Exploring Ancient Textiles Alistair Dickey,Margarita Gleba,Sarah Hitchens,Gabriella Longhitano,2022-08-31 Over the past 30 years, research on archaeological textiles has developed into an important field of scientific study. It has greatly benefited from interdisciplinary approaches, which combine the application of advanced technological knowledge to ethnographic, textual and experimental investigations. In exploring textiles and textile processing (such as production and exchange) in ancient societies, archaeologists with different types and quality of data have shared their knowledge, thus contributing to well-established methodology. In this book, the papers highlight how researchers have been challenged to adapt or modify these traditional and more recently developed analytical methods to enable extraction of comparable data from often recalcitrant assemblages. Furthermore, they have applied new perspectives and approaches to extend the focus on less investigated aspects and artefacts. The chapters embrace a broad geographical and chronological area, ranging from South America and Europe to Africa, and from the 11th millennium BC to the 1st millennium AD. Methodological considerations are explored through the medium of three different themes focusing on tools, textiles and fibres, and culture and identity. This volume constitutes a reflection on the status of current methodology and its applicability within the wider textile field. Moreover, it drives forward the methodological debates around textile research to generate new and stimulating conversations about the future of textile archaeology.

The Compleat Housewife Eliza Smith,2012-10-16 First published in England, this kitchen reference became available to colonial American housewives when it was printed in Williamsburg, Virginia is 1742.

Originally published in London in 1727, The Compleat Housewife was the first cookbook printed in the United States. William Parks, a Virginia printer, printed and sold the cookbook believing there would be a strong market for it among Virginia housewives who wanted to keep up with the latest London fashions—the book was a best-seller there. Parks did make some attempt to Americanize it, deleting certain recipes “the ingredients or material for which are not to be had in this country,” but for the most part, the book was not adjusted to American kitchens. Even so, it became the first cookery best seller in the New World, and Parks’s major book publication. Author Eliza Smith described her book on the title page as “Being a collection of several hundred approved receipts, in cookery, pastry, confectionery, preserving, pickles, cakes, creams, jellies, made wines, cordials. And also bills of fare for every month of the year. To which is added, a collection of nearly two hundred family receipts of medicines; viz. drinks, syrups, salves, ointments, and many other things of sovereign and approved efficacy in most distempers, pains, aches, wounds, sores, etc. never before made publick in these parts; fit either for private families, or such public-spirited gentlewomen as would be beneficent to their poor neighbours.” The recipes are easy to understand and cover everything from 50 recipes for pickling everything from nasturtium buds to pigeons to “lifting a swan, breaking a deer, and splating a pike,” indicating the importance of understanding how to prepare English game. The book also includes diagrams for positioning serving dishes to create an attractive table display.

Transcatheter Valve Repair Ziyad M. Hijazi,Carlos E. Ruiz,Philipp Bonhoeffer,Ted Feldman,2006-01-17 Transcatheter Valve Repair discusses all aspects related to percutaneous and established valve repair methods. The book is divided into few major sections covering all four valves and other topics. Each section contains several chapters discussing everything related to that valve. Beginning with the pulmonary valve, since it was the first valve to be tackled in the catheterization laboratory, and then moving to the aortic, then the mitral and then finally end with the tricuspid valve. 1.5M US citizens alone have some degree of aortic valve stenosis, with half (750K) requiring aortic valve replacement. Aortic valve replacement, on the whole, is performed by surgeons, requiring bypass machines and technicians, as well as the usual operating team. The operation is expensive and occupies a considerable amount of operating room time. Mostly, the aortic valve is calcified and the usual option available to patients is valve replacement with a variety of choices, ranging from porcine valves to synthetic, for which there are many manufacturers. It should be noted that the aortic valve is the most problematic of valves. Percutaneous procedures are the answer. The bottom line is that given the growing elderly population, many more patients will require valve repair, thus increasing health care costs with not only surgical operations but also hospitalisation. Percutaneous valve repair, whilst requiring a cath lab team, does not involve bypass machines nor extended hospitalisation. Like percutaneous transluminal coronary artery interventions (PTCA) has replaced coronary artery bypass grafts (once the golden standard), and now stenting having replaced PTCA and its balloons. We now see drug eluting stents replacing ordinary stents (though at a much higher cost. There will be a huge movement toward percutaneous valve repair, which should presumably cut costs but also morbidity and mortality.
