Sound Play William Cheng,2014 Video games open portals into fantastical worlds where imaginative play prevails. 'Sound Play' explores the aesthetic, ethical, and sociopolitical stakes of people's engagements with audio phenomena in video games - from sonic violence to synthesized operas, from democratic musical performances to verbal sexual harassment.

Anatomy of Sound Jacob Smith,Neil Verma,2016-07-19 This collection of essays examines one of the most important, yet understudied, media authors of all time--Norman Corwin--using him as a critical lens to consider the history of multimedia authorship, particularly in the realm of sound. Known for seven decades as the 'poet laureate' of radio, Corwin is most famous for his radio dramas, which reached tens of millions of listeners around the world and contributed to radio drama's success as a mass media form in the 1930s and 1940s. But Corwin was a pioneer in multiple media, including cinema, theater, TV, public service broadcasting, journalism, and even cantata. In each of these areas, Corwin had a distinctive approach to sonic aesthetics and mastery of multiple aspects of media production, relying in part on his inventive atmospheric effects in the studio both prerecorded, and, more impressively, live in real time. From the front lines of World War II to his role as Chief of Special Projects for United Nations Radio and his influence on media today, the political and social aspect of Corwin's work is woven into these essays. With a foreword by Michele Hilmes and contributions from Thomas Doherty, Mary Ann Watson, Shawn VanCour, David Ossman and others, this volume cements Corwin's reputation as perhaps the greatest writer in the history of radio, while also showing that his long career is a neglected model of multimedia authorship.--Provided by publisher.

Peterson Field Guide to Bird Sounds of Western North America Nathan Pieplow,2019 A comprehensive field guide that uses an innovative Sound Index to allow readers to quickly identify unfamiliar songs and calls of birds in western North America. Bird songs and calls are at least as important as visual field marks in identifying birds. Yet short of memorizing each bird's repertoire, it's difficult to sort through them all. Now, with the western edition of this groundbreaking book, it's possible to visually distinguish bird sounds and identify birds using a field-guide format. At the core of this guide is the spectrogram, a visual graph of sound. With a brief introduction to five key aspects--speed, repetition, pauses, pitch pattern, and tone quality--readers can translate what they hear into visual recognition, without any musical training or auditory memorization. The Sound Index groups similar songs together, narrowing the identification choices quickly to a brief list of birds that are likely to be confused because of the similarity of their songs. Readers can then turn to the species account for more information and/or listen to the accompanying audio tracks available online. Identifying birds by sound is arguably the most challenging and important skill in birding. This book makes it vastly easier to master than ever before.

The Oxford Handbook of Cinematic Listening Carlo Cenciarelli,2021 The Oxford Handbook of Cinematic Listening explores the intersection between the history of listening and the history of the moving image. Featuring established and emergent scholars from musicology, film studies, and literary studies, ethnomusicology and sound studies, popular music,sociology, media and communications, and psychology, this Handbook offers a wide range of case studies and methodological perspectives on the archaeologies, aesthetics, and extensions of cinematic listening.Chapters are structured around six themes: Part I (Genealogies and Beginnings) considers film sound in light of pre-existing genres such as opera and shadow theatre, and explores changes in listening taking place at critical junctures in the early history of cinema. Part II (Locations andRelocations) focuses on specific venues and presentational practices (from roadshow movies to and contemporary live-score screenings). Part III (Representations and Re-presentations) zooms into the formal properties of specific films, analysing representations of listening on screen as well as onthe role of sound as a representational surplus. Part IV (The Listening Body) focuses on cinematic sound as a powerful and sensual stimulus that has the power to engage the full body sensorium. Part V (Listening again) discusses a range of ways in which film sound is encountered andreinterpreted outside the cinema, through ancillary materials like songs and soundtrack albums, in experimental conditions, and in pedagogical contexts. Part VI (Between Media) compares the listening protocols of cinema with those of TV series and music video, promenade theatre and personalstereos, video games and Virtual Reality.

Sound-Blind Alex Benson,2023-11-06 In the 1880s, a new medical term flashed briefly into public awareness in the United States. Children who had trouble distinguishing between similar speech sounds were said to suffer from sound-blindness. The term is now best remembered through anthropologist Franz Boas, whose work deeply influenced the way we talk about cultural difference. In this fascinating work of literary and cultural history, Alex Benson takes the concept as an opening onto other stories of listening, writing, and power—stories that expand our sense of how a syllable, a word, a gesture, or a song can be put into print, and why it matters. Benson interweaves ethnographies, memoirs, local-color stories, modernist novels, silent film scripts, and more. Taken together, these seemingly disparate texts—by writers including John M. Oskison, Helen Keller, W. E. B. Du Bois, F. Scott Fitzgerald, and Elsie Clews Parsons—show that the act of transcription, never neutral, is conditioned by the histories of race, land, and ability. By carefully tracing these conditions, Benson argues, we can tease out much that has been left off the record in narratives of American nationhood and American literature.

Sacred Sounds, Secular Spaces Jennifer Walker,2021-09-01 Military defeat, political and civil turmoil, and a growing unrest between Catholic traditionalists and increasingly secular Republicans formed the basis of a deep-seated identity crisis in Third Republic France. Beginning in the early 1880s, Republican politicians introduced increasingly secularizing legislation to the parliamentary floor that included, but was not limited to, the secularization of the French educational system. As the divide between Church and State widened on the political stage, more and more composers began writing religious--even liturgical--music for performance in decidedly secular venues, including popular cabaret theaters, prestigious opera houses, and international exhibitions. This trend coincided with Pope Leo XIII's Ralliement politics that encouraged conservative Catholics to rally with the Republican government. But the idea of a musical Ralliement has largely gone unquestioned by historians and musicologists alike. Sacred Sounds, Secular Spaces provides the first fundamental reconsideration of music's role in the relationship between the French state and the Catholic Church in the Third Republic. In doing so, the book dismantles the somewhat simplistic epistemological position that emphasizes a sharp division between the Church and the secular Republic during this period. Drawing on extensive archival research, critical reception studies, and musical analysis, author Jennifer Walker reveals how composers and critics from often opposing ideological factions undermined the secular/sacred binary through composition and musical performance in an effort to craft a brand of Frenchness that was built on the dual foundations of secular Republicanism and the heritage of the French Catholic Church.
