Art of the Cut Steve Hullfish,2017-02-24 *Art of the Cut* provides an unprecedented look at the art and technique of contemporary film and television editing. It is a fascinating virtual roundtable discussion with more than 50 of the top editors from around the globe. Included in the discussion are the winners of more than a dozen Oscars for Best Editing and the nominees of more than forty, plus numerous Emmy winners and nominees. Together they have over a thousand years of editing experience and have edited more than a thousand movies and TV shows. Hullfish carefully curated over a hundred hours of interviews, organizing them into topics critical to editors everywhere, generating an extended conversation among colleagues. The discussions provide a broad spectrum of opinions that illustrate both similarities and differences in techniques and artistic approaches. Topics include rhythm, pacing, structure, storytelling and collaboration. Interviewees include Margaret Sixel (*Mad Max: Fury Road*), Tom Cross (*Whiplash*, *La La Land*), Pietro Scalia (*The Martian*, *JFK*), Stephen Mirrione (*The Revenant*), Ann Coates (*Lawrence of Arabia*, *Murder on the Orient Express*), Joe Walker (*12 Years a Slave*, *Sicario*), Kelley Dixon (*Breaking Bad*, *The Walking Dead*), and many more. *Art of the Cut* also includes in-line definitions of editing terminology, with a full glossary and five supplemental web chapters hosted online at www.routledge.com/cw/Hullfish. This book is a treasure trove of valuable tradecraft for aspiring editors and a prized resource for high-level working professionals. The book's accessible language and great behind-the-scenes insight makes it a fascinating glimpse into the art of filmmaking for all fans of cinema. Please access

Sonic Studies in Educational Foundations Walter S. Gershon, Peter M. Appelbaum, 2019-12-09 Originally published as a special issue of Educational Studies, this volume demonstrates the ways in which sound considerations can significantly contribute to educational foundations. Regardless of their origin or interpretation, sounds are theoretically and practically foundational to educational experiences. As the means through which knowledges are passed from one person to another, sounds outline the fluid, porous boundaries of educational ecologies. This book draws out and expands upon the already-present sonic metaphors that exist at the center of philosophical and historical foundations of educational studies. Contributions demonstrate the ethical dimensions of this line of inquiry, emphasizing the need for education to offer both a right to speak and to be heard in order to take on a truly democratic character. By highlighting emerging attention to sound scholarship in education, contributors attend to and otherwise explore sound possibilities for educational theory, policy, and practice. This book will be of great interest to

graduate and post graduate students; libraries, researchers and academics in the field of educational foundations, philosophy of education, education politics and sociology of education.
