English Corpus Linguistics Charles F. Meyer, 2023-06-30 Corpus linguistics is a research method which draws on authentic language examples, collected and organized into 'corpora', or searchable 'bodies' of data. The method was established in the 1960s, and has rapidly developed since then. Now in its second edition, this book provides a step-by-step guide on how to create and analyze linguistic corpora. It has been extensively updated to reflect the most recent developments in this ever-evolving field, and now covers the empirical foundation of corpus-based research, new methodological considerations that guide the creation of a corpus, new kinds of research that can be conducted on corpora, and the most up-to-date information on how qualitative and quantitative analyses of corpora are conducted. Theoretical approaches are introduced in an accessible, easy-to-read way, and the book is illustrated with a wide range of different linguistic corpora, making it essential reading for researchers and students in a number of subfields of linguistics.

*Association for Computational Linguistics 39th Annual Meeting and 10th Conference of the European Chapter Association for Computational Linguistics.* Meeting, 2001 Philosophers have long been fascinated by the connection between cause and effect: are causes things we can experience or are they concepts provided by our minds? The study of causation goes back to Aristotle, but

resurged with David Hume and Immanuel Kant, and is now one of the most important topics in metaphysics. Most of the recent work done in this area has attempted to place causation in a deterministic, scientific worldview. But what about the unpredictable and chancey world we actually live in: can one theory of causation cover all instances of cause and effect?

*Beginning Smartphone Web Development* Gail Frederick, Rajesh Lal, 2010-04-15 Today's Web 2.0 applications (think Facebook and Twitter) go far beyond the confines of the desktop and are widely used on mobile devices. The mobile Web has become incredibly popular given the success of the iPhone and BlackBerry, the importance of Windows Mobile, and the emergence of Palm Pre (and its webOS platform). At Apress, we are fortunate to have Gail Frederick of the well-known training site Learn the Mobile Web offer her expert advice in *Beginning Smartphone Web Development*. In this book, Gail teaches the web standards and fundamentals specific to smartphones and other feature-driven mobile phones and devices. Shows you how to build interactive mobile web sites using web technologies optimized for browsers in smartphones Details markup fundamentals, design principles, content adaptation, usability, and interoperability Explores cross-platform standards and best practices for the mobile Web authored by the W3C, dotMobi, and similar organizations Dives deeps into the feature sets of the most popular mobile browsers, including WebKit, Chrome, Palm Pre webOS, Pocket IE, Opera Mobile, and Skyfire By the end of this book, you'll have the training, tools, and techniques for creating robust mobile web experiences on any of these platforms for your favorite smartphone or other mobile device.

*What is the Text Encoding Initiative?* Lou Burnard, 2014-04-11 The Text Encoding Initiative (TEI) Guidelines have long been regarded as the de facto standard for the preparation of digital textual resources in the scholarly research community. For the beginner, they offer a daunting range of possibilities, reflecting the huge range of potential applications for text encoding, from traditional scholarly editions, to language corpora, historical lexicons, digital archives and beyond. Drawing on many examples of TEI-encoded text from a variety of research domains, this simple and straightforward book is intended to help the beginner make their own choices from the full range of TEI options. It explains the XML technology used by the TEI in language accessible to the non-technical reader and provides a guided tour of the many parts of the TEI universe, and how it may be customized to suit an individual project's needs. This work has been produced with the support of Labex Hastec.

**Genre Analysis and Corpus Design** Ulrike Henny-Krahmer, 2024-01-22 This work in the field of digital literary stylistics and computational literary studies is concerned with theoretical concerns of literary genre, with the design of a corpus of nineteenth-century Spanish-American novels, and with its empirical analysis in terms of subgenres of the novel. The digital text corpus consists of 256 Argentine, Cuban, and Mexican novels from the period between 1830 and 1910. It has been created with the goal to analyze thematic subgenres and literary currents that were represented in numerous novels in the nineteenth century by means of computational text categorization methods. To categorize the texts, statistical classification and a family resemblance analysis relying on network analysis are used with the aim to examine how the subgenres, which are understood as communicative, conventional phenomena, can be captured on the stylistic, textual level of the novels that participate in them.

**Human Language Technologies** Inguna Skadina, Andrejs Vasiljevs, 2010 This book

contains papers from the Fourth International Conference on Human Language Technologies - the Baltic Perspective (Baltic HLT 2010), held in Riga in October 2010. **Professional NFC Application Development for Android** Vedat Coskun,Kerem Ok,Busra Ozdenizci,2013-04-03 A practical guide to developing and deploying Near Field Communication (NFC) applications There has been little practical guidance available on NFC programming, until now. If you're a programmer or developer, get this unique and detailed book and start creating apps for this exciting technology. NFC enables contactless mobile communication between two NFC-compatible devices. It's what allows customers to pay for purchases by swiping their smartphones with Google Wallet, for example. This book shows you how to develop NFC applications for Android, for all NFC operating modes: reader/writer, peer-to-peer, and card emulation. The book starts with the basics of NFC technology, an overview of the Android OS, and what you need to know about the SDK tools. It then walks you through all aspects of NFC app development, including SE programming. You'll find all you need to create an app, including functioning, downloadable code and a companion website with additional content. Valuable case studies help you understand each operating mode in clear, practical detail. Shows programmers and developers how to develop Near Field Communication (NFC) applications for Android, including Secure Element (SE) programming Expert authors are NFC researchers who have a deep knowledge of the subject Covers app development in all NFC operating modes: reader/writer, peer-to-peer, and card emulation Includes valuable case studies that showcase several system design and analysis methods, such as activity diagram, class diagram, UML, and others Professional NFC Application Development for Android offers the clear, concise advice you need to create great applications for this emerging and exciting technology.

*Multilingual Corpora and Multilingual Corpus Analysis* Thomas Schmidt,Kai Wörner,2012-11-15 This volume deals with different aspects of the creation and use of multilingual corpora. The term 'multilingual corpus' is understood in a comprehensive sense, meaning any systematic collection of empirical language data enabling linguists to carry out analyses of multilingual individuals, multilingual societies or multilingual communication. The individual contributions are thus concerned with a variety of spoken and written corpora ranging from learner and attrition corpora, language contact corpora and interpreting corpora to comparable and parallel corpora. The overarching aim of the volume is first to take stock of the variety of existing multilingual corpora, documenting possible corpus designs and uses, second to discuss methodological and technological challenges in the creation and analysis of multilingual corpora, and third to provide examples of linguistic analyses that were carried out on the basis of multilingual corpora.

ICCCE 2021 Amit Kumar,Stefan Mozar,2022-05-15 This book is a collection of research articles presented at the 4th International Conference on Communications and Cyber-Physical Engineering (ICCCE 2021), held on April 9

and 10, 2021, at CMR Engineering College, Hyderabad, India. ICCCE is one of the most prestigious conferences conceptualized in the field of networking and communication technology offering in-depth information on the latest developments in voice, data, image, and multimedia. Discussing the latest developments in voice and data communication engineering, cyber-physical systems, network science, communication software, image, and multimedia processing research and applications, as well as communication technologies and other related technologies, it includes contributions from both academia and industry. This book is a valuable resource for scientists, research scholars, and PG students working to formulate their research ideas and find the future directions in these areas. Further, it may serve as a reference work to understand the latest engineering and technologies used by practicing engineers in the field of communication engineering.

*Engineering Applications of Neural Networks* Giacomo Boracchi, Lazaros Iliadis, Chrisina Jayne, Aristidis Likas, 2017-07-30 This book constitutes the refereed proceedings of the 18th International Conference on Engineering Applications of Neural Networks, EANN 2017, held in Athens, Greece, in August 2017. The 40 revised full papers and 5 revised short papers presented were carefully reviewed and selected from 83 submissions. The papers cover the topics of deep learning, convolutional neural networks, image processing, pattern recognition, recommendation systems, machine learning, and applications of Artificial Neural Networks (ANN) applications in engineering, 5G telecommunication networks, and audio signal processing. The volume also includes papers presented at the 6th Mining Humanistic Data Workshop (MHDW 2017) and the 2nd Workshop on 5G-Putting Intelligence to the Network Edge (5G-PINE).
