The economic cost of accidents is also evaluated. The research presented in this book is based on scientifically recognized publications, and reports from the military forces of the various countries concerned and from the national and international organizations competent in this field (IAEA, WHO, UNSCEAR, IRSN, ICPR, etc.).

**Analysis of Poverty Data by Small Area Estimation** Monica Pratesi,2016-02-23 A comprehensive guide to implementing SAE methods for poverty studies and poverty mapping There is an increasingly urgent demand for poverty and living conditions data, in relation to local areas and/or subpopulations. Policy makers and stakeholders need indicators and maps of poverty and living conditions in order to formulate and implement policies, (re)distribute resources, and measure the effect of local policy actions. Small Area Estimation (SAE) plays a crucial role in producing statistically sound estimates for poverty mapping. This book offers a comprehensive source of information regarding the use of SAE methods adapted to these distinctive features of poverty data derived from surveys and administrative archives. The book covers the definition of poverty indicators, data collection and integration methods, the impact of sampling design, weighting and variance estimation, the issue of SAE modelling and robustness, the spatio-temporal modelling of poverty, and the SAE of the distribution function of income and inequalities. Examples of data analyses and applications are provided, and the book is supported by a website describing scripts written in SAS or R software, which accompany the majority of the presented methods. Key features: Presents a comprehensive review of SAE methods for poverty mapping Demonstrates the applications of SAE methods using real-life case studies Offers guidance on the use of routines and choice of websites from which to download them Analysis of Poverty Data by Small Area Estimation offers an introduction to advanced techniques from both a practical and a methodological perspective, and will prove an invaluable resource for researchers actively engaged in organizing, managing and conducting studies on poverty.

Christina Rossetti Jan Marsh,2012-11-29 'Jan Marsh's book is the best researched and fullest biography of Rossetti we have yet had.' Fiona MacCarthy, New York Review of Books'Although never formally part of the Pre-Raphaelite poetic school, which included her brother Gabriel, William Morris, and Algernon Swinburne, Christina Rossetti has always been linked to it. [Jan Marsh] gives full attention to both the individual and her unique variety of fantastic and devotional poetry... Marsh delineates an appealing person while examining her adolescent nervous breakdown, abortive engagement to a lapsed Catholic painter, frustrated love for an absentminded scholar, and relationships with her devout but hearty sister, Maria, and with her brothers... The author's steady, sympathetic course through Rossetti's divided life enables readers to delve into the intense and original self most fully expressed in her poetry.' Kirkus Review

**The Comprehensive Nuclear Test Ban Treaty** National Research Council,Policy and Global Affairs,Committee on Reviewing and Updating Technical Issues Related to the Comprehensive Nuclear Test Ban Treaty,2012-04-29 This report reviews and updates the 2002 National Research Council report, Technical Issues Related to the Comprehensive Nuclear Test Ban Treaty (CTBT). This report also assesses various topics, including: the plans to maintain the safety and reliability of the U.S. nuclear stockpile without nuclear-explosion testing; the U.S. capability to detect, locate, and identify nuclear explosions; commitments necessary to sustain the stockpile and the U.S. and international monitoring systems; and potential technical advances countries could achieve through evasive testing and unconstrained testing. Sustaining these technical capabilities will require action by the National Nuclear Security Administration, with the support of others, on a strong scientific and engineering base maintained through a continuing dynamic of experiments linked with analysis, a vigorous surveillance program, adequate ratio of performance margins to uncertainties. This report also emphasizes the use of modernized production facilities and a competent and capable workforce with a broad base of nuclear security expertise.
